

2027학년도 수능 대비 모의평가

1. 다음 글의 밑줄 친 부분 중, 어법상 틀린 것은?

Imagine a school of fish weaving through a network of pipelines at the bottom of a bay. Only instead of ① live fish searching for food, these are robots patrolling for pipe damage and pollutant leaks. Robo-fish can fit in places divers and submarines can't. The newest ② are five to eighteen inches long, have about ten parts, and cost just hundreds of dollars. These robots made of a synthetic compound ③ designed to be flexible in the tail and rigid in the midsection. The motion of the material mimics the swimming motion of a real fish. Although the latest robotic fish are pretty close to ④ making a splash, they are not yet swimming in lakes and oceans. It'll be a few more years ⑤ before you can tell the story of the robo-fish that got away.

2. 다음 글의 밑줄 친 부분 중, 어법상 틀린 것은?

Autonomy does not mean having no constraints, or being totally in control and independent of other people. That is rarely possible and hardly ever desirable. Being ① rigidly self-sufficient, or exerting unlimited control, exacts a heavy price on yourself and the people around you. Autonomy means having sufficient control and choice over the things that are important to you, and using whatever power you ② do have to change things in a positive way. When you take on a challenge, by definition you submit yourself to the demands of that responsibility. But, paradoxically, once you do ③ that you experience a surge of inner freedom. That's because the act of making the choice, of going for something, releases you to direct all your energy towards the targets and ④ frees you from ambivalence and anxiety. With the dice cast, you feel more in charge of your own destiny, better able to resist pressures from others, and more likely to judge ⑤ you by your own personal standards.

*ambivalence: 양면 가치

3. 다음 글의 밑줄 친 부분 중, 어법상 틀린 것은?

Organisms living in the deep sea have adapted to the high pressure by storing water in their bodies, some ① consisting almost entirely of water. Most deep sea organisms lack gas bladders. They are coldblooded organisms that adjust their body temperature to their environment, allowing them ② to survive in the cold water while maintaining a low metabolism. Many species lower their metabolism so much that they are able to survive without food for long periods of time, as finding the sparse food ③ that is available expends a lot of energy. Many predatory fish of the deep sea are equipped with enormous mouths and sharp teeth, enabling them to hold on to prey and overpower ④ it. Some predators hunting in the residual light zone of the ocean ⑤ has excellent visual capabilities, while others are able to create their own light to attract prey or a mating partner.

*bladder: (물고기의) 부레

정답 및 해설

1. [정답] ③

[해설]

③번이 포함된 문장은 주어가 'These robots'이고, 'made of a synthetic compound'는 주어를 수식하는 과거분사구입니다. 이 문장에는 정동사가 없으므로, 준동사 designed는 문장의 동사 역할을 할 수 없습니다. 이 로봇들이 '설계되었다'는 수동의 의미를 나타내기 위해 'are designed'가 되어야 합니다.

2. [정답] ⑤

[해설]

⑤번은 동사 judge의 주체를 묻고 있다. '당신 자신의 개인적인 기준으로 당신 자신을 판단할 가능성이 더 높다'는 의미가 되어야 하므로, 주어 you와 목적어가 동일하다. 따라서 목적격 대명사 you가 아니라 재귀대명사 yourself를 써야 한다. ① rigidly는 형용사 self-sufficient를 수식하는 부사이다. ② do는 동사 have를 강조하는 조동사이다. ③ that은 앞 문장의 내용(you submit yourself ~)을 받는 지시 대명사이다. ④ frees는 주어 the act에 연결되는 동사로 releases와 병렬 구조를 이룬다.

3. [정답] ⑤

[해설]

⑤번이 포함된 절의 주어는 'Some predators hunting in the residual light zone of the ocean'입니다. 주어의 핵심인 'Some predators'가 복수이므로, 동사는 복수형인 'have'가 되어야 합니다.
