

2027학년도 수능 대비 모의평가

1. 다음 빈칸에 들어갈 말로 가장 적절한 것을 고르시오.

News, especially in its televised form, is constituted not only by its choice of topics and stories but by its _____. Presentational styles have been subject to a tension between an informational-educational purpose and the need to engage us entertainingly. While current affairs programmes are often 'serious' in tone sticking to the 'rules' of balance, more popular programmes adopt a friendly, lighter, idiom in which we are invited to consider the impact of particular news items from the perspective of the 'average person in the street'. Indeed, contemporary news construction has come to rely on an increased use of faster editing tempos and 'flashier' presentational styles including the use of logos, sound-bites, rapid visual cuts and the 'star quality' of news readers. Popular formats can be said to enhance understanding by engaging an audience unwilling to endure the longer verbal orientation of older news formats. However, they arguably work to reduce understanding by failing to provide the structural contexts for news events.

- ① coordination with traditional display techniques
- ② prompt and full coverage of the latest issues
- ③ educational media contents favoured by producers
- ④ commitment to long-lasting news standards
- ⑤ verbal and visual idioms or modes of address

2. 다음 빈칸에 들어갈 말로 가장 적절한 것을 고르시오.

An invention or discovery that is too far ahead of its time is worthless; no one can follow. Ideally, an innovation opens up only the next step from what is known and invites the culture to move forward one hop. An overly futuristic, unconventional, or visionary invention can fail initially (it may lack essential not-yet-invented materials or a critical market or proper understanding) yet succeed later, when the ecology of supporting ideas catches up. Gregor Mendel's 1865 theories of genetic heredity were correct but ignored for 35 years. His sharp insights were not accepted because they did not explain the problems biologists had at the time, nor did his explanation operate by known mechanisms, so his discoveries were out of reach even for the early adopters. Decades later science faced the urgent questions that Mendel's discoveries could answer. Now his insights _____. Within a few years of one another, three different scientists each independently rediscovered Mendel's forgotten work, which of course had been there all along.

- ① caught up to modern problems
- ② raised even more questions
- ③ addressed past and current topics alike
- ④ were only one step away
- ⑤ regained acceptance of the public

3. 주어진 글 다음에 이어질 글의 순서로 가장 적절한 것은?

The intuitive ability to classify and generalize is undoubtedly a useful feature of life and research, but it carries a high cost, such as in our tendency to stereotype generalizations about people and situations.

- (A) Intuitively and quickly, we mentally sort things into groups based on what we perceive the differences between them to be, and that is the basis for stereotyping. Only afterwards do we examine (or not examine) more evidence of how things are differentiated, and the degree and significance of the variations.
- (B) Our brain performs these tasks efficiently and automatically, usually without our awareness. The real danger of stereotypes is not their inaccuracy, but their lack of flexibility and their tendency to be preserved, even when we have enough time to stop and consider.
- (C) For most people, the word stereotype arouses negative connotations: it implies a negative bias. But, in fact, stereotypes do not differ in principle from all other generalizations; generalizations about groups of people are not necessarily always negative.

| ① (A) - (C) - (B) | ② (B) - (A) - (C) |
| ③ (B) - (C) - (A) | ④ (C) - (A) - (B) |
| ⑤ (C) - (B) - (A) | |

4. 주어진 글 다음에 이어질 글의 순서로 가장 적절한 것은?

According to the market response model, it is increasing prices that drive providers to search for new sources, innovators to substitute, consumers to conserve, and alternatives to emerge.

- (A) Many examples of such "green taxes" exist. Facing landfill costs, labor expenses, and related costs in the provision of garbage disposal, for example, some cities have required households to dispose of all waste in special trash bags, purchased by consumers themselves, and often costing a dollar or more each.
- (B) Taxing certain goods or services, and so increasing prices, should result in either decreased use of these resources or creative innovation of new sources or options. The money raised through the tax can be used directly by the government either to supply services or to search for alternatives.
- (C) The results have been greatly increased recycling and more careful attention by consumers to packaging and waste. By internalizing the costs of trash to consumers, there has been an observed decrease in the flow of garbage from households.

| ① (A) - (C) - (B) | ② (B) - (A) - (C) |
| ③ (B) - (C) - (A) | ④ (C) - (A) - (B) |
| ⑤ (C) - (B) - (A) | |

5. 글의 흐름으로 보아, 주어진 문장이 들어가기에 가장 적절한 곳을 고르시오.

Sometimes these internal narratives we form not only shape our beliefs and opinions but also become deeply rooted in our identity.

While stories clearly dominate statistics from both memorability and persuasiveness perspectives, it's rarely a battle between facts and anecdotes or even facts and other facts. The real clash is actually between stories: the predominant incumbent and a new challenger. (①) As storytelling creatures, we routinely form narratives to help us understand the world around us. (②) When we experience different events or encounter various facts, our minds seek to make sense of them by forming stories around them. (③) For example, if you have had some bad experiences with graduates from a particular university, you may create a negative narrative in your mind about people who went to that school. (④) Suddenly, you judge everyone from the university by what you've experienced on just a few unfortunate occasions. (⑤) For example, the narratives you have formed around gun control or climate change are most likely related with your political ideology who you are as an individual.

6. 글의 흐름으로 보아, 주어진 문장이 들어가기에 가장 적절한 곳을 고르시오. (3점)

This is particularly true since one aspect of sleep is decreased responsiveness to the environment.

The role that sleep plays in evolution is still under study. (①) One possibility is that it is an advantageous adaptive state of decreased metabolism for an animal when there are no more pressing activities. (②) This seems true for deeper states of inactivity such as hibernation during the winter when there are few food supplies, and a high metabolic cost to maintaining adequate temperature. (③) It may be true in daily situations as well, for instance for a prey species to avoid predators after dark. (④) On the other hand, the apparent universality of sleep, and the observation that mammals such as cetaceans have developed such highly complex mechanisms to preserve sleep on at least one side of the brain at a time, suggests that sleep additionally provides some vital service(s) for the organism. (⑤) If sleep is universal even when this potential price must be paid, the implication may be that it has important functions that cannot be obtained just by quiet, wakeful resting.
