

2027학년도 수능 대비 모의평가

1. 다음 글의 밑줄 친 부분 중, 어법상 틀린 것은? (3점)

Not only are humans ① unique in the sense that they began to use an everwidening tool set, we are also the only species on this planet that has constructed forms of complexity that use external energy sources. This was a fundamental new development, ② which there were no precedents in big history. This capacity may first have emerged between 1.5 and 0.5 million years ago, when humans began to control fire. From at least 50,000 years ago, some of the energy stored in air and water flows ③ was used for navigation and, much later, also for powering the first machines. Around 10,000 years ago, humans learned to cultivate plants and ④ tame animals and thus control these important matter and energy flows. Very soon, they also learned to use animal muscle power. About 250 years ago, fossil fuels began to be used on a large scale for powering machines of many different kinds, thereby ⑤ creating the virtually unlimited amounts of artificial complexity that we are familiar with today.

2. 다음 글의 밑줄 친 부분 중, 어법상 틀린 것은?

Rising eagles have the incredible ability to see mice ① move in the grass from a mile away. Similarly, cats have the amazing ability to see even in very dim light, thanks to special "reflectors" ② which are at the back of their eyes. Through natural selection over time, each species has developed a visual system uniquely adapted to ③ its way of life. Humans can see objects near and far with great sensitivity and sharpness during the day and night. Our night vision is not as ④ sharply as that of some animals, but our color vision is excellent. That is not a bad tradeoff because being able to appreciate a beautiful sunset ⑤ seems worth an occasional stumble in the dark.

3. 다음 글의 밑줄 친 부분 중, 어법상 틀린 것은? (3점)

Despite abundant warnings that we shouldn't measure ourselves against others, most of us still do. We're not only meaning-seeking creatures but social ① ones as well, constantly making interpersonal comparisons to evaluate ourselves, improve our standing, and enhance our self-esteem. But the problem with social comparison is that it often backfires. When comparing ourselves to someone who's doing better than we are, we often feel ② inadequate for not doing as well. This sometimes leads to what psychologists call malignant envy, the desire for someone ③ to meet with misfortune ("I wish she didn't have what she has"). Also, comparing ourselves with someone who's doing worse than we are ④ risk scorn, the feeling that others are something undeserving of our beneficence ("She's beneath my notice"). Then again, comparing ourselves to others can also lead to benign envy, the longing to reproduce someone else's accomplishments without wishing them ill ("I wish I had what she has"), ⑤ which has been shown in some circumstances to inspire and motivate us to increase our efforts in spite of a recent failure.

*backfire: 역효과를 내다 **scorn: 경멸

정답 및 해설

1. [정답] ②

[해설]

②번에서 관계대명사 which 뒤에 'there were no precedents in big history'라는 완전한 문장이 왔습니다. which는 불완전한 문장을 이끌어야 하므로 어법상 틀립니다. 선행사 'a fundamental new development'에 대해 '그것에 대한 선례가 없었다'는 의미이므로, 'for which'를 써서 'for which there were no precedents'(그것에 대한 선례가 없었던)로 만들어야 합니다.

2. [정답] ④

[해설]

④번은 'not as ~ as' 원급 비교 구문입니다. be동사(is)의 보어 자리이므로 부사 sharply가 아니라 형용사 sharp가 와야 합니다. Our night vision is not as sharp as... 의 구조가 되어야 합니다.

3. [정답] ④

[해설]

④번이 포함된 절의 주어는 동명사구 'comparing ourselves with someone who's doing worse than we are'입니다. 동명사 주어는 단수 취급하므로, 동사는 3인칭 단수 현재형인 'risks'가 되어야 합니다.
