

2027학년도 수능 대비 모의평가

1. (A), (B), (C)의 각 네모 안에서 어법에 맞는 표현으로 가장 적절한 것은?

More than a billion people in the developing world (A) need / needs glasses. But opticians aren't exactly on every block in sub-Saharan Africa. In some places the ratio is one to one million residents. Pondering this problem, Oxford University physics professor Joshua Silver came up with a brilliantly simple solution: a pair of eyeglasses (B) what / which the wearer can adjust. Silicone oil is injected into a gap between two sheets of plastic until the lens provides sharp vision. As director of the new nonprofit Center for Vision in the Developing World, Silver envisions a billion pairs on needy eyes by 2020. So far, 30,000 pairs are in use in Africa and eastern Europe, two-thirds (C) distributed / distributing through U.S. military aid programs.

- ① needs what distributed
- ② needs what distributing
- ③ need what distributing
- ④ need which distributing
- ⑤ need which distributed

2. 다음 글의 밑줄 친 부분 중, 어법상 틀린 것은?

If there's one thing koalas are good at, it's sleeping. For a long time many scientists suspected that koalas were so lethargic ① because the compounds in eucalyptus leaves kept the cute little animals in a drugged-out state. But more recent research has shown that the leaves are simply so low in nutrients ② that koalas have almost no energy. Therefore they tend to move as little as possible — and when they ③ do move, they often look as though they're in slow motion. They rest sixteen to eighteen hours a day and spend most of that unconscious. In fact, koalas spend little time thinking; their brains actually appear to ④ have shrunk over the last few centuries. The koala is the only known animal ⑤ its brain only fills half of its skull.

*lethargic 무기력한 **drugged-out 몽롱한, 취한

3. 다음 글의 밑줄 친 부분 중, 어법상 틀린 것은?

A robot made in Japan can perform a journalist's tasks on its own by exploring its environment, determining ① what is relevant, and taking pictures with its built-in camera. It can even interview nearby people and perform Internet searches ② to improve its understanding. However, having a robot report news is not a new idea. Another robot called Stats Monkey can automatically use statistics to report sports news that ③ reads like it was written by a journalist. Furthermore, Australian scientist Ross Dawson points to News At Seven, a system ④ is developed by Northwestern University that automatically creates a virtual news show. ⑤ Using the resources available on the web, the system retrieves relevant images and blogs with comments on the topics to develop the text of the news stories.

정답 및 해설

1. [정답] ⑤

[해설]

(A) 주어가 'More than a billion people'로 복수이므로 동사는 need가 맞습니다. (B) 선행사 a pair of eyeglasses를 수식하고, 뒤 문장에서 adjust의 목적어가 빠진 불완전한 문장이 오므로 목적격 관계대명사 which가 적절합니다. (C) '3분의 2가 분배되었다'는 의미로, 주어인 two-thirds와 동사 distribute의 관계가 수동이므로 과거분사 distributed가 맞습니다. 이는 (and) two-thirds (are) distributed...에서 접속사와 be동사가 생략된 분사구문으로 볼 수 있습니다.

2. [정답] ⑤

[해설]

⑤번은 'The koala is the only known animal'이라는 주절과 'its brain only fills half of its skull'이라는 절을 연결해야 합니다. 두 개의 절을 연결하기 위해서는 접속사나 관계사가 필요합니다. 선행사 animal과 뒤의 명사 brain의 관계가 소유격이므로, 소유격 관계대명사 'whose'를 사용하여 'whose brain only fills...'로 만들어야 합니다.

3. [정답] ④

[해설]

④번이 포함된 문장의 동사는 points to입니다. 'a system'은 News At Seven과 동격으로, 뒤따르는 어구는 a system을 수식해야 합니다. a system 뒤에 동사 is가 오면 한 문장에 동사가 두 개가 되어 어법상 틀립니다. 이 시스템이 '개발된' 것이라는 수동의 의미를 나타내려면 과거분사 'developed'로 시작하는 분사구가 되어야 합니다. (a system developed by...)
