

2027학년도 수능 대비 모의평가

1. 다음 글의 주제로 가장 적절한 것은?

Most babies appear bowlegged and pigeon-toed. This is because of the normal rotational curve in the legs of a newborn and because the cramped quarters in the womb often force one or both feet into odd positions. When he emerges at birth, after spending several months in that position, the feet are still bent or seem to turn inward. In the months ahead, as your baby's feet enjoy their freedom and as he learns to pull up, crawl, and then walk, his feet will begin straightening out. They almost always do without the early casting or special shoes and bars that were once routine treatment. Which is probably why these treatments, most of which are now deemed to be completely ineffective, usually appeared to "cure" the problem.

- ① causes of delayed walking in babies
- ② types of common feet problems in babies
- ③ the effect of physical exercise on babies' health
- ④ individual differences in babies' body movements
- ⑤ the natural process of a baby's feet straightening out

2. 다음 글의 제목으로 가장 적절한 것은?

AI opens new horizons of capabilities in the information space, including in the realm of disinformation. Generative AI can create vast amounts of false but plausible information. AI-facilitated disinformation and psychological warfare, including the use of artificially created identities, pictures, videos, and speech, is positioned to produce unsettling new vulnerabilities, particularly for free societies. Widely shared demonstrations have produced seemingly realistic pictures and video of public figures saying things they have never said. In theory, AI could be used to determine the most effective ways of delivering this synthetic AI-generated content to people, tailoring it to their biases and expectations. If a national leaders synthetic image is manipulated by an opponent to foster discord or issue misleading directives, will the public (or even other governments and officials) discern the deception in time? In contrast to the field of nuclear weapons, no widely shared prohibitive measures and no clear concept of prevention (or of degrees of escalation) attend such uses of AI.

- ① Synthetic Realities: The Bright Future of AI-Driven Information
- ② How AI Creates New Vulnerabilities for the National Economy
- ③ When AI Becomes a Liar: The Threat of Biased Political Leaders
- ④ AI and Information Shaping: A New Era of Digital Deception
- ⑤ Why Settle for Fake News When You Can Have Fake Everything?

3. 다음 글의 밑줄 친 부분 중, 어법상 틀린 것은?

Commercial airplanes generally travel airways similar to roads, although they are not physical structures. Airways have fixed widths and defined altitudes, ① which separate traffic moving in opposite directions. Vertical separation of aircraft allows some flights ② to pass over airports while other processes occur below. Air travel usually covers long distances, with short periods of intense pilot activity at takeoff and landing and long periods of lower pilot activity while in the air, the portion of the flight ③ known as the "long haul." During the "long haul" portion of a flight, pilots spend more time assessing aircraft status than ④ searching out nearby planes. This is because collisions between aircraft usually occur in the surrounding area of airports, while crashes due to aircraft malfunction ⑤ tends to occur during long-haul flight.

* altitude: 고도 ** long haul: 장거리 비행

4. 다음 글의 밑줄 친 부분 중, 문맥상 낱말의 쓰임이 적절하지 않은 것은?

In 1998, economists Uri Gneezy and Aldo Rustichini, from Israel and Italy, respectively, conducted an experiment on the impact of monetary fines on people's behavior. After observing the rates at which parents arrived late to collect their children at day-care centers, they ① introduced a fine for latecomers. They were testing the so-called deterrence hypothesis, which assumes that the introduction of a penalty will produce a ② reduction in the targeted behavior. The results of their study pointed in precisely the ③ same direction. Indeed, not only was there no deterrent effect, the number of tardy parents actually increased to double the rate recorded before the fine was ④ imposed. What is more, the elevated rates of late parents remained so ⑤ even after the fine system was removed.

5. 다음 글에서 전체 흐름과 관계 없는 문장은?

Too often we overcome one resource limitation by stretching another. ① The effect, overall, can be likened to a rubber band that can stretch and then stretch some more. ② Frequently, our solution to local resource shortages is to transport the limited resource from an area where it is more abundant or to manufacture alternatives using additional energy and other resources. ③ While this process gives the impression of increasing abundance, like the rubber band that appears longer when stretched, continued expansion puts more tension on remaining resources. ④ With resource shortages inevitable, there has never been a better time to invest in the operation and maintenance of global transport networks. ⑤ At the present time, our capacity for moving resources around and for powering industrial processes is enormous, but, like the rubber band, there will be a point where further expansion will fail.

