

2027학년도 수능 대비 모의평가

1. 다음 글의 주제로 가장 적절한 것은?

The public growth of the Internet began in the 1990s, as increasing numbers of computers came into homes and workplaces. The first online newspaper was published in the US and the Chicago-based Tribune was among the first titles to put its content online, in 1991. As the decade progressed, software developments made the task of creating online content quicker and cheaper — between 1995 and 1998, the number of US dailies on the web grew from 175 to 750. Newspapers in the UK followed the same pattern: in 1994, the Sunday Times became the UK's first newspaper to have an online edition and a few months later the Daily Telegraph launched the Electronic Telegraph, Europe's first online daily.

- ① the early history of online newspapers
- ② the bad effects of the Internet on youth
- ③ the disadvantage of delivering news online
- ④ the efforts of newspapers to reduce errors
- ⑤ the effectiveness of different news formats

2. 다음 글의 제목으로 가장 적절한 것은? (3점)

In the 1980s, psychologists discovered that exposure to a word causes immediate and measurable changes in the ease with which many related words can be evoked. If you have recently seen or heard the word EAT, you are temporarily more likely to complete the word fragment SO _P as SOUP than as SOAP. The opposite would happen, of course, if you had just seen WASH. We call this a priming effect and say that the idea of EAT primes the idea of SOUP, and that WASH primes SOAP. Priming effects take many forms. If the idea of EAT is currently on your mind, you will be quicker than usual to recognize the word SOUP when it is spoken in a whisper or presented in a blurry font. And of course you are primed not only for the idea of soup but also for a multitude of food-related ideas, including fork, hungry, fat, diet, and cookie. Like ripples on a pond, activation spreads through a small part of the vast network of associated ideas.

*prime: (생각·감정이) 떠오르게 하다 **blurry: 흐릿한 ***ripple: 잔물결

- ① Priming Effect: The Mechanism of Association
- ② The Two Faces of Background Knowledge
- ③ How to Prevent the Flood of Information
- ④ Bad Eyesight: Incapable of Making a Decision
- ⑤ Everything Has Side Effects, But Not Association Effect!

3. (A), (B), (C)의 각 네모 안에서 어법에 맞는 표현으로 가장 적절한 것은?

Our environment has a strong effect on our food and beverage choices. When looking for a beverage, you tend to drink what is available. The environment serves up a menu, and you make a choice. One of the reasons that Americans consume so many soft drinks (A) are / is that they are available everywhere. Convenience stores, gas stations, dorms, schools, worksites, and most campus buildings will have at least one drink machine. Everywhere you turn you have the opportunity to purchase sugar-sweetened beverages, usually in large quantities for a low price. Health educators (B) work / working in the area of healthy eating suggest offering healthy options along with the not so healthy ones or, better yet, offering only healthy options. You see this theory in action with the replacement of sugarsweetened beverages in many schools. Some worksites have replaced some or all of the sugarsweetened beverages with low- or no-calorie options to support employee wellness. To make a positive change in beverage choices, (C) it / they must be easy—or at least possible—to make a healthy choice.

- ① are work it
- ② are working they
- ③ is work it
- ④ is working it
- ⑤ is working they

4. 다음 글의 밑줄 친 부분 중, 문맥상 낱말의 쓰임이 적절하지 않은 것은? (3점)

The sense of touch is one of the factors which prevent people from being convinced of the truth that the senses of sight, hearing and taste occur within the brain. For example, if you told someone that he sees a book within his brain, he would, if he didn't think carefully, reply "I can't be ① seeing the book in my brain—look, I'm touching it with my hand". Or, if we said "we cannot know whether the original of this book exists as a material object outside or not", again the same superficially minded person might answer "no, look, I'm holding it with my hand and I feel the hardness of it—that isn't a perception but an ② existence which has material reality". However, there is a fact that such people cannot understand, or perhaps just ignore. The sense of touch also ③ occurs in the brain as much as do all the other senses. That is to say, when you touch a material object, you sense whether it is hard, soft, wet, sticky or silky in the brain. The effects that come from your fingertips are transmitted to the brain as an electrical signal and these signals are ④ perceived in the brain as the sense of touch. For instance, if you touch a rough surface, you can never know whether the surface is, in reality, indeed a rough surface, or how a rough surface actually feels. That is because you can never touch the ⑤ image of a rough surface. The knowledge that you have about touching a surface is your brain's interpretation of certain stimuli.

5. 다음 글에서 전체 흐름과 관계 없는 문장은?

Elderspeak is characterized by several components. Which ones are beneficial for older adults and which ones are not helpful? Kemper and Harden had older adults watch a videotape in which a speaker described a route that was also traced on a map. ① The older adults reported that the instructions were easier to follow when the speaker reduced the grammatical complexity and used semantic elaboration. ② Simpler grammar and semantic elaboration also helped older adults improve their accuracy when they had to reproduce the same route on a map of their own. ③ In contrast, shortening the length of the speaker's utterances into two- and five-word sentences did not improve the older adults' comprehension of the instructions, nor did it improve their performance when they traced a map of their own. ④ But elderspeak resembles speech used with children, which is characterized by slower speech, exaggerated intonation, higher pitch, increased loudness, repetitions, tag questions, and vocabulary and grammar simplifications. ⑤ Also, the older listeners did not find that an extremely slow rate of speaking with many pauses or exaggerated prosody was helpful.

6. 다음 글의 내용을 한 문장으로 요약하고자 한다. 빈칸 (A), (B)에 들어갈 말로 가장 적절한 것은?

A woman named Rhonda who attended the University of California at Berkeley had a problem. She was living near campus with several other people — none of whom knew one another. When the cleaning people came each weekend, they left several rolls of toilet paper in each of the two bathrooms. However, by Monday all the toilet paper would be gone. It was a classic tragedy-of-the-commons situation: because some people took more toilet paper than their fair share, the public resource was destroyed for everyone else. After reading a research paper about behavior change, Rhonda put a note in one of the bathrooms asking people not to remove the toilet paper, as it was a shared item. To her great satisfaction, one roll reappeared in a few hours, and another the next day. In the other note-free bathroom, however, there was no toilet paper until the following weekend, when the cleaning people returned.

↓

A small ___(A)___ brought about a change in the behavior of the people who had taken more of the ___(B)___ goods than they needed.

- | (A) | (B) | (A) | (B) |
|------------|---------------|------------|----------------|
| ① reminder | shared | ② reminder | recycled |
| ③ mistake | stored | ④ mistake | borrowed |
| ⑤ fortune | limited | | |
