Writers often give us the impression that they have described the faces of their characters, when in fact they have simply given you an outline to fill in. Of Esch, the most important character in Hermann Broch's masterpiece *The Sleepwalkers*, we learn only that he has big teeth. Even so, we don't feel as if his face is a dentate blankness. Most often, we mistake being told what effect someone's appearance has for an account of that appearance. The poet Mallarmé's advice *Peindre non la chose, mais l'effet qu'elle produit* ('Paint not the thing itself but the effect it produces') sounds like a self-denying ordinance. Actually it is a rather clever way out of an intractable problem. When, in one of his novels, Evelyn Waugh says of a new character, that 'he had just the kind of appearance one would expect a young man of his type to have' and nothing else, you still feel as if you _____.

- ① have been told exactly what he looks like
- ② have become a member of his social group
- ③ already know what will happen to him in the story
- ④ have been given precise details about his behavior
- ⑤ recognize the core characteristics of his personality

Although empathy is widely praised by scholars and public figures, not everyone is an empathy booster. Critics of empathy argue that empathy will not save us from interpersonal and intergroup conflict. In fact, they argue, empathy makes such conflicts worse. These critics maintain that empathy can be exhausting and lead to burnout, insensitivity to suffering, or worse. They argue that we tend to empathize strongly with our in-group and resist empathizing with out-groups, and even enjoy the suffering of out-groups in competitive or threatening contexts. Thus, the prescription for more empathy _____. Empathy, they argue, can further entrench conflict and force us into an us vs. them mentality. Finally, even when we try to empathize with others who are dissimilar from us or in unfamiliar contexts, sometimes we are unable to accurately empathize with their experiences, causing further misunderstandings and frustration. Critics of empathy argue that we should give up on empathy and employ other tools in pursuit of social harmony, e.g., rational compassion or moral emotions like fear, anger, and shame.

- ① underestimates the invisible conflicts possible within a group
- ② is triggered by the need for solutions to emotional conflicts
- ③ is often counterproductive in cases of conflict
- ④ functions as a facilitator in the resolution of social disharmony
- ⑤ raises questions about negative attitudes toward social disharmony

The generally close connection between health and what animals want exists because wanting to obtain the right things and wanting to avoid the wrong ones are major ways in which animals keep themselves healthy.

- (A) They can take pre-emptive action so that the worst never happens. They start to want things that will be necessary for their health and survival not for now but for some time in the future.
- (B) Animals have evolved many different ways of maintaining their health and then regaining it again once it has been damaged, such as an ability to heal wounds when they are injured and an amazingly complex immune system for warding off infection.
- (C) Animals are equally good, however, at dealing with injury and disease before they even happen. They have evolved a complex set of mechanisms for anticipating and avoiding danger altogether.

- ① (A) - (C) - (B)
- ② (B) - (A) - (C)
- ③ (B) - (C) - (A)
- ④ (C) - (A) - (B)
- ⑤ (C) - (B) - (A)

In economics, there is a principle known as the sunk cost fallacy. The idea is that when you are invested and have ownership in something, you overvalue that thing.

- (A) Sometimes, the smartest thing a person can do is quit. Although this is true, it has also become a tired and played-out argument. Sunk cost doesn't always have to be a bad thing.
- (B) This leads people to continue on paths or pursuits that should clearly be abandoned. For example, people often remain in terrible relationships simply because they've invested a great deal of themselves into them. Or someone may continue pouring money into a business that is clearly a bad idea in the market.
- (C) Actually, you can leverage this human tendency to your benefit. Like someone invests a great deal of money in a personal trainer to ensure they follow through on their commitment, you, too, can invest a great deal up front to ensure you stay on the path you want to be on.

- ① (A) - (C) - (B)
- ② (B) - (A) - (C)
- ③ (B) - (C) - (A)
- ④ (C) - (A) - (B)
- ⑤ (C) - (B) - (A)

At the next step in the argument, however, the analogy breaks down.

Misprints in a book or in any written message usually have a negative impact on the content, sometimes (literally) fatally. (①) The displacement of a comma, for instance, may be a matter of life and death. (②) Similarly most mutations have harmful consequences for the organism in which they occur, meaning that they reduce its reproductive fitness. (③) Occasionally, however, a mutation may occur that increases the fitness of the organism, just as an accidental failure to reproduce the text of the first edition might provide more accurate or updated information. (④) A favorable mutation is going to be more heavily represented in the next generation, since the organism in which it occurred will have more offspring and mutations are transmitted to the offspring. (⑤) By contrast, there is no mechanism by which a book that accidentally corrects the mistakes of the first edition will tend to sell better.

It was not until relatively recent times that scientists came to understand the relationships between the structural elements of materials and their properties.

