1. 다음 글의 밑줄 친 부분 중, 어법상 틀린 것은?

When talking in general about Roman women, things break down by time periods and by classes. Whether a woman was a slave or ① came from a wealthier class made a great deal of difference. It also made a difference ② which period you're talking about. Rome's conquests meant ③ that men were often away for long periods of time and might not come back at all. Women were ④ left in charge of making sure that things got done. After the conquests, the enormous wealth ⑤ bringing back to Italy allowed middle- and upper-class women to run things with more independence and power.

Consider The Wizard of Oz as a psychological study of motivation. Dorothy and her three friends work hard to get to the Emerald City, overcoming barriers, persisting against all adversaries. They do so because they expect the Wizard to give ① them what they are missing. Instead, the wonderful (and wise) Wizard makes them aware that they, not he, always had the power ② to fulfill their wishes. For Dorothy, home is not a place but a feeling of security, of comfort with people she loves; it is wherever her heart is. The courage the Lion wants, the intelligence the Scarecrow longs for, and the emotions the Tin Man dreams of ③ being attributes they already possess. They need to think about these attributes not as internal conditions but as positive ways ④ in which they are already relating to others. After all, didn't they demonstrate those qualities on the journey to Oz, a journey ⑤ motivated by little more than an expectation, an idea about the future likelihood of getting something they wanted?

Observations are not always undertaken with a clear sense of what data may be relevant. Think, for example, of a detective at the scene of a crime. What small details need to be noted or perhaps ① preserved for future reference? Moreover, a set of observations may yield unanticipated information – data that does not conform to the observers sense of what is relevant – but information that is nonetheless of some importance. Recently, medical researchers at a large university ② were studying the effect of calcium on pregnancy-related high blood pressure. Though they observed no significant reductions in the blood pressure of the women in their study who took calcium, they did notice something quite interesting and ③ unexpecting. The women in their study who took calcium during pregnancy had lower rates of depression than those who took a placebo instead of calcium. As a result, the researchers began an entirely new study, one designed to determine the extent to ④ which calcium can prevent depression in pregnant women. As this example suggests, it is important not to become too attached to ⑤ fixed notions of what may constitute relevant observational data. Otherwise, we run the risk of missing something that may turn out to be significant.

정답 및 해설

1. [정답] ⑤

[해설]

⑤번이 포함된 문장의 주어는 'the enormous wealth'이고, 동사는 'allowed'입니다. 'bringing'은 'wealth'를 수식하는 분사로 쓰였습니다. 부는 이탈리아로 '가져와진' 것이므로 수동의 의미를 나타내는 과거분사 'brought'가 와야 합니다.

2. [정답] ③

[해설]

③번은 문장의 정동사가 필요한 자리이다. 주어는 'The courage..., the intelligence..., and the emotions...'로 여러 개의 명사구가 나열된 복수 주어이므로, 복수 동사 are가 와야 한다. 준동사인 being은 동사가 될 수 없다. ① them은 give의 간접목적어이다. ② to fulfill은 the power를 수식하는 to부정사의 형용사적 용법이다. ④ in which는 선행사 positive ways를 수식하는 관계부사절이다. ⑤ motivated는 a journey를 수식하는 과거분사이다.

3. [정답] ③

[해설]

③번은 'something'을 수식하는 형용사 자리이다. '예상치 못한 어떤 것'이라는 의미로, 수식을 받는 명사 something이 예상치 못함을 유발하는 것이 아니라 예상되지 않은 대상이므로 수동의 의미를 가진 과거분사 unexpected가 와야 한다. interesting은 '흥미를 유발하는' 이므로 현재분사가 맞지만 unexpecting은 문법적으로 거의 쓰이지 않으며 unexpected가 올바른 형태이다. ① preserved는 noted와 병렬로 연결된 과거분사이다. ② were studying은 과거진행형 시제로 문맥상 적절하다. ④ to which는 the extent를 선행사로 하는 '전치사+관계대명사' 구조로 올바르다. ⑤ fixed는 notions를 수식하는 과거분사 형용사로 '고정된 개념'이라는 의미이다.
