

2027학년도 수능 대비 모의평가

1. 다음 빈칸에 들어갈 말로 가장 적절한 것을 고르시오.

Precision and determinacy are a necessary requirement for all meaningful scientific debate, and progress in the sciences is, to a large extent, the ongoing process of achieving ever greater precision. But historical representation puts a premium on a proliferation of representations, hence not on the refinement of one representation but on the production of an ever more varied set of representations. Historical insight is not a matter of a continuous "narrowing down" of previous options, not of an approximation of the truth, but, on the contrary, is an "explosion" of possible points of view. It therefore aims at the unmasking of previous illusions of determinacy and precision by the production of new and alternative representations, rather than at achieving truth by a careful analysis of what was right and wrong in those previous representations. And from this perspective, the development of historical insight may indeed be regarded by the outsider as a process of creating ever more confusion, a continuous questioning of _____, rather than, as in the sciences, an ever greater approximation to the truth.

- ① criteria for evaluating historical representations
- ② certainty and precision seemingly achieved already
- ③ possibilities of alternative interpretations of an event
- ④ coexistence of multiple viewpoints in historical writing
- ⑤ correctness and reliability of historical evidence collected

2. 다음 빈칸에 들어갈 말로 가장 적절한 것을 고르시오.

Emma Brindley has investigated the responses of European robins to the songs of neighbors and strangers. Despite the large and complex song repertoire of European robins, they were able to discriminate between the songs of neighbors and strangers. When they heard a tape recording of a stranger, they began to sing sooner, sang more songs, and overlapped their songs with the playback more often than they did on hearing a neighbor's song. As Brindley suggests, the overlapping of song may be an aggressive response. However, this difference in responding to neighbor versus stranger occurred only when the neighbor's song was played by a loudspeaker placed at the boundary between that neighbor's territory and the territory of the bird being tested. If the same neighbor's song was played at another boundary, one separating the territory of the test subject from another neighbor, it was treated as the call of a stranger. Not only does this result demonstrate that , but it also shows that the choice of songs used in playback experiments is highly important.

- ① variety and complexity characterize the robins' songs
- ② song volume affects the robins' aggressive behavior
- ③ the robins' poor territorial sense is a key to survival
- ④ the robins associate locality with familiar songs
- ⑤ the robins are less responsive to recorded songs

3. 주어진 글 다음에 이어질 글의 순서로 가장 적절한 것은?

Watch the birds in your backyard. If one bird startles and flies off, others will follow, not waiting around to assess whether the threat is real. They have been infected by emotional contagion.

- (A) Marc wondered whether the birds in line were more fearful because they didn't know what their flockmates were doing. Emotional contagion would have been impossible for individual grosbeaks in the linear array except with their nearest neighbors.
- (B) In a longterm research project that Marc did with some of his students on patterns of antipredatory scanning by western evening grosbeaks, they found that birds in a circle showed more coordination in scanning than did birds who were feeding in a line.
- (C) The birds in a line, who could only see their nearest neighbor, not only were less coordinated when scanning, but also were more nervous, changing their body and head positions significantly more than grosbeaks in a circle, where it was possible for each grosbeak to see every other grosbeak.

4. 주어진 글 다음에 이어질 글의 순서로 가장 적절한 것은?

Recently, a number of commercial ventures have been launched that offer social robots as personal home assistants, perhaps eventually to rival existing smart-home assistants.

- (A) They might be motorized and can track the user around the room, giving the impression of being aware of the people in the environment. Although personal robotic assistants provide services similar to those of smart-home assistants, their social presence offers an opportunity that is unique to social robots.
- (B) Personal robotic assistants are devices that have no physical manipulation or locomotion capabilities. Instead, they have a distinct social presence and have visual features suggestive of their ability to interact socially, such as eyes, ears, or a mouth.
- (C) For instance, in addition to playing music, a social personal assistant robot would express its engagement with the music so that users would feel like they are listening to the music together with the robot. These robots can be used as surveillance devices, act as communicative intermediates, engage in richer games, tell stories, or be used to provide encouragement or incentives. 3점

5. 글의 흐름으로 보아, 주어진 문장이 들어가기에 가장 적절한 곳을 고르시오. (3점)

As a result, they are fit and grow better, but they aren't particularly long-lived.

When trees grow together, nutrients and water can be optimally divided among them all so that each tree can grow into the best tree it can be. If you "help" individual trees by getting rid of their supposed competition, the remaining trees are bereft. They send messages out to their neighbors unsuccessfully, because nothing remains but stumps. Every tree now grows on its own, giving rise to great differences in productivity. (①) Some individuals photosynthesize like mad until sugar positively bubbles along their trunk. (②) This is because a tree can be only as strong as the forest that surrounds it. (③) And there are now a lot of losers in the forest. (④) Weaker members, who would once have been supported by the stronger ones, suddenly fall behind. (⑤) Whether the reason for their decline is their location and lack of nutrients, a passing sickness, or genetic makeup, they now fall prey to insects and fungi.