The earliest humans had access to only a very limited number of materials, those that occur naturally: stone, wood, clay, skins, and so on. (①) With time, they discovered techniques for producing materials that had properties superior to those of the natural ones; these new materials included pottery and various metals. (②) Furthermore, it was discovered that the properties of a material could be altered by heat treatments and by the addition of other substances. (③) At this point, materials utilization was totally a selection process that involved deciding from a given, rather limited set of materials, the one best suited for an application based on its characteristics. (④) This knowledge, acquired over approximately the past 100 years, has empowered them to fashion, to a large degree, the characteristics of materials. (⑤) Thus, tens of thousands of different materials have evolved with rather specialized characteristics that meet the needs of our modern and complex society, including metals, plastics, glasses, and fibers.

글은 작가들이 인물의 외모를 직접 묘사하는 대신, 그 외모가 주는 '효과'를 전달하여 독자가 나머지를 채우게 한다고 주장한다. Evelyn Waugh의 소설에서처럼 구체적인 묘사가 전혀 없음에도 불구하고, 독자는 역설적으로 마치 '그가 어떻게 생겼는지 정확히 들은 것 같은' 느낌을 받는다는 것이다. 이는 작가가 제공한 최소한의 정보(효과)를 바탕으로 독자가 스스로 이미지를 완성하기 때문에 발생하는 현상이다.

2. [정답] ③

이 글은 공감(empathy)이 갈등을 해결하기보다 오히려 악화시킬 수 있다는 비판적 견해를 소개한다. 공감은 내집단에 편향되고, 갈등을 심화시키며, '우리 대 그들'이라는 사고방식을 강요할 수 있다고 주장한다. 따라서 '더 많은 공감을 하라'는 처방(prescription for more empathy)은 갈등 상황에서 종종 '역효과를 낳는다(is often counterproductive)'는 결론에 이를 수 있다.

3. [정답] ③

The initial statement introduces the link between desire and health. (B) first elaborates on reactive health mechanisms (healing, immune system). (C) uses 'however' to pivot from reactive to proactive mechanisms ('before they even happen'). (A) then provides a specific explanation of this 'pre-emptive action' mentioned in (C), detailing how animals anticipate future needs.

4. [정답] ②

주어진 글은 매몰 비용 오류(sunk cost fallacy)를 정의한다. (B)는 'This'로 매몰 비용 오류를 받아, 그로 인해 사람들이 포기해야 할 것을 계속하게 되는 나쁜 사례(나쁜 관계, 실패한 사업)를 설명한다. (A)는 (B)의 내용에 대한 해결책으로 '그만두는 것'을 제시하지만, 이내 '매몰 비용이 항상 나쁜 것은 아니다'라며 논지의 전환을 시도한다. (C)는 (A)에서 전환된 논지를 'Actually'로 이어받아, 매몰 비용 경향을 이롭게 활용하는 구체적인 방법(개인 트레이너에 투자)을 설명한다. 따라서 (B)-(A)-(C) 순서가 논리적으로 가장 적절하다.

5. [정답] ⑤

이 글은 책의 오타자(misprint)와 생물의 돌연변이(mutation) 사이의 유비(analogy)를 설명합니다. ③번 문장까지는 둘 다 해로울 수도, 이로울 수도 있다는 점에서 유비가 성립합니다. ④번 다음 문장은 '이로운 돌연변이'가 다음 세대로 전달되어 확산되는 과정을 설명합니다. 이것이 유비의 '다음 단계(next step)'의 한쪽 측면입니다. ⑤번 다음 문장은 '대조적으로(By contrast)'를 사용해, '오류가 수정된 책'은 그렇게 확산되는 메커니즘이 없다고 설명하며 유비가 깨지는 지점을 보여줍니다. 따라서 유비가 깨진다고 선언하는 주어진 문장은 이 두 대조적인 설명 사이에 위치하는 것이 가장 논리적입니다. 즉, 이로운 돌연변이의 운명을 설명한 후, '그러나 다음 단계에서 유비는 깨진다'고 말하고, 이어서 책의 경우를 대조적으로 설명하는 흐름이 자연스럽습니다.

6. [정답] ④

주어진 문장은 '비교적 최근에 와서야' 과학자들이 재료의 구조와 특성 간의 관계를 이해하게 되었다는 내용으로, 과학적 이해의 전환점을 나타낸다. (④) 앞 문장까지는 재료 활용이 주어진 것들 중 '선택하는 과정(a selection process)'이었다고 과거의 방식을 설명한다. (④) 뒷 문장은 'This knowledge'로 시작하는데, 이 지식은 바로 주어진 문장에서 언급된 '재료의 구조와 특성 간의 관계에 대한 이해'를 가리킨다. 이 지식을 통해 재료의 특성을 '만들어 낼(fashion)' 수 있게 되었다는 내용은 과거의 '선택' 방식과 명확한 대조를 이루므로, 주어진 문장은 (④)에 들어가는 것이 가장 적절하다.
