

2027학년도 수능 대비 모의평가

1. 다음 글의 주제로 가장 적절한 것은?

Literacy practices — how one engages with text, the type of texts read, the outcomes expected — are shaped by social purposes. As we move from one social situation to another, we learn varied ways of reading and distinct literacy practices linked to specific social activities. Moreover, our experiences vary from one person to another. A person who understands one type of text is not necessarily proficient at reading all types. An experienced reader of mathematical proofs may be perplexed when asked to make sense of a metaphor in a poem. A nursing student may be able to decipher the meanings conveyed by complex anatomical diagrams but feel completely at sea when trying to read a legal brief. A good reader of a motorcycle repair manual can make sense of directions that might stump an English literature professor, but she may be unable to comprehend her son's chemistry text. And a chemistry teacher may feel completely insecure when trying to understand some of the primary sources on a history colleague's course reading list.

- ① situational factors affecting literary practices
- ② a variety of factors that harm reading practices
- ③ universally utilized literary themes in the world
- ④ mistakenly performed literacy practices in reality
- ⑤ necessity of circumstantial knowledge in academic fields

2. 다음 글의 제목으로 가장 적절한 것은?

As you may already know, what and how you buy can be political. To whom do you want to give your money? Which companies and corporations do you value and respect? Be mindful about every purchase by carefully researching the corporations that are taking our money to decide if they deserve our support. Do they have a record of polluting the environment, or do they have fair-trade practices and an end-of-life plan for the products they make? Are they committed to bringing about good in the world? For instance, my family has found a company producing recycled, plastic-packaging-free toilet paper with a social conscience. They contribute 50 percent of their profits to the construction of toilets around the world, and we're genuinely happy to spend our money on this special toilet paper each month. Remember that the corporate world is built on consumers, so as a consumer you have the power to vote with your wallet and encourage companies to embrace healthier and more sustainable practices with every purchase you choose to make.

- ① Green Businesses: Are They Really Green?
- ② Fair Trade Does Not Always Appeal to Consumers
- ③ Buy Consciously, Make Companies Do the Right Things
- ④ Do Voters Have a Powerful Impact on Economic Policy?
- ⑤ The Secret to Saving Your Money: Record Your Spending

3. 다음 글의 밑줄 친 부분 중, 어법상 틀린 것은?

If an animal is innately programmed for some type of behaviour, then there ① are likely to be biological clues. It is no accident that fish have bodies which are streamlined and ② smooth, with fins and a powerful tail. Their bodies are structurally adapted for moving fast through the water. Similarly, if you found a dead bird or mosquito, you could guess by looking at ③ its wings that flying was its normal mode of transport. However, we must not be over-optimistic. Biological clues are not essential. The extent to which they are ④ finding varies from animal to animal and from activity to activity. For example, it is impossible to guess from their bodies that birds make nests, and, sometimes, animals behave in a way quite contrary to ⑤ what might be expected from their physical form: ghost spiders have tremendously long legs, yet they weave webs out of very short threads. To a human observer, their legs seem a great hindrance as they spin and move about the web.

4. 다음 글의 밑줄 친 부분 중, 문맥상 낱말의 쓰임이 적절하지 않은 것은?

Rene Descartes is the French philosopher who wrote the famous line "I think; therefore, I am." Fortunately for psychology, this was not his only contribution. In Descartes' time, many people assumed that human behavior was governed (A) partially / entirely by free will or "reason." Descartes disputed this notion and proposed a dualistic model of human nature. On the one hand, he claimed, we have a body that functions like a machine and produces automatic, involuntary behaviors in response to (B) internal / external stimulation (such as coughing in response to dust). On the other hand, we have a mind that has free will and produces behaviors that we regard as voluntary (such as choosing what to eat for dinner). Thus, Descartes' notion of mind-body dualism proposes that some human behaviors are (C) manual / automatic reactions that are driven by external stimulation, while other behaviors are freely chosen and controlled by the mind.

5. 다음 글에서 전체 흐름과 관계 없는 문장은?

The efficiency and beautiful simplicity of how a forest maintains its life force is always striking. ① Trees receive energy from the Sun and combine this with the nutrients and water they draw up from the soil to create the bark, limbs, and leaves that enable them to grow and thrive. ② The leaves drop off in autumn and fall to the ground, only to be decomposed by bacteria and converted back into the nutrients that again feed the tree. ③ When choosing trees for a harsh climate, the species' native environment must be considered carefully, otherwise many will not survive the winter. ④ The same process takes place when a branch falls off or when an entire tree dies, producing nutrient-rich soil and providing the nourishment for the next generation. ⑤ Given a fairly stable supply of water and sunshine, a forest can maintain itself for thousands of years without the need for any new outside resources.

6. 다음 글의 내용을 한 문장으로 요약하고자 한다. 빈칸 (A), (B)에 들어갈 말로 가장 적절한 것은?

What really works to motivate people to achieve their goals? In one study, researchers looked at how people respond to life challenges including getting a job, taking an exam, or undergoing surgery. For each of these conditions, the researchers also measured how much these participants fantasized about positive outcomes and how much they actually expected a positive outcome. What's the difference really between fantasy and expectation? While fantasy involves imagining an idealized future, expectation is actually based on a person's past experiences. So what did the researchers find? The results revealed that those who had engaged in fantasizing about the desired future did worse in all three conditions. Those who had more positive expectations for success did better in the following weeks, months, and years. These individuals were more likely to have found jobs, passed their exams, or successfully recovered from their surgery.

Positive expectations are more (A) than fantasizing about a desired future, and they are likely to increase your chances of (B) in achieving goals.
