Non-verbal communication is not a substitute for verbal communication. Rather, it should function as a supplement, ① serving to enhance the richness of the content of the message that is being passed across. Non-verbal communication can be useful in situations ② where speaking may be impossible or inappropriate. Imagine you are in an uncomfortable position while talking to an individual. Non-verbal communication will help you ③ get the message across to him or her to give you some time off the conversation to be comfortable again. Another advantage of non-verbal communication is ④ what it offers you the opportunity to express emotions and attitudes properly. Without the aid of non-verbal communication, there are several aspects of your nature and personality that will not be adequately expressed. So, again, it does not substitute verbal communication but rather ⑤ complements it.

Despite all the hightech devices that seem to deny the need for paper, paper use in the United States ① has nearly doubled recently. We now consume more paper than ever: 400 million tons globally and growing. Paper is not the only resource ② that we are using more of. Technological advances often come with the promise of ③ using fewer materials. However, the reality is that they have historically caused more materials use, making us ④ dependently on more natural resources. The world now consumes far more "stuff" than it ever has. We use twenty seven times more industrial minerals, such as gold, copper, and rare metals, than we ⑤ did just over a century ago. We also each individually use more resources. Much of that is due to our hightech lifestyle.
