

2027학년도 수능 대비 모의평가

1. 다음 빈칸에 들어갈 말로 가장 적절한 것을 고르시오.

When gathering the preferences of multiple agents into one collective choice, it is easily seen that certain cases _____. For example, if there are two alternatives, a and b, and two agents such that one prefers a and the other one b, there is no deterministic way of selecting a single alternative without violating one of two basic fairness conditions known as anonymity and neutrality. Allowing lotteries as social outcomes hence seems like a necessity for impartial collective choice. Indeed, most common "deterministic" social choice functions such as plurality rule are only deterministic as long as there is no tie, which is usually resolved by drawing a lot. The use of lotteries for the selection of officials interestingly goes back to the world's first democracy in Athens, where it was widely regarded as a principal characteristic of democracy, and has recently gained increasing attention in political science.

- ① call for randomization or other means of tiebreaking
- ② demonstrate how impartial selection could be invalidated
- ③ necessitate deterministic systems of selecting voters blindly
- ④ rely upon neutral agents to establish clear selection guidelines
- ⑤ require understanding of the unpredictability inherent in democracy

2. 다음 빈칸에 들어갈 말로 가장 적절한 것을 고르시오.

We are famously living in the era of the attention economy, where the largest and most profitable businesses in the world are those that consume my attention. The advertising industry is literally dedicated to capturing the conscious hours of my life and selling them to someone else. It might seem magical that so many exciting and useful software systems are available to use for free, but it is now conventional wisdom that if you can't see who is paying for something that appears to be free, then _____. Our creative engagement with other people is mediated by AI-based recommendation systems that are designed to trap our attention through the process that Nick Seaver calls captology, keeping us attending to work sold by one company rather than another, replacing the freedom of personal exploration with algorithm-generated playlists or even algorithm-generated art.

- ① all of your attention has already been spent
- ② the real product being sold is you
- ③ your privacy is being violated
- ④ the public may be sponsoring you
- ⑤ you owe the benefits to your friend AI

3. 주어진 글 다음에 이어질 글의 순서로 가장 적절한 것은?

Darwin saw blushing as uniquely human, representing an involuntary physical reaction caused by embarrassment and self-consciousness in a social environment.

- (A) Maybe our brief loss of face benefits the long-term cohesion of the group. Interestingly, if someone blushes after making a social mistake, they are viewed in a more favourable light than those who don't blush.
- (B) If we feel awkward, embarrassed or ashamed when we are alone, we don't blush; it seems to be caused by our concern about what others are thinking of us. Studies have confirmed that simply being told you are blushing brings it on. We feel as though others can see through our skin and into our mind.
- (C) However, while we sometimes want to disappear when we involuntarily go bright red, psychologists argue that blushing actually serves a positive social purpose. When we blush, it's a signal to others that we recognize that a social norm has been broken; it is an apology for a faux pas.

| ⑤ (C) - (B) - (A) | |

4. 주어진 글 다음에 이어질 글의 순서로 가장 적절한 것은?

When two natural bodies of water stand at different levels, building a canal between them presents a complicated engineering problem.

- (A) Then the upper gates open and the ship passes through. For downstream passage, the process works the opposite way. The ship enters the lock from the upper level, and water is pumped from the lock until the ship is in line with the lower level.
- (B) When a vessel is going upstream, the upper gates stay closed as the ship enters the lock at the lower water level. The downstream gates are then closed and more water is pumped into the basin. The rising water lifts the vessel to the level of the upper body of water.
- (C) To make up for the difference in level, engineers build one or more water "steps," called locks, that carry ships or boats up or down between the two levels. A lock is an artificial water basin. It has a long rectangular shape with concrete walls and a pair of gates at each end.

| ⑤ (C) - (B) - (A) | |

5. 글의 흐름으로 보아, 주어진 문장이 들어가기에 가장 적절한 곳을 고르시오. (3점)

They might be sitting still as they imagine all of this walking back and forth along their path; but they are reliving, at least in their imagination, the movement of their feet.

Researchers are studying how our everyday physical experiences in the world contribute to our understanding of mathematical concepts. (①) The experience of walking along a path, for example, can be a metaphor for thinking about arithmetic. (②) The path starts at some point 0 and as children walk along, every step takes them 1 unit further from the starting point; they can even take half steps or skip along two steps at a time. (③) If they want to imagine what it might mean to add 5 and 9, they could think of first walking 9 steps and then walking 5 more. (④) But that also helps them think about what $14 - 3$ might mean because they can imagine walking backwards. (⑤) If they close their eyes, they might even imagine the shape of the path, the smell of the trees, and the sound that is made when they step on the dried leaves.

6. 글의 흐름으로 보아, 주어진 문장이 들어가기에 가장 적절한 곳을 고르시오. (3점)

Personal stories connect with larger narratives to generate new identities.

