Some countries have proposed tougher guidelines for determining brain death when transplantation transferring organs to others is under consideration. In several European countries, there are legal requirements which specify ① that a whole team of doctors must agree over the diagnosis of death in the case of a potential donor. The reason for these strict regulations for diagnosing brain death in potential organ donors ② is, no doubt, to ease public fears of a premature diagnosis of brain death for the purpose of obtaining organs. But it is questionable whether these requirements reduce public suspicions as much as they create ③ them. They certainly maintain mistaken beliefs that diagnosing brain death is an unreliable process ④ lack precision. As a matter of consistency, at least, criteria for diagnosing the deaths of organ donors should be exactly the same as for those for ⑤ whom immediate burial or cremation is intended.
