

2027학년도 수능 대비 모의평가

1. 다음 글의 주제로 가장 적절한 것은?

There are a number of ways in which technology can be used to protect social network users from disclosure or privacy threats or violations. More drastic technical solutions involve disabling or banning social media/social networking. For example, some schools and workplaces place explicit restrictions or in some cases a complete ban on social networking sites and they are disabled at the IT level so that students or employees cannot access these sites. The problem with this solution is that the benefits of using these sites are also lost. Additionally, while this may prevent use of these sites during school or work hours, it has no impact on what is done after hours. The context collapse that occurs in an online environment blurs the line between people's professional and personal lives such that online information exchanges that occur outside of school or work hours impact people's lives at school or work. Therefore, employing these strategies is not necessarily effective in minimizing the potential risks overall.

- ① potential positive effects of social media in public
- ② some reasons to ban or restrict social media in certain settings
- ③ social networking that blurs the boundary between work and home
- ④ necessity of restricting access to social networking in certain settings
- ⑤ downside of controlling social networking sites for protecting users

2. 다음 글의 제목으로 가장 적절한 것은?

For students, plagiarism is usually a straightforward matter: If you present someone else's words or ideas as your own, you have plagiarized. In most schools, if you are caught doing so, the consequences can be severe, including even dismissal from school. The whole matter of plagiarism rests on an assumption that each of us has our own ideas and is responsible for our own words. In this sense, we "own" those words and ideas; we "own" our intellectual work. And we're not allowed to "steal" others' words or ideas. But the ownership of intellectual work — the matter of intellectual property — is not as straightforward as it might seem. It's easy to see plagiarism when a student hands in a paper written by someone else. In effect, that student is submitting as his or her own someone else's intellectual property. But what if you asked a roommate or a relative for help with an essay you are writing for one of your classes? What if that person suggested a way for you to reword a few sentences or a paragraph? Or that person advised you to reorganize your essay to make it more coherent and effective? If you did so and then submitted your essay to your teacher, is that essay yours? Or does it belong partly to the roommate or relative who helped you? Who owns the ideas and words in that essay? This example suggests how difficult it can be to determine the source — or "owner" — of an idea or a phrase. It also suggests how little of what we tend to think of as our own intellectual work really is the result of a(n) _____ individual effort.

- ① Who Owns Words and Ideas?
- ② The Consequences of Plagiarism
- ③ How to Avoid Plagiarism in Essays
- ④ The Importance of Intellectual Property
- ⑤ Plagiarism as Both an Ethical and Legal Matter

3. 다음 글의 밑줄 친 부분 중, 어법상 틀린 것은? (3점)

Though he probably was not the first to do it, Dutch eyeglass maker Hans Lippershey gets credit for putting two lenses on either end of a tube in 1608 and ① creating a "spyglass." Even then, it was not Lippershey but his children who discovered ② that the double lenses made a nearby weathervane look bigger. These early instruments were not ③ much more than toys because their lenses were not very strong. The first person to turn a spyglass toward the sky was an Italian mathematician and professor named Galileo Galilei. Galileo, who heard about the Dutch spyglass and began making his own, ④ realizing right away how useful the device could be to armies and sailors. As he made better and better spyglasses, which were later named telescopes, Galileo decided ⑤ to point one at the Moon.

*weathervane: 풍향계

4. 다음 글의 밑줄 친 부분 중, 문맥상 낱말의 쓰임이 적절하지 않은 것은?

Research suggests that people in the United States spend about four hours more per week engaging in leisure than they did in the 1960s, while work hours have remained relatively constant. Thus, our sense that we have less free time now than people did in earlier decades may be largely an (a) ① illusion. In a study at the University of Toronto, students played the role of consultants, performing tasks for various offices of a imaginary company and billing their time in six-minute intervals. Half the students billed the company 15 cents per minute (\$9/hour) for their time, while the others billed the company \$1.50 per minute (\$90/hour). Afterward, students who billed the company at the higher rate reported feeling (b) ② more pressed for time — even though they had completed the same tasks for the same amount of time as students who billed at the lower rate. In other words, making students' time worth a lot of money was all it took to turn them into stressed-out, time-squeezed consultants. Why might this be? It's because scarcity increases value. And conversely, when something is valuable, it is typically perceived to be scarce. As time becomes worth more money, people see that time as increasingly scarce. This (c) ③ objective time perception may help explain why Americans report feeling more rushed for time than in earlier decades. (d) ④ Rising incomes over the past decades have made time relatively more valuable. The same pattern holds within any one individual's lifetime. Until retirement, most people get wealthier as they age, potentially helping to account for why our lives feel (e) ⑤ busier than when we were younger.

5. 다음 글에서 전체 흐름과 관계 없는 문장은?

