When trying to establish what is meant by digital preservation, the first question that must be addressed is: what are you actually trying to preserve? This is clear in the analog environment where the information content is inextricably fixed to the physical medium. In the digital environment, the medium is not part of the _____. A bit stream looks the same to a computer regardless of the media it is read from. A physical carrier is necessary, but as long as the source media can be read, bit-perfect copies can be made cheaply and easily on other devices, making the preservation of the original carrier of diminishing importance. As the physical media that carry digital information are quite delicate relative to most analog media, it is expected that digital information will necessarily need to be migrated from one physical carrier to another as part of the ongoing preservation process. It is not the media itself but the information on the media that needs to be preserved.

There is something deeply paradoxical about the professional status of sports journalism, especially in the medium of print. In discharging their usual responsibilities of description and commentary, reporters' accounts of sports events are eagerly consulted by sports fans, while in their broader journalistic role of covering sport in its many forms, sports journalists are among the most visible of all contemporary writers. The ruminations of the elite class of 'celebrity' sports journalists are much sought after by the major newspapers, their lucrative contracts being the envy of colleagues in other 'disciplines' of journalism. Yet sports journalists do not have a standing in their profession that corresponds to the size of their readerships or of their pay packets, with the old saying (now reaching the status of cliché) that sport is the 'toy department of the news media' still readily to hand as a dismissal of the worth of what sports journalists do. This reluctance to take sports journalism seriously produces the paradoxical outcome that sports newspaper writers are much read but little _____.

There are a number of human resource management practices that are necessary to support organizational learning.

- (A) Their role should be to assist, consult, and advise teams on how best to approach learning. They must be able to develop new mechanisms for cross-training peers team members and new systems for capturing and sharing information. To do this, human resource development professionals must be able to think systematically and understand how to promote learning within groups and across the organization.
- (B) For example, performance evaluation and reward systems that reinforce long-term performance and the development and sharing of new skills and knowledge are particularly important. In addition, the human resource development function may be dramatically changed to keep the emphasis on continuous learning.
- (C) In a learning organization, every employee must take the responsibility for acquiring and transferring knowledge. Formal training programs, developed in advance and delivered according to a preset schedule, are insufficient to address shifting training needs and encourage timely information sharing. Rather, human resource development professionals must become learning facilitators. 3점

A firm is deciding whether to invest in shipbuilding. If it can produce at sufficiently large scale, it knows the venture will be profitable.

- (A) There is a "good" outcome, in which both types of investments are made, and both the shipyard and the steelmakers end up profitable and happy. Equilibrium is reached. Then there is a "bad" outcome, in which neither type of investment is made. This second outcome also is an equilibrium because the decisions not to invest reinforce each other.
- (B) Assume that shipyards are the only potential customers of steel. Steel producers figure they'll make money if there's a shipyard to buy their steel, but not otherwise. Now we have two possible outcomes what economists call "multiple equilibria."
- (C) But one key input is low-cost steel, and it must be produced nearby. The company's decision boils down to this: if there is a steel factory close by, invest in shipbuilding; otherwise, don't invest. Now consider the thinking of potential steel investors in the region.

If not, the robot might endlessly chase itself rather than the blocks.

People involved in the conception and engineering of robots designed to perceive and act know how fundamental is the ability to discriminate oneself from other entities in the environment. Without such an ability, no goal-oriented action would be possible. (①) Imagine that you have to build a robot able to search for blocks scattered in a room in order to pile them. (②) Even this simple task would require that your machine be able to discriminate between stimulation that originates from its own machinery and stimulation that originates from the blocks in the environment. (③) Suppose that you equip your robot with an artificial eye and an artificial arm to detect, grab, and pile the blocks. (④) To be successful, your machine will have to have some built-in system enabling it to discriminate between the detection of a block and the detection of its own arm. (⑤) Your robot would engage in circular, self-centered acts that would drive it away from the target or external goal.

On top of the hurdles introduced in accessing his or her money, if a suspected fraud is detected, the account holder has to deal with the phone call asking if he or she made the suspicious transactions.

