News, especially in its televised form, is constituted not only by its choice of topics and stories but by its _____. Presentational styles have been subject to a tension between an informational-educational purpose and the need to engage us entertainingly. While current affairs programmes are often 'serious' in tone sticking to the 'rules' of balance, more popular programmes adopt a friendly, lighter, idiom in which we are invited to consider the impact of particular news items from the perspective of the 'average person in the street'. Indeed, contemporary news construction has come to rely on an increased use of faster editing tempos and 'flashier' presentational styles including the use of logos, sound-bites, rapid visual cuts and the 'star quality' of news readers. Popular formats can be said to enhance understanding by engaging an audience unwilling to endure the longer verbal orientation of older news formats. However, they arguably work to reduce understanding by failing to provide the structural contexts for news events.

- ① coordination with traditional display techniques
- ② prompt and full coverage of the latest issues
- ③ educational media contents favoured by producers
- ④ commitment to long-lasting news standards
- ⑤ verbal and visual idioms or modes of address

An invention or discovery that is too far ahead of its time is worthless; no one can follow. Ideally, an innovation opens up only the next step from what is known and invites the culture to move forward one hop. An overly futuristic, unconventional, or visionary invention can fail initially (it may lack essential not-yet-invented materials or a critical market or proper understanding) yet succeed later, when the ecology of supporting ideas catches up. Gregor Mendel's 1865 theories of genetic heredity were correct but ignored for 35 years. His sharp insights were not accepted because they did not explain the problems biologists had at the time, nor did his explanation operate by known mechanisms, so his discoveries were out of reach even for the early adopters. Decades later science faced the urgent questions that Mendel's discoveries could answer. Now his insights _____. Within a few years of one another, three different scientists each independently rediscovered Mendel's forgotten work, which of course had been there all along.

- ① caught up to modern problems
- ② raised even more questions
- ③ addressed past and current topics alike
- ④ were only one step away
- ⑤ regained acceptance of the public

The intuitive ability to classify and generalize is undoubtedly a useful feature of life and research, but it carries a high cost, such as in our tendency to stereotype generalizations about people and situations.

- (A) Intuitively and quickly, we mentally sort things into groups based on what we perceive the differences between them to be, and that is the basis for stereotyping. Only afterwards do we examine (or not examine) more evidence of how things are differentiated, and the degree and significance of the variations.
- (B) Our brain performs these tasks efficiently and automatically, usually without our awareness. The real danger of stereotypes is not their inaccuracy, but their lack of flexibility and their tendency to be preserved, even when we have enough time to stop and consider.
- (C) For most people, the word stereotype arouses negative connotations: it implies a negative bias. But, in fact, stereotypes do not differ in principle from all other generalizations; generalizations about groups of people are not necessarily always negative.

According to the market response model, it is increasing prices that drive providers to search for new sources, innovators to substitute, consumers to conserve, and alternatives to emerge.

- (A) Many examples of such "green taxes" exist. Facing landfill costs, labor expenses, and related costs in the provision of garbage disposal, for example, some cities have required households to dispose of all waste in special trash bags, purchased by consumers themselves, and often costing a dollar or more each.
- (B) Taxing certain goods or services, and so increasing prices, should result in either decreased use of these resources or creative innovation of new sources or options. The money raised through the tax can be used directly by the government either to supply services or to search for alternatives.
- (C) The results have been greatly increased recycling and more careful attention by consumers to packaging and waste. By internalizing the costs of trash to consumers, there has been an observed decrease in the flow of garbage from households.

Sometimes these internal narratives we form not only shape our beliefs and opinions but also become deeply rooted in our identity.

While stories clearly dominate statistics from both memorability and persuasiveness perspectives, it's rarely a battle between facts and anecdotes or even facts and other facts. The real clash is actually between stories: the predominant incumbent and a new challenger. (①) As storytelling creatures, we routinely form narratives to help us understand the world around us. (②) When we experience different events or encounter various facts, our minds seek to make sense of them by forming stories around them. (③) For example, if you have had some bad experiences with graduates from a particular university, you may create a negative narrative in your mind about people who went to that school. (④) Suddenly, you judge everyone from the university by what you've experienced on just a few unfortunate occasions. (⑤) For example, the narratives you have formed around gun control or climate change are most likely related with your political ideology who you are as an individual.

This is particularly true since one aspect of sleep is decreased responsiveness to the environment.

