

2027학년도 수능 대비 모의평가

1. 다음 글의 밑줄 친 부분 중, 어법상 틀린 것은? (3점)

Accepting whatever others are communicating only pays off if their interests correspond to ours think cells in a body, bees in a beehive. As far as communication between humans is concerned, such commonality of interests ① is rarely achieved; even a pregnant mother has reasons to mistrust the chemical signals sent by her fetus. Fortunately, there are ways of making communication work even in the most adversarial of relationships. A prey can convince a predator not to chase ② it. But for such communication to occur, there must be strong guarantees ③ which those who receive the signal will be better off believing it. The messages have to be kept, on the whole, ④ honest. In the case of humans, honesty is maintained by a set of cognitive mechanisms that evaluate ⑤ communicated information. These mechanisms allow us to accept most beneficial messages to be open while rejecting most harmful messages to be vigilant. * fetus: 태아 ** adversarial: 반대자의 *** vigilant: 경계하는

Partly in response to Freud's ideas, Jean Piaget suggested that children up to the age of about seven years remain locked within a self-centered view of the world ① which he called cognitive egocentrism. This can be seen as midway between Freudian infantile autism and the fully ② socialized awareness that adults possess. Despite being able to talk, infants fail to realize that other people may perceive and know different things from ③ themselves. This means that the child does not understand itself properly as a thinking being since it has not realized that its own thoughts, perceptions, knowledge and memories ④ being dependent on its own particular experience and perspective. Only when children realize that other people can have systematically different experiences and perspectives from their own, are they able to take a perspective on their own thoughts and, one might say, ⑤ know about their own minds. autism 자폐증

3. 다음 글의 밑줄 친 부분 중, 어법상 틀린 것은?

When you create a host of positive changes, you move closer to becoming the person you want to be. If you feel successful in these changes, you will naturally view yourself differently and begin to embrace a new identity. It also has the effect of crowding out the behaviors you dont want, the ① ones no longer in line with the identity you are embracing and the person you are becoming. For example, consider a man named Sukumar, who wanted to get fit. He added more and more exercise to his routine, and certain bad habits got phased out. He took the stairs instead of the elevator because he had begun to think of himself ② as the kind of person who did that. Watching TV in the evenings changed from a habit to an occasional event because his evenings ③ were spent playing racquetball with a friend or going for a walk with his wife and their dog. Sukumar didnt exactly plan on ④ getting rid of these bad habits. But by picking up a bunch of positive habits that helped him embrace a new identity, he changed the landscape of his life so ⑤ great that many bad habits no longer fit.