Each new wave of technology is intended to enhance user convenience, as well as improve security, but sometimes these do not necessarily go hand-in-hand. For example, the transition from magnetic stripe to embedded chip slightly slowed down transactions, sometimes frustrating customers in a hurry. (①) Make a service too burdensome, and the potential customer will go elsewhere. (②) This obstacle applies at several levels. (③) Passwords, double-key identification, and biometrics such as fingerprint-, iris-, and voice recognition are all ways of keeping the account details hidden from potential fraudsters, of keeping your data dark. (④) But they all inevitably add a burden to the use of the account. (⑤) This is all useful at some level indeed, it can be reassuring knowing that your bank is keeping alert to protect you but it becomes tiresome if too many such calls are received.

글은 아날로그와 디지털 환경을 대조하며, 디지털 환경에서는 정보가 물리적 매체와 분리될 수 있다고 설명한다. 마지막 문장에서 '보존해야 할 것은 매체 자체가 아니라 매체 위의 정보'라고 강조한다. 따라서 디지털 환경에서 매체는 정보, 즉 '메시지(message)'의 일부가 아니라는 결론을 내릴 수 있다.

2. [정답] ②

이 글은 스포츠 저널리즘의 역설적인(paradoxical) 위상에 대해 다루고 있다. 스포츠 기자들은 많은 독자(large readerships)를 보유하고 높은 보수(lucrative contracts)를 받지만, 그들의 직업적 위상(standing in their profession)은 그에 미치지 못하며 '장난감 부서'라고 무시당한다고 했다. 따라서, 그들은 '많이 읽히지만(much read)' 그에 상응하는 존경을 받지 못한다는 내용이 와야 하므로 '거의 존경받지 못한다(little admired)'는 것이 가장 적절한 역설적 결론이다.

3. [정답] ③

주어진 문장에서 조직 학습을 위한 인사 관리(HRM) 관행을 소개한다. (B)는 'For example'을 통해 그 구체적인 예시(성과 평가, 보상 제도)를 들며 시작하고, 인적 자원 개발(HRD) 기능의 변화 필요성을 언급하며 끝맺는다. (C)는 기존의 공식적 훈련 프로그램이 불충분하다고 지적하며, HRD 전문가가 '학습 촉진자(learning facilitators)'가 되어야 한다는 (B)에서 언급된 변화의 방향을 구체화한다. 마지막으로 (A)는 'Their role'이라는 지시어로 (C)의 'learning facilitators'를 받아 그들의 역할을 상세히 설명한다. 따라서 (B)-(C)-(A) 순서가 가장 논리적이다.

4. [정답] ⑤

주어진 글은 조선업 투자 결정을 다룬다. (C)에서 'But one key input is low-cost steel'이라며 투자의 전제 조건을 제시하고, 잠재적 철강 투자자들의 생각으로 시점을 전환한다. (B)는 (C)에서 이어진 철강 투자자들의 입장을 구체화하며, 두 산업의 상호의존성 때문에 '복수 균형(multiple equilibria)'이라는 두 가지 결과가 가능함을 설명한다. (A)는 (B)에서 언급된 '복수 균형'의 두 가지 시나리오('good' outcome과 'bad' outcome)를 구체적으로 설명한다. 따라서 (C)-(B)-(A) 순서가 논리적이다.

The sentence preceding slot ⑤ establishes the crucial requirement for the robot: a system to 'discriminate between the detection of a block and the detection of its own arm.' The inserted sentence begins with 'If not,' directly referring to the failure to meet this requirement. It then describes a specific consequence ('chase itself'), which is then generalized and elaborated upon in the sentence that follows slot ⑤ ('engage in circular, self-centered acts').

주어진 문장은 사기 의심 거래가 탐지되었을 때 계좌 주인이 확인 전화를 받아야 하는 또 다른 장애물에 대해 이야기한다. ⑤번 앞 문장까지는 비밀번호, 생체 인식 등 계좌 사용에 부담(burden)을 더하는 보안 장치들을 열거한다. ⑤번 뒷 문장은 'it becomes tiresome if too many such calls are received(그러한 전화를 너무 많이 받으면 피곤해진다)'라고 말하는데, 여기서 'such calls(그러한 전화들)'가 가리키는 대상이 앞에는 없다. 주어진 문장에서 언급된 'the phone call'이 바로 'such calls'의 구체적인 내용이므로, 주어진 문장은 ⑤번에 들어가야 논리적 흐름이 완성된다.
