

2027학년도 수능 대비 모의평가

1. 다음 빈칸에 들어갈 말로 가장 적절한 것을 고르시오. (3점)

Education, at its best, teaches more than just knowledge. It teaches critical thinking: the ability to stop and think before acting, to avoid succumbing to emotional pressures. This is not thought control. It is the very reverse: mental liberation. Even the most advanced intellectual will be imperfect at this skill. But even imperfect possession of it _____ of being 'stimulus-driven', constantly reacting to the immediate environment, the brightest colours or loudest sounds. Being driven by heuristic responses, living by instinct and emotion all the time, is a very easy way to live, in many ways: thought is effortful, especially for the inexperienced. But emotions are also exhausting, and short-term reactions may not, in the long term, be the most beneficial for health and survival. Just as we reach for burgers for the sake of convenience, storing up the arterial fat which may one day kill us, so our reliance on feelings can do us great harm.

- ① intensifies people's danger
- ② enhances our understanding
- ③ frees a person from the burden
- ④ allows us to accept the inevitability
- ⑤ requires one to have the experience

2. 다음 빈칸에 들어갈 말로 가장 적절한 것을 고르시오.

Giving clients sufficient opportunity to react to your designs while in progress is a key to professional success. Similarly, involving prospective building users as well as clients is even more valuable in the long run. Say your client is a large corporation, such as a health care provider. While the hospital administration may serve as your client, no doubt the perspectives of administration personnel will differ significantly from those of doctors, interns, residents, nurses, and other medical staff who use the building regularly. In addition, the experiences of patients and visitors who use the building irregularly, often as a result of life-threatening emergencies, are altogether different as well. Understanding how each type of user experiences the current medical environment as well as how each reacts to your prospective designs inevitably produces a better building. People are likely to be more satisfied with a new building or addition if they _____. For a large institution, this can translate into increased productivity on the job, reduced absenteeism, less turnover, and lower costs.

- ① have been engaged in multiple design training sessions
- ② are given the opportunity to draft a new design
- ③ have established trust with the building designers
- ④ have been consulted in the design process
- ⑤ share their perspectives on the building with each other

3. 주어진 글 다음에 이어질 글의 순서로 가장 적절한 것은? (3점)

Culture operates in ways we can consciously consider and discuss but also in ways of which we are far less cognizant.

- (A) In some cases, however, we are far less aware of why we believe a certain claim to be true, or how we are to explain why certain social realities exist. Ideas about the social world become part of our worldview without our necessarily being aware of the source of the particular idea or that we even hold the idea at all.
- (B) When we have to offer an account of our actions, we consciously understand which excuses might prove acceptable, given the particular circumstances we find ourselves in. In such situations, we use cultural ideas as we would use a particular tool.
- (C) We select the cultural notion as we would select a screwdriver: certain jobs call for a Phillips head while others require an Allen wrench. Whichever idea we insert into the conversation to justify our actions, the point is that our motives are discursively available to us. They are not hidden.

| ① (A) - (C) - (B) | ② (B) - (A) - (C) |
| ③ (B) - (C) - (A) | ④ (C) - (A) - (B) |
| ⑤ (C) - (B) - (A) | |

4. 주어진 글 다음에 이어질 글의 순서로 가장 적절한 것은?

Spatial reference points are larger than themselves. This isn't really a paradox: landmarks are themselves, but they also define neighborhoods around themselves.

- (A) In a paradigm that has been repeated on many campuses, researchers first collect a list of campus landmarks from students. Then they ask another group of students to estimate the distances between pairs of locations, some to landmarks, some to ordinary buildings on campus.
- (B) This asymmetry of distance estimates violates the most elementary principles of Euclidean distance, that the distance from A to B must be the same as the distance from B to A. Judgments of distance, then, are not necessarily coherent.
- (C) The remarkable finding is that distances from an ordinary location to a landmark are judged shorter than distances from a landmark to an ordinary location. So, people would judge the distance from Pierre's house to the Eiffel Tower to be shorter than the distance from the Eiffel Tower to Pierre's house. Like black holes, landmarks seem to pull ordinary locations toward themselves, but ordinary places do not.

| ① (A) - (C) - (B) | ② (B) - (A) - (C) |
| ③ (B) - (C) - (A) | ④ (C) - (A) - (B) |
| ⑤ (C) - (B) - (A) | |

5. 글의 흐름으로 보아, 주어진 문장이 들어가기에 가장 적절한 곳을 고르시오.

Yes, some contests are seen as world class, such as identification of the Higgs particle or the development of high temperature superconductors.

Science is sometimes described as a winner-take-all contest, meaning that there are no rewards for being second or third. This is an extreme view of the nature of scientific contests. (①) Even those who describe scientific contests in such a way note that it is a somewhat inaccurate description, given that replication and verification have social value and are common in science. (②) It is also inaccurate to the extent that it suggests that only a handful of contests exist. (③) But many other contests have multiple parts, and the number of such contests may be increasing. (④) By way of example, for many years it was thought that there would be "one" cure for cancer, but it is now realized that cancer takes multiple forms and that multiple approaches are needed to provide a cure. (⑤) There won't be one winner there will be many.

6. 글의 흐름으로 보아, 주어진 문장이 들어가기에 가장 적절한 곳을 고르시오.

