

2027학년도 수능 대비 모의평가

1. 다음 글의 주제로 가장 적절한 것은? (3점)

There is no denying that ageism can sometimes undermine a relationship you are trying to develop. For example, a very young worker at the beginning of their career may meet with a much older person who may be tempted to disregard their expertise and potential effectiveness simply on the grounds of age and assumed inexperience. By contrast, a much older worker, when trying to work with a younger person, may find that they represent a parent figure so strongly that the young person 'puts up the shutters' and refuses to have anything to do with them. There are no easy ways around this. Sometimes it is a question of how 'cases' are allocated within an agency. What is important, however, is that you will need to raise these issues directly and try to talk about the 'blocks' that are being put up, in the hope that by airing them they can gradually be removed, and a trusting relationship established. That will be a challenge to your communication skills admittedly, but until the 'block' is identified it will not be possible to move forward.

*undermine: 약화시키다 **expertise: 전문 지식 ***allocate: 할당하다

- ① limitations of resolving conflicts through communication
- ② the potential for collaboration among different generations
- ③ the need for communication to address the challenges posed by ageism
- ④ the necessity of creating various adaptation programs for new employees
- ⑤ factors that hinder intergenerational communication within an organization

2. 다음 글의 제목으로 가장 적절한 것은?

Researchers conducted an experiment to examine whether chimpanzees could spontaneously combine quantities to obtain a larger reward. Each chimpanzee was shown two separate pairs of plates, each pair holding different numbers of food pieces, and was allowed to choose only one pair. To receive the food, the animal had to select the pair whose combined total was greater than that of the other, rather than simply picking the pair with the most visible pieces in a single plate. The chimpanzees consistently chose the pair with the higher combined sum, even when the individual plates within that pair contained fewer pieces than those in the other pair. This suggests that the animals were not merely comparing single largest amounts but were mentally adding the quantities across two plates before making their choice. Based on these findings, the researchers concluded that chimpanzees possess an inherent capacity to perform basic quantitative summation without any specific training, allowing them to maximize reward by evaluating combined values rather than isolated portions.

- ① Chimpanzees Prefer Familiar Plates Over New Ones
- ② Why Visual Illusions Confuse Animals During Feeding Tests
- ③ Training Methods That Improve Animal Counting Skills
- ④ The Social Hierarchy Behind Food-Sharing Behavior in Primates
- ⑤ Spontaneous Summation: How Chimpanzees Maximize Reward Through Quantity Comparison

3. 다음 글의 밑줄 친 부분 중, 어법상 틀린 것은?

Native people create legends to explain unusual events in their environment. A legend from the Hawaiian island of Kauai explains ① how the naupaka flower got its unusual shape. The flower looks like half a small daisy. The legend says that the marriage of two young lovers on the island ② was opposed by both sets of parents. The parents found the couple together on a beach one day, and ③ to prevent them from being together, one of the families moved to the mountains, separating the young couple forever. As a result, the naupaka flower was separated into two halves; one half moved to the mountains, and the other half ④ staying near the beach. This story is a good example of a legend ⑤ which native people invented to make sense of the world around them.

4. 다음 글의 밑줄 친 부분 중, 문맥상 낱말의 쓰임이 적절하지 않은 것은? (3점)

In order for us to be able to retain valuable pieces of information, our brain has to ① forget in a manner that is both targeted and controlled. Can you recall, for example, your very first day of school? You most likely have one or two noteworthy images in your head, such as putting your crayons and pencils into your pencil case. But that's probably the extent of the ② specifics. Those additional details that are apparently unimportant are actively deleted from your brain the more you go about remembering the situation. The reason for this is that the brain does not consider it ③ valuable to remember all of the details as long as it is able to convey the main message (i.e., your first day of school was great). In fact, studies have shown that the brain actively ④ strengthens regions responsible for insignificant or minor memory content that tends to disturb the main memory. Over time, the minor details vanish more and more, though this in turn serves to ⑤ sharpen the most important messages of the past.

5. 다음 글에서 전체 흐름과 관계 없는 문장은?

In our attempts to teach children desirable attitudes and behaviors, it is important that we explain to them the principles or reasons behind desired actions. ① For example, rather than threatening to punish athletes for heckling opponents, a coach might help his athletes understand the golden rule — "Do unto others as you would have them do unto you" — by asking them to consider what it would be like to be the victims of heckling. ② This procedure encourages athletes to develop empathy for their opponents. ③ Through competition, athletes can gain self-esteem, confidence and strength, which benefits all aspects of their lives. ④ The ability to place oneself in the role of another person is essential to the development of morality. ⑤ Understanding and applying this golden rule can thus lead children to internalize the concept of sportsmanship and consideration for others. *heckle 야유를 퍼붓다

6. 다음 글의 내용을 한 문장으로 요약하고자 한다. 빈칸 (A), (B)에 들어갈 말로 가장 적절한 것은?

