

2027학년도 수능 대비 모의평가

1. 다음 글의 주제로 가장 적절한 것은?

During the last two decades many developing countries have joined the global tourism market as part of globalization processes and the fall of the Iron Curtain. These countries had suffered from negative public and media image which made it challenging for them to compete over tourists with countries with strong and familiar brands. In this global era, a problematic image is a major obstacle in attracting tourists, highquality residents and investors. However, in the case of destinations suffering from prolonged image crises, it seems almost unrealistic to expect any target audience to visit a destination and "put aside" these longlasting negative images and stereotypes, just because of an advertising campaign or other promotional effort. Tackling prolonged negative place images is crucial for developing tourism in Africa, the Middle East, Latin America, Eastern Europe and Asia. Although these destinations differ greatly, in the eyes of many potential tourists they all suffer from weak place images, negative stereotypes and problematic perceptions.

- ① growing conflicts between tourists and local people
- ② roles of media in shaping the global trend in tourism
- ③ necessity of global cooperation for sustainable tourism
- ④ importance of the tourism industry in national economy
- ⑤ developing nations' need to improve destination images

2. 다음 글의 제목으로 가장 적절한 것은?

The distinction between a fine and a fee is also relevant to the debate over how to reduce greenhouse gases and carbon emissions. Should the government set limits on emissions and fine companies that exceed them? Or should government create pollution permits that can be purchased? The second approach says in fact that emitting pollution is not like littering but simply a cost of doing business. To decide this question, we need not only to calculate costs and benefits; we have to decide what attitudes toward the environment we want to promote. At the Kyoto conference on global warming in 1997, the United States insisted that any mandatory worldwide emissions standards would have to include a (A) scheme, allowing countries to buy and sell the right to pollute. So, for example, the United States could fulfill its obligations under the Kyoto Protocol by either reducing its own greenhouse gas emissions or paying to reduce emissions someplace else. But this approach misses a crucial point: the problem of norms. Global action on climate change may require that we find our way to a new environmental ethics, a new set of efficiency, a global market in the right to pollute may make it harder to (B) the habits of restraint and shared sacrifice that a resposible environmental ethic requires.

- ① Everything We Use Can Be a Pollutant
- ② The Real Problem Is Not Carbon Emissions
- ③ Laws Can't Stop Destruction of the Environment
- ④ Responsibility for the Environment is Not a Commodity
- ⑤ Rich Countries: The Greatest Contributors to Pollution

3. 다음 글의 밑줄 친 부분 중, 어법상 틀린 것은?

Getting through the first year deserves a celebration. Every baby album usually has a photo of a cute one-year-old about ①to destroy the cake with its one candle. This birthday may also be worth ②remembering as the quiet before the storm. All of the baby's behavior is likely to go into a period of disorganization soon, before the next spurt. Just before he walks, the toddler-to-be starts waking every four hours at night. The one-year-old screams every time his mother walks away from ③himself. Under the surface ④is a realization that he wants to be the one to walk away. Every task brings on a burst of angry frustration, as ⑤does every confrontation or request. All this turbulence is stirred up by the new goal — walking.

4. 다음 글의 밑줄 친 부분 중, 문맥상 낱말의 쓰임이 적절하지 않은 것은?

The time has come to incorporate emotional literacy into the school curriculum. It is not a new subject because feelings are at the ①heart of learning and living as a human being. It is simply a choice as to whether we consciously manage them effectively and teach children how to self-manage their feelings in an effective way using the languages of the feeling life, or, whether we ignore, repress or deny feelings and ②continue to focus on cognitive literacy alone. When feelings are ③addressed in schools, it is done using the verbal languages of cognitive literacy. These languages are ④adequate for the task as evidenced by the increasing number of feelings that manifest into challenging behaviours that need psychological referral or psychiatric drug intervention in primary school children. If we introduce emotional literacy and use the languages of the feeling life, which are primarily non-verbal, to help children to identify and process their basic human feeling states, then many of today's school behavioural problems will not ⑤emerge.

* referral: (사람을 전문적인 도움을 받을 곳으로) 위탁

5. 다음 글에서 전체 흐름과 관계 없는 문장은?

There is a heap of data from long before to support the assertion that we all benefit from interaction with others; that in fact, our most fundamental skills depend on it. Human beings are social animals. ① Our physical and mental wellbeing, cognitive functioning, language acquisition and emotional regulation all develop in and depend on an open and diverse collective life. ② Our thinking power becomes greater when we are part of a group that includes individuals from outside the family. ③ We live in a world where individual notions about reality create differences that can challenge civil discourse. ④ We all need exposure to diverse role models and the perspectives of people beyond our genetic kin and our immediate living and working situation. ⑤ When we are in communication with ideas and people from beyond our bubble, our individual cognitive abilities increase and we can contribute our unique perspective to the collective mind.

6. 다음 글의 내용을 한 문장으로 요약하고자 한다. 빈칸 (A), (B)에 들어갈 말로 가장 적절한 것은?

Social psychologists at the University of Virginia asked college students to stand at the base of a hill while carrying a weighted backpack and estimate the steepness of the hill. Some participants stood next to close friends whom they had known a long time, some stood next to friends they had not known for long, some stood next to strangers, and the others stood alone during the exercise. The participants who stood with close friends gave significantly lower estimates of the steepness of the hill than those who stood alone, next to strangers, or next to newly formed friends. Furthermore, the longer the close friends had known each other, the less steep the hill appeared to the participants involved in the study.

According to the study, a task is perceived as less ____ (A) ____ when standing next to a ____ (B) ____ friend.

- | (A) | (B) | (A) | (B) |
|-------------|--------------|------------|---------------|
| ① difficult | close | ② valuable | new |
| ③ difficult | smart | ④ valuable | patient |
| ⑤ exciting | strong | | |
