

2027학년도 수능 대비 모의평가

1. 다음 글의 밑줄 친 부분 중, 어법상 틀린 것은?

Like whole individuals, cells have a life span. During their life cycle (cell cycle), cell size, shape, and metabolic activities can change dramatically. A cell is "born" as a twin when its mother cell divides, ① producing two daughter cells. Each daughter cell is smaller than the mother cell, and except for unusual cases, each grows until it becomes as large as the mother cell ② was. During this time, the cell absorbs water, sugars, amino acids, and other nutrients and assembles them into new, living protoplasm. After the cell has grown to the proper size, its metabolism shifts as it either prepares to divide or matures and ③ differentiates into a specialized cell. Both growth and development require a complex and dynamic set of interactions involving all cell parts. ④ What cell metabolism and structure should be complex would not be surprising, but actually, they are rather simple and logical. Even the most complex cell has only a small number of parts, each ⑤ responsible for a distinct, well-defined aspect of cell life.

2. 다음 글의 밑줄 친 부분 중, 어법상 틀린 것은? (3점)

Even though institutions like the World Bank use wealth ① to differentiate between "developed" and "developing" countries, they also agree that development is more than economic growth. "Development" can also include the social and environmental changes that are caused by or accompany economic growth, some of ② which are positive and thus may be negative. Awareness has grown — and continues to grow — that the question of how economic growth is affecting people and the planet ③ needs to be addressed. Countries are slowly learning that it is cheaper and causes ④ much less suffering to try to reduce the harmful effects of an economic activity or project at the beginning, when it is planned, than after the damage appears. To do this is not easy and is always imperfect. But an awareness of the need for such an effort indicates a greater understanding and moral concern than ⑤ was the previous widespread attitude that focused only on creating new products and services.

3. 다음 글의 밑줄 친 부분 중, 어법상 틀린 것은? (3점)

When it comes to medical treatment, patients see choice as both a blessing and a burden. And the burden falls primarily on women, who are ① typically the guardians not only of their own health, but that of their husbands and children. "It is an overwhelming task for women, and consumers in general, ② to be able to sort through the information they find and make decisions," says Amy Allina, program director of the National Women's Health Network. And what makes it overwhelming is not only that the decision is ours, but that the number of sources of information ③ which we are to make the decisions has exploded. It's not just a matter of listening to your doctor lay out the options and ④ making a choice. We now have encyclopedic lay-people's guides to health, "better health" magazines, and the Internet. So now the prospect of medical decisions ⑤ has become everyone's worst nightmare of a term paper assignment, with stakes infinitely higher than a grade in a course.
