

2027학년도 수능 대비 모의평가

1. 다음 글의 밑줄 친 부분 중, 어법상 틀린 것은?

What comes to mind when we think about time? Let us go back to 4,000 B.C. in ancient China where some early clocks were invented. ① To demonstrate the idea of time to temple students, Chinese priests used to dangle a rope from the temple ceiling with knots representing the hours. They would light it with a flame from the bottom so that it burnt evenly, ② indicating the passage of time. Many temples burnt down in those days. The priests were obviously not too happy about that until someone invented a clock ③ was made of water buckets. It worked by punching holes in a large bucket ④ full of water, with markings representing the hours, to allow water to flow out at a constant rate. The temple students would then measure time by how fast the bucket drained. It was much better than burning ropes for sure, but more importantly, it taught the students ⑤ that once time was gone, it could never be recovered.

2. (A), (B), (C)의 각 네모 안에서 어법에 맞는 표현으로 가장 적절한 것은?

English speakers have one of the simplest systems for describing familial relationships. Many African language speakers would consider it absurd to use a single word like "cousin" to describe both male and female relatives, or not to distinguish whether the person (A) described / describing is related by blood to the speaker's father or to his mother. To be unable to distinguish a brother-in-law as the brother of one's wife or the husband of one's sister would seem confusing within the structure of personal relationships existing in many cultures. Similarly, how is it possible to make sense of a situation (B) which / in which a single word "uncle" applies to the brother of one's father and to the brother of one's mother? The Hawaiian language uses the same term to refer to one's father and to the father's brother. People of Northern Burma, who think in the Jinghpaw language, (C) has / have eighteen basic terms for describing their kin. Not one of them can be directly translated into English.

- ① described which have
- ② described in which has
- ③ described in which have
- ④ describing which has
- ⑤ describing in which has

3. 다음 글의 밑줄 친 부분 중, 어법상 틀린 것은?

Viewing the stress response as a resource can transform the physiology of fear into the biology of courage. It can turn a threat into a challenge and can help you ① do your best under pressure. Even when the stress doesn't feel helpful as in the case of anxiety welcoming it can transform ② it into something that is helpful: more energy, more confidence, and a greater willingness to take action. You can apply this strategy in your own life anytime you notice signs of stress. When you feel your heart beating or your breath quickening, ③ realizing that it is your body's way of trying to give you more energy. If you notice tension in your body, remind yourself ④ that the stress response gives you access to your strength. Sweaty palms? Remember what it felt like ⑤ to go on your first date palms sweat when you're close to something you want.
