

2027학년도 수능 대비 모의평가

1. 다음 글의 주제로 가장 적절한 것은? (3점)

The purpose of class discussions is to encourage you to be an active participant, not a passive recorder. Much of the emphasis in a discussion is on getting students involved in thinking, reacting, and responding. These are important intellectual activities in the learning process, for through them you are supposed to discover and express your opinions. Writing is an invaluable tool for accomplishing these tasks. Unfortunately, too many times, when class discussion begins, pens and pencils go down. Admittedly, it is considerably more difficult to take notes from discussions than from lectures, for, unlike lectures, discussions tend to be disorganized and difficult to follow. Also, students usually don't know how much of what other students are saying is important. And if you are an active participant, it is not easy to take notes and formulate what you want to say. But note taking in discussions is not only manageable, it is also important. Note taking helps to keep you active and alert; it allows you to impose some organization on the discussion; and it can prepare you to speak.

- ① reasons to standardize procedures for class discussions
- ② strategies to improve note-taking skills for public speaking
- ③ significance of note taking for active engagement in discussion
- ④ effectiveness of summarizing and reviewing notes after class
- ⑤ benefits of brainstorming to generate ideas for writing tasks

2. 다음 글의 제목으로 가장 적절한 것은?

Why would people be motivated to dislike another group when that outgroup had nothing to do with the source of their frustration and anger? One explanation that has empirical support is known as scapegoat theory. This theory suggests that when an individual becomes discouraged from a particular goal, they may feel anger, irritation, or disappointment. In general, we tend to feel negatively when something prohibits us from attaining what we want. The anger or hostility we feel toward that frustrating agent may be, in many ways, similar to the negative emotion associated with ones views of a disliked outgroup. What happens then, according to the theory, is that because both the frustrating agent and the outgroup arouse similar emotions, they tend to become associated in the individuals memory. As Berkowitz and Green suggest, There is an acquired equivalence between the frustrater and the minority group which mediates the generalization of the aggressiveresponses from the former to the latter.

- ① From Irritation to Intolerance : The Roots of Failure
- ② Chasing Shadows Instead of Facing Difficult Problems
- ③ A Misplaced Target: How Frustration Can Breed Hatred
- ④ Why Is Finding a Scapegoat Harder Than It Appears?
- ⑤ Inventing Enemies to Get Rid of Political Instability

3. 다음 글의 밑줄 친 부분 중, 어법상 틀린 것은?

We are exceptionally smart, and this helps us adapt to a wide range of environments. But we are not nearly smart enough as individuals ①to solve the adaptive problems that confronted modern humans as they spread across the globe. The package of tools, foraging techniques, ecological knowledge, and social arrangements used by any group of foragers ②being far too complex for any individual to create. We are able to learn all the things we need to know in each of the many different environments ③in which we live only because we acquire information from others. We are much better at learning from others than other species are, and we are ④motivated to learn from others even when we do not understand why our models are doing what they are doing. This psychology allows human populations to accumulate pools of adaptive information that ⑤greatly exceed the inventive capacities of individuals.

4. 다음 글의 밑줄 친 부분 중, 문맥상 낱말의 쓰임이 적절하지 않은 것은?

Although digital and (unexpectedly) vinyl revenues are now increasing, labels still struggle with the "unstable and out-of-control logic of their business." For musicians who might once have turned to record labels to help guide their path, the new terrain is ambiguous and constantly changing. Once-settled distinctions are gone. At every step in music's value chain, from inception to audience experience, inexpensive digital platforms (A) cease / continue to undo "the hard categories which characterized the old, industrialized model of music-making and consumption." Record labels are (B) less / more likely than ever to provide musicians with upfront financing, manufacturing, distribution, and publicity. Increasingly on their own, musicians are pushed toward social media in hopes that if they can just (C) connect / compete with their audiences, they might get by. This perceived need to be more social has created new anxiety. As Tim Anderson put it, "it was one thing to have no model to follow, it is another to have no goal."

5. 다음 글에서 전체 흐름과 관계 없는 문장은?

A genuine glacier must be permanent. Generally, this implies that sufficient fresh snow must accumulate during the cold months to offset melting during the summer, although on a year-to-year basis, glaciers may expand or contract, depending on local and global climatic conditions. ①Today, most glaciers around the world are melting because of the warming climate, and it appears that the rate of melting is accelerating. ②This has been documented spectacularly in places such as the Alps, where historical records have been kept and dated sketches and photographs are available to compare with the present extent of ice. ③Even over periods as short as a few decades, satellite images show that dramatic reduction of mountain glaciers has occurred in the Andes, the Himalayas, and elsewhere. ④The various rocks and minerals contained in glaciers have become a popular subject of science projects in schools. ⑤It is estimated that many small mountain glaciers will disappear completely within ten to twenty years unless there is a sudden and unexpected change in the present warming trend.

6. 다음 글의 내용을 한 문장으로 요약하고자 한다. 빈칸 (A), (B)에 들어갈 말로 가장 적절한 것은?

Asynchronous tools add value by accounting for time zones and learners work and family commitments by allowing them to access, listen to, or view content at the time, pace, and place of their choosing. This can potentially lead to greater engagement since they will have more time to explore the course material. This option also creates an accessible archive of past materials. One disadvantage is that learners may feel dissatisfied without the social interaction between their peers and instructors. Additionally, course material may be misunderstood without real-time interaction and without the opportunity to ask questions and receive the needed explanations or clarification in the moment. Although convenient, asynchronous tools require learners to exercise a high degree of self-regulated learning, calling for a high degree of motivation and self-direction. For those who lack self-regulated learning skills, asynchronous learning can be extremely challenging and overwhelming, which in turn can hinder their motivation to succeed.

Asynchronous tools __ (A) __ learners to engage in learning at their own convenience, but the lack of real-time interaction can reduce a sense of connection and decrease learning effectiveness because engagement is __ (B) __ .