In reality, objects do not conform to a linear lifecycle model; instead, they undergo breakdowns, await repairs, are stored away, or find themselves relegated to the basement, only to be rediscovered and repurposed later.

By their very nature, the concepts of maintenance and repair are predominantly examined from a process-oriented perspective. (①) The focus in related scholarly discourse often revolves around the lifespan or lifecycle of objects and technologies. (②) In this context, maintenance and repair are considered practices that have the potential to prolong the existence of objects, ensuring their sustained utilization over an extended period. (③) Krebs and Weber critically engage with anthropomorphic metaphors that imply a biography of things, appropriately highlighting that conventional understanding of the lifecycle of a technology, from its acquisition to its disposal from the household, provides an incomplete definition. (④) Additionally, objects may enter recycling or second-hand cycles, leading to a dynamic afterlife marked by diverse applications. (⑤) As such, the life of an object exhibits a far more complicated and adaptive path than a simplistic linear progression.

정답 및 해설

1. [정답] ③

[해설]

교육이 가르치는 비판적 사고는 '정신적 해방(mental liberation)'이며, 이는 '자극 주도적인(stimulus-driven)' 상태, 즉 즉각적인 환경에 계속 반응하는 것과는 정반대라고 설명한다. 따라서 비판적 사고 능력을 불완전하게라도 소유하는 것은, '자극 주도적'이 되어야 하는 '부담으로부터 개인을 자유롭게 한다(frees a person from the burden)'는 내용이 들어가는 것이 가장 논리적이다.

2. [정답] ④

[해설]

이 글은 건물 설계 과정에서 고객뿐만 아니라 의사, 간호사, 환자 등 실제 건물 사용자를 참여시키는 것(involving prospective building users)의 중요성을 강조한다. 그들의 경험과 반응을 이해하는 것이 더 나은 건물을 만든다고 하였으므로, 사람들은 '설계 과정에서 자문을 받았다면(have been consulted in the design process)' 새로운 건물에 더 만족할 가능성이 높다.

3. [정답] ③

[해설]

주어진 글은 문화가 우리가 '의식적으로(consciously)' 고려하는 방식과 '훨씬 덜 인식하는(far less cognizant)' 방식으로 작동한다고 제시하며 대조의 틀을 마련한다. (B)는 '의식적으로 이해하는(consciously understand)' 경우를 설명하며 도구 사용에 비유한다. (C)는 (B)의 도구 비유를 '스크루드라이버'로 구체화하며, 우리의 동기가 숨겨져 있지 않다고(not hidden) 말하며 의식적인 측면의 설명을 마무리한다. (A)는 'however(그러나)'를 통해 대조를 이루며, 우리가 '훨씬 덜 인식하는(far less aware)' 경우, 즉 무의식적인 측면을 설명한다. 따라서 의식적 측면 설명(B-C) → 무의식적 측면 설명(A)의 순서인 (B)-(C)-(A)가 논리적이다.

4. [정답] ①

[해설]

주어진 글에서 랜드마크가 주변 지역을 정의한다는 개념을 소개한다. (A)에서 이 개념을 증명하기 위한 실험 설계를 설명한다. (C)에서 'The remarkable finding'이라는 표현으로 (A)에서 설계한 실험의 결과를 제시한다. (B)에서 'This asymmetry'라는 지시어로 (C)에서 밝혀진 비대칭적 거리 추정 결과가 가지는 의미를 설명하며 글을 마무리한다. 따라서 (A)-(C)-(B) 순서가 가장 자연스럽다.

5. [정답] ③

[해설]

주어진 문장 '네, 어떤 경쟁들은 ... 세계적인 수준으로 여겨집니다'는 'Yes'로 앞선 내용에 일부 동의하면서, 구체적인 예를 제시합니다. ②번 뒤 문장은 '오직 소수의 경쟁만 존재한다고 암시한다는 점에서 부정확하다'고 지적합니다. 여기에 주어진 문장이 ③번에 들어가면, '소수의 경쟁만 있다는 것은 부정확하다. (③ 네, 물론 히스 입자 발견과 같은 세계적 수준의 경쟁이 몇몇 있기는 합니다.) 그러나 다수의 부분으로 이루어진 다른 많은 경쟁들이 있고, 그 수는 증가하고 있을지 모릅니다.'라는 자연스러운 흐름이 형성됩니다. 즉, 앞선 주장을 일부 인정한 후 'But'으로 핵심 주장을 펼치는 논리적 연결 고리 역할을 합니다.

6. [정답] ④

[해설]

주어진 문장은 '현실에서는(In reality)' 사물이 선형적인 생애 주기 모델을 따르지 않고, 고장, 수리, 보관, 용도 변경 등 복잡한 과정을 거친다고 설명한다. 이는 기존의 선형적 생애 주기 모델에 대한 비판을 구체적인 예시로 뒷받침하는 내용이다. 글의 흐름상, 사물의 생애 주기에 대한 기존의 이해가 불완전하다는 비판이 제기된(③번 뒤 문장) 후에, 그 비판에 대한 구체적 예시로서 주어진 문장이 들어가는 것이 가장 자연스럽다. 또한, ④번 뒤 문장의 '게다가(Additionally)'는 주어진 문장의 예시에 추가적인 예시를 더하는 역할을 하므로 ④이 가장 적절하다.