The growing complexity of the social dynamics determining food choices makes the job of marketers and advertisers increasingly more difficult. (①) In the past, mass production allowed for accessibility and affordability of products, as well as their wide distribution, and was accepted as a sign of progress. (②) Nowadays it is increasingly replaced by the fragmentation of consumers among smaller and smaller segments that are supposed to reflect personal preferences. (③) Everybody feels different and special and expects products serving his or her inclinations. (④) In reality, these supposedly individual preferences end up overlapping with emerging, temporary, always changing, almost tribal formations solidifying around cultural sensibilities, social identifications, political sensibilities, and dietary and health concerns. (⑤) These consumer communities go beyond national boundaries, feeding on global and widely shared repositories of ideas, images, and practices. 3점

*fragmentation: 파편화 **repository: 저장소

정답 및 해설

1. [정답] ①

[해설]

이 글은 집단적 선택에서 동점(tie) 상황이 발생했을 때, 공정성을 해치지 않고 결정하기 어려운 문제를 다룬다. 예시로 든 1:1 상황에서 결정론적 방법은 없으며, 이에 대한 해결책으로 '추첨(lotteries)'이나 '제비뽑기(drawing a lot)'를 제시한다. 이는 동점을 해결하기 위한 무작위화(randomization)나 다른 방법을 요구하는 상황을 설명하는 것이다. 따라서 빈칸에는 '무작위화나 다른 동점 해결 수단을 요구한다'는 내용이 들어가야 한다.

2. [정답] ②

[해설]

지문은 '주의력 경제(attention economy)'에 대해 설명하며, 기업들이 우리의 주의력을 사로잡아 다른 이에게 판매한다고 말한다. 빈칸은 '무료로 보이는 것에 대해 누가 돈을 내는지 알 수 없다면'이라는 조건절에 이어지는 내용이다. 이는 '실제 팔리는 상품은 바로 당신이다(the real product being sold is you)'라는, 무료 온라인 서비스의 비즈니스 모델을 지적하는 관용적인 지혜와 일맥상통한다.

3. [정답] ③

[해설]

주어진 문장은 다윈이 얼굴 붉힘을 '사회적 환경'에서 비롯된 반응으로 보았다는 내용입니다. (B)는 '혼자 있을 때는 얼굴을 붉히지 않는다'며 사회적 환경의 중요성을 부연 설명합니다. (C)는 'However'를 통해 얼굴 붉힘이 실제로는 '긍정적인 사회적 목적'을 수행한다고 역설하며, 그것이 사회적 규범 위반을 인정하는 신호라고 설명합니다. (A)는 (C)의 긍정적 기능을 구체화하여, 얼굴을 붉히는 사람이 더 호의적으로 보인다는 연구 결과를 제시하며 글을 마무리합니다. 따라서 (B)-(C)-(A) 순서가 적절합니다.

4. [정답] ⑤

[해설]

주어진 글은 수위가 다른 두 수역 사이에 운하를 건설하는 공학적 문제를 제시한다. (C)에서 그 해결책으로 'locks(갑문)'를 소개하고 그것이 무엇인지 정의한다. (B)에서 갑문의 작동 원리 중 '상류로 갈 때(going upstream)'의 과정을 설명한다. (A)에서 'Then(그리고 나서)'으로 (B)의 과정을 이어받아 상류 통과를 마무리하고, 이어서 그 반대 과정인 '하류 통과(downstream passage)'를 설명한다. 따라서 문제 제기 → 해결책 소개 → 상류 통과 과정 → 하류 통과 과정의 순서인 (C)-(B)-(A)가 가장 자연스럽다.

5. [정답] ⑤

[해설]

제시문은 '가만히 앉아 있으면서도 이 모든 앞뒤로 걷는 것을 상상한다'고 말한다. 여기서 '이 모든 앞뒤로 걷는 것(all of this walking back and forth)'은 바로 앞의 ③(더하기를 위한 앞으로 걷기)과 ④(빼기를 위한 뒤로 걷기)에서 묘사된 상상 속의 행동을 요약해서 지칭한다. 제시문은 이 상상 행위가 물리적으로는 정지 상태에서 일어나지만, 마음속으로는 실제 움직임을 재현하는 것임을 설명한다. 그 뒤 ⑤번 다음 문장 'If they close their eyes...'는 이 상상 행위가 시각적, 후각적, 청각적 감각으로까지 확장되는 것을 보여준다. 따라서 구체적인 연산 상상(③,④)과 감각적 상상의 확장(⑤ 뒤) 사이를 연결하며 상상 행위의 본질을 설명하는 제시문은 ⑤에 위치하는 것이 가장 논리적이다.

6. [정답] ⑤

[해설]

주어진 문장은 '개인적인 이야기(Personal stories)'가 '더 큰 서사(larger narratives)'와 연결되어 '새로운 정체성(new identities)'을 생성한다고 설명한다. (④)에서는 개인적 선호가 결국 문화적 감수성 등을 중심으로 뭉치는 '부족적 형성체(tribal formations)'와 겹쳐진다고 말한다. (⑤) 뒤에서는 이러한 집단을 'These consumer communities'라는 말로 지칭한다. 개인적 선호(personal stories)가 부족적 형성체(larger narratives)를 거쳐 소비자 공동체(new identities)로 형성되는 과정을 설명하는 흐름에서, 주어진 문장은 (④)의 부족 형성 과정과 (⑤)의 소비자 공동체라는 결과 사이에 위치하여 그 연결고리 역할을 하는 것이 가장 자연스럽다. 즉, 개인의 이야기가 더 큰 집단의 이야기와 결합하여 새로운 정체성인 '소비자 공동체'를 만들어낸다는 논리적 흐름이 완성된다.
