

2027학년도 수능 대비 모의평가

1. 밑줄 친 부분이 다음 글에서 의미하는 바로 가장 적절한 것은? (3점)

In fact, scientists attributing consciousness to any animal is so recent that the internet is older. In 1976 a zoologist named Donald Griffin published *The Question of Animal Awareness*, a book arguing that animal cognition ought to be taken seriously. He and a colleague had been responsible in 1944 for discovering that bats navigate by echolocation. Now, after a lifetime spent watching those creatures, he became convinced they had inner worlds. They had flexible behavior, he said, or the ability to change their behavior as external circumstances changed, a hallmark of true intelligence. He'd watched bats develop clever techniques for finding food; they could clearly make decisions on the fly, and exhibited many of the same problem-solving abilities as humans did. Animal thought and reason ought to be seriously studied, he argued. After all, despite the flourishing of neuroscience, no one had yet found any part of the brain unique to humans that might be responsible for this hallowed "consciousness." Wasn't it time to give up the ghost?

- ① the claim that animal consciousness should be studied
- ② the belief that consciousness is a quality exclusive to humans
- ③ the illusion that animals possess truly conscious inner worlds
- ④ the idea that human cognition is superior to that of animals
- ⑤ the concept that humans and animals are essentially alike

2. 다음 글의 제목으로 가장 적절한 것은?

Before the 1950s, tourism was very much an industry which was fragmented; hotels, transport operators, travel agents, and tour operators all tended to work independently of each other. Hotels were largely in the business of selling bed nights. Airlines and railways were in the business of selling seats. Travel agents, of course, were selling travel and holidays, but in each case they tended to operate very much as individual businesses. From the mid-1950s onwards, particularly in the UK, the growth of tour operators began to change the nature of the industry from essentially individual business activities to more integrated activities. Hotels, for example, were beginning to see customers as wanting a range of services rather than simply buying accommodation. So hotels began to develop shopping arcades and later to offer secretarial centres to try to increase the spend of guests within the hotel complex. Transport operators, particularly in the airline business, saw the sale of transport services as being integral to a much wider need. Airlines offered insurance and accommodation booking for travellers.

- ③ Reduced Roles of Tour Operators in the Tourism Industry
- ④ Integration's Failure: Not Meeting Customers' Various Needs
- ⑤ New Challenges Facing Service Providers in Modern Tourism

3. 다음 글의 밑줄 친 부분 중, 어법상 틀린 것은? (3점)

Leaders come in all shapes and sizes, but successful leaders tend to have one thing in common: the ability to share someone else's feelings, known as empathy. While empathy forms in everyone to some degree, effective leaders know how to develop this emotional guidance system ①to connect with others' feelings and perspectives. However, empathy in leaders is more than ②simply being kind to employees, clients, and customers. Empathetic people seem more approachable, focusing on the words of others. Listening to the needs of employees ③enable leaders to clearly identify what makes them feel heard. Utilized in this way, empathy can be considered a crucial part of ④maintaining employee satisfaction. Leaders who are unable to surround themselves with competent employees will not be successful. Indeed, a leader's failure to empathize with talented workers is one of the main situations ⑤that could lead them to leave an organization. In this case, the organization must spend precious time and money to find suitable replacements for them.

4. 다음 글의 밑줄 친 부분 중, 문맥상 낱말의 쓰임이 적절하지 않은 것은?

Classical works by playwrights such as Shakespeare or Euripides or even American musical song lyrics contain unconventional and unrealistic methods of communicating characters' thoughts and feelings, and take a bit more skill and patience to understand. The reader must be mindful not to let the poetic form or archaic word usage get in the way of getting meaningful information about the story, but instead see the form itself as a ①revealing stylistic technique. Scripts with complex language or unfamiliar styles may require several additional readings in order for the nuance to become ②clear. Musical theater pieces are particularly difficult to visualize when reading because of the diminished emphasis on dialogue and a ③significant emphasis on song and dance. For example, when the music and lyrics are removed from a musical theater script, what is left is the dialogue, known as the book or libretto, and it can be very ④thick. There is an emphasis on dance, movement, or action in musical theater that can be ⑤time-consuming when actually performed on stage, but can take very little space when typed into a play script.

5. 다음 빈칸에 들어갈 말로 가장 적절한 것을 고르시오.

Ever since the early Enlightenment, preservation and conservation have been closely related. Taken as near synonyms, their meaning is to maintain an object or system insofar as possible in its present state, to protect it from change, usually for contemplation, research, display, and perhaps for use. Conservationists who distinguish their activities from preservation emphasize conservation's restorative aspects — restoring a historical musical instrument, for example, or a painting, or a dinosaur, or an ecosystem. Conservationists acknowledge change but try to manage it in order to prolong a(n) _____ state. Preservationists (who may nonetheless call themselves conservationists) think of themselves more as protectors. They sometimes criticize conservationists for setting an additional priority on yield or harvest or use, rather than interfering as minimally as possible in order to preserve the original object or system, as they would do. Preservationists would, for example, prefer to keep a historical musical instrument "as found" in a deteriorated state, for study, rather than to restore or repair it for display or use.

- ① desired
- ② unstable
- ③ isolated
- ④ natural
- ⑤ delicate

6. 다음 빈칸에 들어갈 말로 가장 적절한 것을 고르시오. (3점)

Speakers don't always put everything that's important to them into words. Very often you can understand a speaker's meaning by observing their nonverbal behaviors such as a change in a vocal tone or volume, eye contact, facial expressions and gestures. As it is easy to misinterpret nonverbal behavior, effective listeners verbally confirm their interpretations of someone's nonverbal communication. A question as simple as "Do your nods indicate a yes vote?" can make sure that everyone is on the same wavelength. If, as nonverbal research indicates, more than half of a speaker's meaning is conveyed nonverbally, we are missing a lot of important information if we fail to "listen" to nonverbal behavior. Even Freud suggested that "he that has eyes to see and ears to hear may convince himself that no mortal can keep a secret. If his lips are silent, he chatters with his fingertips; betrayal oozes out of him at every pore." No wonder it is difficult for most people to _____ in a face-to-face group discussion.

- ① pretend to pay attention to others
- ② conceal what they mean and feel
- ③ interpret one's nonverbal behavior
- ④ maintain the nonverbal communication
- ⑤ encounter a chance to understand others