Of cultivated crops, cereals were of the greatest economic importance in the Mediterranean region in ancient times, just as rice was the basic type of food in East Asia, and Indian corn and quinoa in the Americas. ① Since wild plants were necessarily self-seeding for their survival, the early Neolithic farmers favored individual plants that had developed mutations that prevented their pods from opening naturally and scattering their seeds. ② Thus, they were able to harvest their crops without losing grains, and could later separate the seeds from the pods. ③ Similarly with animals: those that exhibited obedient characteristics were favored over the strong-willed and were further bred to eliminate their wild characteristics. ④ These domesticated plants and animals made it attractive for the farmers to gather in close-knit communities rather than live apart. ⑤ This — the earliest form of genetic manipulation by humans — was eventually to make a significant portion of Mediterranean flora and fauna dependent on human assistance in reproduction and survival.

6. 다음 글의 내용을 한 문장으로 요약하고자 한다. 빈칸 (A), (B)에 들어갈 말로 가장 적절한 것은?

For many language learners, the ideal way to deepen their understanding of life in the country where that language is spoken – a visit or an extended stay – is just not possible. Some may start learning a language knowing that they are unlikely ever to set foot in an area where it is spoken by the majority of inhabitants. For all such learners, more indirect routes to this form of understanding must be adopted so that they gain an understanding of the way of life of the country: radio programmes, films or videos, newspapers, and, last but not least, literary works. It is true of course that the 'world' of a novel, play, or short story is a created one, yet it offers a full and vivid context in which characters from many social backgrounds can be depicted. This vivid imagined world can quickly give the foreign reader a feel for the codes and preoccupations that structure a real society whose language is being learnt.

For many foreign language learners, it is not easy to ____ (A) ____ to places where their target language is used; however, exposing themselves to various forms of ____ (B) ____ can help them understand those societies better.

정답 및 해설

1. [정답] ⑤

[해설]

이 글은 소셜 미디어 사용자를 보호하기 위한 기술적 통제(예: 사이트 차단)를 소개하지만, 이러한 해결책이 이점 상실, 시간 외 사용에 대한 무력함, 공사 생활의 경계 모호화 등 여러 문제점을 야기하여 전반적으로 효과적이지 않다고 비판한다. 따라서 글의 주제는 사용자 보호를 위한 소셜 네트워킹 사이트 통제의 단점이다.

2. [정답] ①

[해설]

글의 전반부는 표절과 지적 재산의 소유권 개념을 소개하지만, 후반부에서는 친구나 친척의 도움을 받은 에세이의 예를 들며 'Who owns the ideas and words in that essay?'라고 질문한다. 이처럼 아이디어나 단어의 소유자를 결정하기 어렵다는 점을 핵심적으로 다루고 있으므로, '누가 단어와 아이디어를 소유하는가?'라는 제목이 가장 적절하다.

3. [정답] ④

[해설]

④번은 문장의 본동사가 필요한 자리입니다. 주어는 Galileo이고, 콤마(,)와 콤마(,) 사이는 삽입된 관계대명사절입니다. 따라서 realizing은 동사 역할을 할 수 없으며, 과거 시제 동사인 realized로 고쳐야 합니다.

4. [정답] ③

[해설]

지문은 시간의 가치를 어떻게 인식하느냐에 따라 시간에 대한 압박감이 달라진다는 심리적 현상을 다루고 있습니다. (c)가 포함된 문장은 이러한 시간 인식이 미국인들이 더 시간에 쫓긴다고 느끼는 이유를 설명한다고 말합니다. 그러나 이 인식은 시간의 금전적 가치에 따라 변하는 주관적인(subjective) 것이지, 사실에 기반한 객관적인(objective) 것이 아닙니다. 따라서 문맥상 'objective'는 적절하지 않으며 'subjective'와 같은 단어로 대체되어야 합니다. 나머지 (a) illusion(착각), (b) more(더), (d) Rising(증가하는), (e) busier(더 바쁜)는 모두 문맥상 자연스럽습니다.

5. [정답] ④

[해설]

이 글은 신석기 시대 농부들이 식물과 동물을 길들이는 과정, 즉 초기 형태의 유전적 조작에 대해 설명하고 있습니다. 글의 전반적인 내용은 인간이 생존과 번식을 위해 식물(①, ②)과 동물(③)을 어떻게 선택적으로 개량했는지에 초점을 맞추고 있습니다. 마지막 문장(⑤)은 이러한 유전적 조작의 결과를 요약합니다. 하지만 ④번 문장은 길들여진 동식물이 농부들을 공동체 생활로 이끌었다는 사회적 결과에 대해 언급하며, 글의 핵심 주제인 '유전적 조작 과정'에서 벗어납니다. 따라서 전체 흐름과 관계없는 문장은 ④입니다.

6. [정답] ②

[해설]

본문은 많은 언어 학습자들이 해당 언어가 사용되는 국가를 '방문(visit)'하거나 '체류(stay)'하는 것이 어렵다고 말하므로 (A)에는 'travel(여행하다)'이 적절하다. 이러한 학습자들을 위해 라디오, 영화, 신문, 문학 작품과 같은 '간접적인 경로'를 대안으로 제시하고 있으므로, (B)에는 이러한 것들을 포괄하는 'media(매체)'가 가장 적절하다.
