

2027학년도 수능 대비 모의평가

1. 다음 글의 밑줄 친 부분 중, 어법상 틀린 것은?

By noticing the relation between their own actions and resultant external changes, infants develop self-efficacy, a sense ① that they are agents of the perceived changes. Although infants can notice the effect of their behavior on the physical environment, it is in early social interactions that infants most ② readily perceive the consequence of their actions. People have perceptual characteristics that virtually ③ assure that infants will orient toward them. They have visually contrasting and moving faces. They produce sound, provide touch, and have interesting smells. In addition, people engage with infants by exaggerating their facial expressions and inflecting their voices in ways that infants find ④ fascinated. But most importantly, these antics are responsive to infants' vocalizations, facial expressions, and gestures; people vary the pace and level of their behavior in response to infant actions. Consequentially, early social interactions provide a context ⑤ where infants can easily notice the effect of their behavior.

*inflect: (음성을) 조절하다 **antics: 익살스러운 행동

2. 다음 글의 밑줄 친 부분 중, 어법상 틀린 것은?

There are questions we can ask about the origin of the universe, not all of ① them can be answered by science. Scientists can answer when and how the universe began, but cannot calculate the reason why it began, for example. That type of question must be explored through philosophy, religion, and other ways of thinking. The questions that scientists ② ask must be testable. Scientists have provided answers to testable questions that have helped us ③ calculate the age of the universe: like how distant are certain stars and how fast are they receding from us. Whether or not we can get a definitive answer, we can be confident in the process by which the explanations were developed, allowing us ④ to rely on the knowledge that is produced through the process of science. Someday we may find evidence to help us understand why the universe was created, but for the time being science will limit ⑤ itself to the last 13.7 or so billion years of phenomenon to investigate.

3. (A), (B), (C)의 각 네모 안에서 어법에 맞는 표현으로 가장 적절한 것은?

We spend an excessive amount of time browsing the Web every day. As a company's executive put it, "Many users probably spend more time on the Internet than they (A) do / are in their cars." Yet many of us barely notice what browser we're using. We tend to hold on to whatever comes loaded on our computer, as long as it allows us to check our email and do a little shopping. We live and work within a browser, and it doesn't matter (B) whichever / however browser it may be. As long as it gets the job done, it will be right. But for the companies (C) concerning / concerned, things are different. They are trying every effort to come up with the best browser with security and stability.

- ① do however concerning
- ② do whichever concerned
- ③ do whichever concerning
- ④ are however concerned
- ⑤ are however concerning

정답 및 해설

1. [정답] ④

[해설]

④번은 5형식 동사 'find'의 목적격 보어 자리입니다. 목적어인 ways가 유아들을 '매료시키는' 것이므로, 능동의 의미를 가진 현재분사 'fascinating'이 와야 합니다. 'fascinated'는 감정을 느끼는 주체를 수식할 때 사용됩니다.

2. [정답] ①

[해설]

①번은 두 개의 절(There are questions~, not all of them~)을 연결하는 역할을 해야 한다. 콤마(,)만으로는 두 절을 연결할 수 없으므로 접속사가 필요하다. 따라서 접속사 and를 추가하여 'and not all of them'으로 쓰거나, 접속사 기능을 포함하는 관계대명사를 사용하여 'not all of which'로 써야 한다.

② ask는 주격 관계대명사 that의 선행사인 The questions에 연결되는 동사이다. (The questions that scientists ask) ③ calculate는 사역동사 help의 목적격 보어로 동사원형 또는 to부정사가 올 수 있다.

④ to rely는 5형식 동사 allow의 목적격 보어이다. ⑤ itself는 주어 science와 목적어가 동일하므로 사용된 재귀대명사이다.

3. [정답] ②

[해설]

(A) 앞선 일반동사 spend를 대신하는 대동사 do가 적절합니다. (B) 뒤따르는 명사 browser를 수식하며 '어떤 브라우저이든'이라는 의미의 양보 부사절을 이끄는 복합관계형용사 whichever가 맞습니다. however는 부사나 형용사를 수식합니다. (C) 뒤에서 a company를 수식하며 '관련된'이라는 수동의 의미를 나타내므로 과거분사 concerned가 적절합니다.
