

2027학년도 수능 대비 모의평가

1. 다음 글의 밑줄 친 부분 중, 어법상 틀린 것은?

Whenever I look into my daughter Emily's face, I think about the power of fatherhood. Her face reminds me ① that I have given her more than just my name. Like me, she has freckles stretching across the bridge of her nose almost like a BandAid. The skin around her eyes ② form small and thin lines, and the lines match mine. "When Emily smiles," my mother tells me, "she looks just like you." Other things in her are reflections of me. I see myself most ③ clearly in her eyes, the windows to her soul. Like me, Emily has a drive ④ to succeed and will try anything. "Who needs to wait for instructions?" she used to tell ⑤ herself as she attempted to do the high bar in gymnastics class; more than once, she failed. Also, more than once, she succeeded.

*high bar: (체조의) 철봉

2. 다음 글의 밑줄 친 부분 중, 어법상 틀린 것은?

How can one measure human flourishing? Economists and others committed to welfare measure that value, of course, in terms of resources. For welfarists, human welfare is a matter of satisfying subjective individual preferences, ① revealed through exchange transactions. In recent years, Amartya Sen has developed an alternative approach to ② measuring well-being, one that does not focus on resources. Sens insight is that flourishing is a matter of ③ what a person is able to do rather than what he has. That is, the well-lived life should ④ be measured by a persons capabilities rather than by a persons possessions or by the satisfaction of his subjective preferences. What a person actually does with his capabilities ⑤ are up to him, but his life simply cannot go well unless he at least possesses certain essential capabilities.

3. 다음 글의 밑줄 친 부분 중, 어법상 틀린 것은?

Ranks are standards that often confer rewards on people and things of higher rank, and sometimes penalties on those of lower rank. For example, grade A butter will ① likely command a higher price than grade B, and persons with more formal education will be likely to command greater incomes than those with less. Nor ② are the rewards associated with ranks confined to the monetary sphere. Those persons with higher ranks may be ③ given the opportunity to make more important decisions (such as higher-ranking persons in the military, government, or corporations), while things of higher rank may be esteemed as art objects (e.g., excellence in industrial design). Of note, ranks are frequently contested. Some ranks are widely accepted and used, while ④ others are subject to continued heated debate. But even the most well-established rankings can be challenged by those ⑤ who standpoint differs from the commonly accepted one.