The role that sleep plays in evolution is still under study. (①) One possibility is that it is an advantageous adaptive state of decreased metabolism for an animal when there are no more pressing activities. (②) This seems true for deeper states of inactivity such as hibernation during the winter when there are few food supplies, and a high metabolic cost to maintaining adequate temperature. (③) It may be true in daily situations as well, for instance for a prey species to avoid predators after dark. (④) On the other hand, the apparent universality of sleep, and the observation that mammals such as cetaceans have developed such highly complex mechanisms to preserve sleep on at least one side of the brain at a time, suggests that sleep additionally provides some vital service(s) for the organism. (⑤) If sleep is universal even when this potential price must be paid, the implication may be that it has important functions that cannot be obtained just by quiet, wakeful resting.

이 글은 뉴스가 주제 선택뿐만 아니라 빈칸에 의해서도 구성된다고 말한다. 이어지는 내용은 '제시 스타일(Presentational styles)', '친근하고 가벼운 표현 방식(friendly, lighter, idiom)', '더 빠른 편집 속도와 더 현란한 제시 스타일(faster editing tempos and 'flashier' presentational styles)' 등 뉴스를 전달하는 방식을 구체적으로 설명한다. 이러한 예시들을 포괄하는 개념은 '언어적, 시각적 표현 방식 또는 전달 방식(verbal and visual idioms or modes of address)'이다.

멘델의 발견은 당대에는 너무 시대를 앞서가 'out of reach'(도달할 수 없는) 상태였지만, 수십 년 후 과학계가 그의 발견으로 답할 수 있는 질문에 직면하게 되었다. 즉, 시대적 배경이 멘델의 이론을 따라잡아 그 간극이 좁혀졌다는 의미이다. 이상적인 혁신이 'only the next step'을 열어준다고 서두에 언급한 것과 연결하여, 이제 그의 통찰력은 당대 과학자들이 이해할 수 있는 '불과 한 걸음 거리에(were only one step away)' 있게 되었다고 추론할 수 있다.

3. [정답] ④

주어진 글에서 'stereotype'을 언급한 후, (C)에서 'stereotype'이라는 단어의 일반적인 부정적 함축을 설명하고 사실은 모든 일반화와 원칙적으로 다르지 않다고 개념을 정의한다. (A)는 (C)에서 정의한 고정관념이 형성되는 과정('mentally sort things into groups')을 설명한다. (B)는 (A)에서 설명한 과정이 뇌에서 자동적으로 일어나며, 진짜 위험은 부정확성이 아니라 유연성 부족에 있다고 결론짓는다. 따라서 (C)-(A)-(B) 순서가 가장 자연스럽다.

4. [정답] ②

주어진 글은 가격 상승이 대안 모색을 유도한다는 '시장 반응 모델'을 소개한다. (B)는 이에 대한 한 가지 방법으로 특정 상품에 '세금을 부과하여(Taxing)' 가격을 올리는 것을 제시하며 일반적인 원리를 설명한다. (A)는 (B)에서 언급한 세금의 구체적인 예시로 '그러한 녹색세(such "green taxes")'를 들며, 쓰레기봉투 구매 사례를 제시한다. (C)는 (A)에서 제시된 사례의 '결과(The results)'로 재활용이 증가했음을 설명하며 마무리한다. 따라서 논리적 흐름은 (B) - (A) - (C) 이다.

5. [정답] ⑤

주어진 문장은 우리가 만드는 내적 서사가 우리의 신념과 의견을 형성할 뿐만 아니라 '정체성(identity)'에 깊이 뿌리내리게 된다는 내용이다. 글의 전반부는 서사가 신념과 의견을 만드는 과정을 특정 대학 졸업생에 대한 부정적 서사 형성의 예시를 통해 설명한다. ⑤번 뒤의 문장은 총기 규제나 기후 변화에 대한 서사가 개인의 정치적 이념, 즉 '개인으로서의 당신이 누구인가(who you are as an individual)'와 관련이 있다고 설명한다. 이는 '정체성'의 구체적인 예시이므로, 주어진 문장은 일반적인 진술로서 ⑤번 위치에 들어가 예시 문장을 이끌어주는 것이 가장 자연스럽다.

6. [정답] ⑤

주어진 문장은 '이것은 특히 사실이다'로 시작하며, 수면의 한 측면이 환경에 대한 반응성 감소(잠재적 위험)임을 설명한다. ⑤ 앞 문장은 수면이 매우 중요하고 필수적인 서비스를 제공함을 시사한다. ⑤ 다음 문장은 '이러한 잠재적 대가(this potential price)'를 치르면서까지 수면이 보편적이라면, 중요한 기능이 있을 것이라고 말한다. 여기서 'this potential price'가 가리키는 내용이 바로 주어진 문장의 'decreased responsiveness to the environment'이다. 따라서 주어진 문장은 'this potential price'라는 어구가 나오기 직전인 ⑤에 위치해야 문맥이 자연스럽게 연결된다.
