

2027학년도 수능 대비 모의평가

1. 다음 글의 주제로 가장 적절한 것은?

Radical developments in technology have revolutionized the way in which artists and entertainers tell their stories. From live-streamed transmissions from London's Royal Opera House and the New York Met to the innovative use of sound, film and projection in plays such as the National Theater's *The Waves*, technology is constantly opening up staged entertainment to new formats and audiences. The British producing company Artichoke are masters of harnessing technology to tell a story: In May 2006 they brought French company Royal de Luxe's *The Sultan's Elephant* to the streets of London, fascinating audiences young and old with a 42-ton mechanical elephant and a 6-meter-tall princess, who traveled on a London bus and disappeared in a rocket.

*harness: 이용하다

- ① influence of technology on artistic expression
- ② growing commercialism in various performing arts
- ③ reasons some performances are popular for a long time
- ④ utilizing artistic formats in promoting goods and services
- ⑤ the process of making characters familiar to audiences

2. 다음 글의 제목으로 가장 적절한 것은?

In organizations, there is no simple cause-and-effect relationship between introducing a management technique and getting an improved business result. This contrasts with other spheres of activity where simple causal relationships do seem to operate. Hit the nail with the hammer, and it goes into the wood. Show a dog food, and it salivates. This kind of simple cause-and-effect logic can be misleading if applied to the complex world of organizations, where it is difficult to trace single effects to single causes. Uncontrollable outside factors can sink a wonderfully designed team (a hurricane just swept the entire inventory out to sea) or rescue one whose design was so bad that failure seemed assured (the firm that was competing for the contract just went belly-up). In organizations, multiple causes are operating at the same time and interacting with each other over an extended period of time.

- ① A Single Cause Can Have Multiple Effects.
- ② The Ends Outweigh the Means in Business.
- ③ Causality in Business Is Not Always Linear.
- ④ Making Uncontrollable Factors Controllable.
- ⑤ Good Business Plans Consider Outside Factors.

3. 다음 글의 밑줄 친 부분 중, 어법상 틀린 것은?

We usually get along best with people who we think are like us. In fact, we seek them out. It's why places like Little Italy, Chinatown, and Koreatown ①exist. But I'm not just talking about race, skin color, or religion. I'm talking about people who share our values and look at the world the same way we ②do. As the saying goes, birds of a feather flock together. This is a very common human tendency ③what is rooted in how our species developed. Imagine you are walking out in a forest. You would be conditioned to avoid something unfamiliar or foreign because there is a high likelihood that ④it would be interested in killing you. Similarities make us ⑤relate better to other people because we think they'll understand us on a deeper level than other people.

4. 다음 글의 밑줄 친 부분 중, 문맥상 낱말의 쓰임이 적절하지 않은 것은?

Many shops play a radio station in the background, complete with ads, news, weather, and so on. Not only can this be distracting, but the ads may include some for your store's ①competition — not exactly what you want customers to hear. Noncommercial radio is a good ②alternative during the times of day when the programming is all music. This service provides a variety of music all day long, with few if any repetitions, but, of course, you and your staff have ③full control over the individual selections. Playing music in the store brings up the thorny issue of paying for the ④rights to use the recordings commercially. Technically a store playing the radio is also ⑤required to pay a licensing fee for the music, so you have to check that before you turn on the radio.

5. 다음 글에서 전체 흐름과 관계 없는 문장은?

Cultural storage and transmission require humans to accomplish the work of storing knowledge and passing it on to the next generation by means other than DNA. To that end, humans developed techniques of memorization, of transmitting knowledge through education and by using external memory devices. ①The Chauvet cave was such a device, a place that humans returned to generation after generation, cooperating on a project that none of them could have accomplished alone. ②Each generation of artists learned techniques and continued the work of previous ones, preserving and improving what their predecessors had worked on. ③Despite advances in technology, there is a limit in restoring damaged cave paintings, leaving us puzzled about what those paintings really were. ④For us, the idea that humans might work on a single system of caves for thousands of years in the same style is almost unimaginable. ⑤But these early humans were highly conscious of the importance of storing and preserving knowledge and of passing down ideas.

6. 다음 글의 내용을 한 문장으로 요약하고자 한다. 빈칸 (A), (B)에 들어갈 말로 가장 적절한 것은?

Earlier navigational aids, particularly those available and affordable to ordinary folks, were just that: aids. They were designed to give travelers a greater awareness of the world around them — to sharpen their sense of direction, provide them with advance warning of danger, highlight nearby landmarks and other points of orientation, and in general help them situate themselves in both familiar and alien settings. Satellite navigation systems can do all those things, and more, but they're not designed to deepen our involvement with our surroundings. They're designed to relieve us of the need for such involvement. By taking control of the mechanics of navigation and reducing our own role to following routine commands, the systems, whether running through a dashboard, a smartphone, or a dedicated GPS receiver, end up isolating us from the environment. As a team of Cornell University researchers put it in a 2008 paper, "With the GPS you no longer need to know where you are and where your destination is, attend to physical landmarks along the way, or get assistance from other people in the car and outside of it."

↓

Compared to earlier navigational aids that enabled users to be more (A) with their surroundings, satellite navigation systems (B) us from the environment by limiting our part to simply following directions.

- | (A) | (B) | (A) | (B) |
|-------------|---------------|-----------------|-------------------|
| ① connected | detach | ② disassociated | distinguish |
| ③ connected | protect | ④ disassociated | separate |
| ⑤ concerned | rescue | | |
