

2027학년도 수능 대비 모의평가

1. 다음 글의 밑줄 친 부분 중, 어법상 틀린 것은?

Darwin himself could scarcely have found a better example of the operation of natural selection than is provided by the way the mechanism of resistance operates. Out of an original population, the members of ① which vary greatly in qualities of structure, behavior, or physiology, it is the "tough" insects that survive chemical attack. Spraying kills off the weaklings. The only survivors are insects that have some inherent quality that allows ② them to escape harm. These are the parents of the new generation, which, by simple inheritance, possesses all the qualities of "toughness" ③ inherent in its forebears. Inevitably it follows that intensive spraying with powerful chemicals only ④ make worse the problem it is designed to solve. After a few generations, instead of a mixed population of strong and weak insects, there results a population ⑤ consisting entirely of tough, resistant strains.

2. (A), (B), (C)의 각 네모 안에서 어법에 맞는 표현으로 가장 적절한 것은?

The old maxim "I'll sleep when I'm dead" is unfortunate. (A) Adopt / Adopting this mindset, and you will be dead sooner and the quality of that life will be worse. The elastic band of sleep deprivation can stretch only so far before it snaps. Sadly, human beings are in fact the only species that will deliberately deprive (B) them / themselves of sleep without legitimate gain. Every component of wellness, and countless seams of societal fabric, are being eroded by our costly state of sleep neglect: human and financial alike. So much so that the World Health Organization (WHO) has now declared a sleep loss epidemic throughout industrialized nations. It is no coincidence that countries (C) where / which sleep time has declined most dramatically over the past century, such as the US, the UK, Japan, and South Korea, and several in Western Europe, are also those suffering the greatest increase in rates of physical diseases and mental disorders.

- ① Adopt them where
- ② Adopt themselves where
- ③ Adopt themselves which
- ④ Adopting themselves which
- ⑤ Adopting them which

3. 다음 글의 밑줄 친 부분 중, 어법상 틀린 것은?

There is a reason why so many of us are attracted to recorded music these days, especially considering personal music players are common and people are listening to music through headphones a lot. Recording engineers and musicians have learned to create special effects that tickle our brains by exploiting neural circuits that evolved ① to discern important features of our auditory environment. These special effects are similar in principle to 3-D art, motion pictures, or visual illusions, none of ② which have been around long enough for our brains to have evolved special mechanisms to perceive them. Rather, 3-D art, motion pictures, and visual illusions leverage perceptual systems that ③ are in place to accomplish other things. Because they use these neural circuits in novel ways, we find them especially ④ interested. The same is true of the way ⑤ that modern recordings are made.
