

2027학년도 수능 대비 모의평가

1. 다음 글의 밑줄 친 부분 중, 어법상 틀린 것은? (3점)

In perceiving changes, we tend to regard the most recent ① ones as the most revolutionary. This is often inconsistent with the facts. Recent progress in telecommunications technologies is not more revolutionary than ② what happened in the late nineteenth century in relative terms. Moreover, in terms of the consequent economic and social changes, the Internet revolution has not been as ③ important as the washing machine and other household appliances. These things, by vastly reducing the amount of work needed for household chores, ④ allowing women to enter the labor market and virtually got rid of professions like domestic service. We should not "put the telescope backward" when we look into the past and underestimate the old and overestimate the new. This leads us ⑤ to make all sorts of wrong decisions about national economic policy, corporate policies, and our own careers.

2. (A), (B), (C)의 각 네모 안에서 어법에 맞는 표현으로 가장 적절한 것은?

When I was a young girl, my room was always a mess. My mother was always trying to get me to straighten it up, telling me, "Go clean your room!" I resisted her at every opportunity. I hated to (A) tell / be told what to do. I was determined to have my room the way I wanted it. (B) Because / Whether I actually liked living in a messy room or not was another subject altogether. I never stopped to think about the benefits of having a clean room. To me, it was more important to get my own way. And my mother, (C) alike / like most other parents, did not get me to realize the benefits for myself. Instead, she decided on lecturing.

- ① tell --- Because --- alike
- ② tell --- Whether --- like
- ③ be told --- Because --- alike
- ④ be told --- Because --- like
- ⑤ be told --- Whether --- like

3. 다음 글의 밑줄 친 부분 중, 어법상 틀린 것은?

Digital technologies are essentially related to metaphors, but digital metaphors are different from linguistic ① ones in important ways. Linguistic metaphors are passive, in the sense that the audience needs to choose to actively enter the world proposed by metaphor. In the Shakespearean metaphor "time is a beggar," the audience is unlikely to understand the metaphor without cognitive effort and without further ② engaging Shakespeare's prose. Technological metaphors, on the other hand, are active (and often imposing) in the sense that they are realized in digital artifacts that are actively doing things, forcefully ③ changing a user's meaning horizon. Technological creators cannot generally afford to require their potential audience to wonder how the metaphor works; normally the selling point is ④ what the usefulness of the technology is obvious at first glance. Shakespeare, on the other hand, is beloved in part because the meaning of his works is not immediately obvious and ⑤ requires some thought on the part of the audience.