6. 다음 글의 내용을 한 문장으로 요약하고자 한다. 빈칸 (A), (B)에 들어갈 말로 가장 적절한 것은?

When the curtain closes at any stage theater, the audience bursts into applause. It's usually a few clappers who hesitantly start on their own, and then others join in. Applause is a funny thing in which each person tries to give credit to the performers, but also tries to blend into the crowd; you don't want to clap before everyone else, or to go on after others have stopped. In fact, if you study it, you'll discover there is a pronounced pattern in the way an audience goes from silence to full volume of applause. Recordings at theaters around the world show that the pattern transcends different cultural habits and that different crowds all follow one universal curve showing how the sound rises over several seconds. Even more remarkably, this curve is absolutely identical to a curve known from physics that describes how a group of atoms or molecules collectively go from one kind of behavior to another, rapidly and abruptly, because what one does depends very strongly on what others nearby do.

The way people give applause is found to be ____ (A) ____ across cultures, showing the same pattern as atoms or molecules where each member is ____ (B) ____ .

- | (A) | (B) | (A) | (B) |
|-----------|-------------------|-----------|----------------------|
| ① diverse | independent | ② diverse | interdependent |
| ③ random | replaceable | ④ similar | interdependent |
| ⑤ similar | independent | | |

정답 및 해설

1. [정답] ⑤

[해설]

지문은 대부분의 아기가 처음에는 다리가 휘어 보이지만, 이는 자궁 내 자세 때문이며 성장 과정에서 기고 걸으면서 '다리가 펴지기 시작할 것(his feet will begin straightening out)'이라고 설명한다. 즉, 특별한 치료 없이 자연스럽게 다리가 펴지는 과정을 다루고 있으므로 ⑤가 주제로 가장 적절하다.

2. [정답] ④

[해설]

이 글은 AI 기술, 특히 생성형 AI가 허위 정보를 대량 생산하여 사회에 새로운 취약점을 만들고 디지털 기반의 시대를 열고 있다는 위협을 중점적으로 다루고 있습니다. AI를 이용한 허위 정보의 생성, 맞춤형 전달, 그리고 이를 막을 규제나 방지책의 부재를 지적하며 그 위험성을 경고하므로, 'AI와 정보 조작: 디지털 기반의 새로운 시대'라는 제목이 글의 전체적인 내용을 가장 잘 요약합니다.

3. [정답] ⑤

[해설]

⑤번이 포함된 절의 주어는 'crashes due to aircraft malfunction'입니다. 주어의 핵심인 'crashes'가 복수이므로, 동사는 복수형인 'tend'가 되어야 합니다.

4. [정답] ③

[해설]

이 실험은 벌금이 특정 행동을 감소시킬 것이라는 '억제 가설(deterrence hypothesis)'을 시험했다. 그러나 실제 결과는 벌금을 부과한 후 지각하는 부모의 수가 오히려 '증가했다(increased)'는 것이다. 이는 연구 결과가 가설과 '같은(same)' 방향이 아니라 '정반대(opposite)' 방향을 가리켰음을 의미하므로, ③ 'same'은 문맥상 적절하지 않다.

5. [정답] ④

[해설]

이 글은 하나의 자원 한계를 다른 자원을 확장하여 극복하는 방식의 문제점을 '고무줄'에 비유하여 설명하고 있습니다. 즉, 이러한 해결책은 일시적으로 풍요로워 보이는 착시를 주지만, 결국 다른 자원에 더 큰 긴장을 유발하며 한계에 부딪힐 것이라는 내용입니다. 하지만 ④번 문장은 자원 부족이 불가피하므로 '글로벌 운송망에 투자해야 할 최적기'라고 주장하며, 글의 전체적인 비판적 논조에서 벗어나 구체적인 해결책을 제시하고 있어 흐름과 관계가 없습니다.

6. [정답] ④

[해설]

본문에 따르면, 박수 소리가 커지는 양상은 '문화적 습관을 초월(transcends different cultural habits)'하며 '하나의 보편적인 곡선(one universal curve)'을 따른다. 이는 박수 방식이 문화 전반에 걸쳐 (A) 유사함(similar)을 의미한다. 또한, 이러한 양상은 한 개체의 행동이 '주변 다른 개체들의 행동에 매우 강하게 의존(depends very strongly on what others nearby do)'하는 원자나 분자의 집단 행동과 동일하다고 설명한다. 이는 각 구성원이 (B)상호의존적(interdependent)임을 보여준다.