6. 글의 흐름으로 보아, 주어진 문장이 들어가기에 가장 적절한 곳을 고르시오.

Instead, much like the young child learning how to play 'nicely', the apprentice scientist gains his or her understanding of the moral values inherent in the role by absorption from their colleagues' socialization.

As particular practices are repeated over time and become more widely shared, the values that they embody are reinforced and reproduced and we speak of them as becoming 'institutionalized'. (①) In some cases, this institutionalization has a formal face to it, with rules and protocols written down, and specialized roles created to ensure that procedures are followed correctly. (②) The main institutions of state — parliament, courts, police and so on — along with certain of the professions, exhibit this formal character. (③) Other social institutions, perhaps the majority, are not like this; science is an example. (④) Although scientists are trained in the substantive content of their discipline, they are not formally instructed in 'how to be a good scientist'. (⑤) We think that these values, along with the values that inform many of the professions, are under threat, just as the value of the professions themselves is under threat.

정답 및 해설

1. [정답] ②

[해설]

이 글은 과학과 역사를 대조한다. 과학은 정확성을 향한 '수렴' 과정인 반면, 역사적 통찰은 다양한 관점의 '폭발'이며, 이전의 결정성과 정확성에 대한 환상을 폭로하는(unmasking of previous illusions of determinacy and precision) 과정이라고 설명한다. 따라서 외부인의 관점에서 역사학의 발전은 진리에 근접하는 것이 아니라, '이미 달성된 것처럼 보이는 확실성과 정확성(certainty and precision seemingly achieved already)'에 대해 끊임없이 의문을 제기하는 과정으로 보일 수 있다.

2. [정답] ④

[해설]

실험 결과, 울새는 이웃의 노래 소리가 익숙한 경계(장소)에서 들릴 때만 이웃으로 인식하고, 같은 노래라도 다른 경계에서 들리면 낯선 새로 취급했다. 이는 울새가 '익숙한 노래를 특정 장소와 연관 짓는다(associate locality with familiar songs)'는 것을 보여준다.

3. [정답] ③

[해설]

주어진 글은 새들의 '정서적 전염(emotional contagion)' 현상을 소개한다. (B)에서 이 현상을 탐구하는 구체적인 연구(원형 대형과 선형 대형의 새들 비교)를 제시한다. (C)는 (B)의 연구 결과를 상세히 설명하며, 선형 대형의 새들이 서로를 잘 볼 수 없어 더 불안해했다고 밝힌다. (A)는 (C)의 결과에 대한 연구자 Marc의 추론, 즉 선형 대형에서는 정서적 전염이 어려웠을 것이라는 결론을 내리며 글을 마무리한다. 따라서 (B)-(C)-(A)의 순서가 가장 논리적이다.

4. [정답] ②

[해설]

주어진 문장은 '소셜 로봇'을 개인용 홈 어시스턴트로 소개한다. (B)는 이 'Personal robotic assistants'가 무엇인지 정의하고 그 특징(물리적 조작 능력 없음, 사회적 존재감, 시각적 특징)을 설명하며 글을 시작한다. (A)는 (B)에서 정의된 로봇을 'They'로 받아 움직일 수도 있고 사용자를 따라다닐 수 있다는 추가적인 특징을 설명하며, 이들의 'social presence'가 독특한 기회를 제공한다고 말한다. (C)는 'For instance'를 사용하여 (A)의 마지막에서 언급된 '독특한 기회'에 대한 구체적인 예시(음악에 대한 감정 표현 등)를 제시하며 내용을 구체화한다. 따라서 (B)-(A)-(C)의 순서가 가장 논리적이다.

5. [정답] ②

[해설]

주어진 문장은 '그 결과(As a result)' 나무들이 잘 자라지만 수명이 길지 않다는 내용입니다. ②번 앞 문장은 일부 나무들이 미친 듯이 광합성을 하며 매우 빠르게 성장하는 상황을 묘사하는데, 이것이 주어진 문장의 원인이 됩니다. ②번 뒷 문장은 '나무는 자신을 둘러싼 숲만큼만 강할 수 있기 때문이다'라고 말하며, 왜 그 나무들이 오래 살지 못하는지에 대한 이유를 설명합니다. 따라서 개별 나무의 폭발적 성장(원인), 그로 인한 단명(결과), 그리고 그 이유 설명의 논리적 흐름상 ②가 가장 적절한 위치입니다.

6. [정답] ④

[해설]

주어진 문장은 'Instead(대신에)'로 시작하며, 견습 과학자가 동료로부터 사회화를 통해 도덕적 가치를 흡수한다고 설명합니다. 이는 공식적인 교육 방식이 아님을 암시합니다. ④번 앞 문장은 과학자들이 '좋은 과학자가 되는 법'에 대해 공식적으로 교육받지 않는다고 말합니다. 이 내용이 주어진 문장의 비 공식적 학습 방식(사회화)과 'Instead'를 통해 자연스럽게 연결되므로, ④가 가장 적절한 위치입니다.