The searchability of online works represents a variation on older navigational aids such as tables of contents, indexes, and concordances. But the effects are different. As with links, the ease and ready availability of searching make it much simpler to jump between digital documents than it ever was to jump between printed ones. Our attachment to any one text becomes more tenuous, more transitory. Searches also lead to the fragmentation of online works. A search engine often draws our attention to a particular snippet of text, a few words or sentences that have strong relevance to whatever we're searching for at the moment, while providing little incentive for taking in the work as a whole. We don't see the forest when we search the Web. We don't even see the trees. We see twigs and leaves.

As online search becomes easier and speedier, people's attachment to a text tends to become more ____ (A) ____, and their interest in the whole content ____ (B) ____.

- | (A) | | (B) | | (A) | | (B) |
|---------------|-------|------------|--|-------------|-------|------------|
| ① temporary | | expands | | ② temporary | | diminishes |
| ③ intense | | diminishes | | ④ intense | | expands |
| ⑤ complicated | | persists | | | | |

정답 및 해설

1. [정답] ③

[해설]

이 글은 연령 차별주의(ageism)가 관계 형성에 장애물('blocks')이 될 수 있는 두 가지 사례를 제시한 후, 해결책으로 'raise these issues directly and try to talk about the 'blocks''(이 문제들을 직접 제기하고 그 '장애물'에 대해 이야기하려고 노력할 필요가 있다)라고 제안한다. 이는 의사소통을 통한 문제 해결을 강조하는 것이므로, 글의 주제는 '연령 차별주의로 인한 어려움을 해결하기 위한 의사소통의 필요성'이 가장 적절하다.

2. [정답] ⑤

[해설]

지문은 침팬지에게 두 쌍의 접시 중 합계가 더 큰 쌍을 선택하게 하는 실험을 소개하고(실험), 침팬지들이 개별 접시의 양이 아니라 두 접시의 합산된 수량을 비교하여 선택했다는 결과를 제시한 뒤(결과), 이를 통해 침팬지가 훈련 없이도 자발적으로 수량을 합산하는 능력을 지녔다는 함의를 도출한다(함의). 따라서 정답은 ⑤('Spontaneous Summation: How Chimpanzees Maximize Reward Through Quantity Comparison')로, 실험-결과-함의의 핵심을 모두 포괄한다. ①('Chimpanzees Prefer Familiar Plates Over New Ones')은 지문에 전혀 언급되지 않은 내용이다. ③('Training Methods That Improve Animal Counting Skills')은 지문이 오히려 '훈련 없이'도 가능한 능력을 강조하므로 지문과 반대된다. ②('Why Visual Illusions Confuse Animals During Feeding Tests')는 지문에 등장하지 않는 시각적 착시에 관한 내용으로 범위를 벗어난다. ④('The Social Hierarchy Behind Food-Sharing Behavior in Primates')는 먹이 공유나 사회적 위계에 관한 내용으로 지문에서 다루지 않은 지나치게 넓은/무관한 진술이다.

3. [정답] ④

[해설]

세미콜론(;) 뒤에서 'one half moved...'와 대등한 절이 이어져야 한다. 따라서 'the other half'를 주어로 하는 정동사가 필요하다. 준동사 'staying'이 아닌, 앞선 동사 'moved'와 시제를 맞춘 'stayed'가 와야 한다.

4. [정답] ④

[해설]

이 글은 뇌가 중요한 정보를 유지하기 위해 불필요한 세부 사항을 적극적으로 '삭제(deleted)'하거나 '잊는다(forget)'는 내용입니다. 뇌는 핵심 메시지 전달에 방해가 되는 사소한 기억 내용을 중요하지 않다고 여깁니다. 따라서 뇌가 주요 기억을 방해하는 경향이 있는 '사소하거나 미미한 기억 내용'(insignificant or minor memory content)'을 담당하는 영역을 '강화한다(strengthens)'는 것은 문맥에 맞지 않습니다. 오히려 그 영역을 '억제한다(suppresses)' 또는 '약화시킨다(weakens)'고 해야 논리적으로 자연스럽습니다.

5. [정답] ③

[해설]

이 글의 주제는 아이들에게 바람직한 행동을 가르칠 때, 그 행동 뒤에 있는 원칙이나 이유(황금률)를 설명하여 공감 능력과 도덕성을 길러주는 것이 중요하다는 것이다. 문장 ③은 경쟁을 통해 얻는 일반적인 이점(자존감, 자신감 등)에 대해 이야기하고 있어, '이유를 설명하여 공감과 도덕성을 키운다'는 글의 핵심 논점에서 벗어난다.

6. [정답] ②

[해설]

지문은 온라인 검색이 쉬워지면서 텍스트에 대한 우리의 애착이 '더 미약해지고(tenuous), 더 일시적이게(transitory)' 된다고 말한다. 따라서 (A)에는 'temporary(일시적인)'가 적절하다. 또한, 검색 엔진은 텍스트 전체를 파악할 동기를 거의 부여하지 않고('providing little incentive for taking in the work as a whole'), 단편적인 정보(twigs and leaves)에만 집중하게 만든다고 설명한다. 이는 전체 내용에 대한 관심이 '감소한다(diminishes)'는 의미이므로 (B)에는 'diminishes'가 적절하다.
