

2027학년도 수능 대비 모의평가

1. 다음 글의 밑줄 친 부분 중, 어법상 틀린 것은?

There is no one right way to draw. Don't you believe me? Collect 100 amazing artists in a room and have them ① draw the same chair. What do you get? One hundred very different chair drawings. ② Keeping this in mind, you'll have a lot more fun drawing the unique art that comes from you. You're the only artist in the world ③ which can draw the way you do. Exploring your personal drawing styles ④ is important. Notice how you have grown or improved as you practice. Pay attention to ⑤ what you like most about your drawings.

2. 다음 글의 밑줄 친 부분 중, 어법상 틀린 것은?

The most noticeable human characteristic projected onto animals is ① that they can talk in human language. Physically, animal cartoon characters and toys ② made after animals are also most often deformed in such a way as to resemble humans. This is achieved by ③ showing them with humanlike facial features and deformed front legs to resemble human hands. In more recent animated movies the trend has been to show the animals in a more "natural" way. However, they still use their front legs ④ like human hands (for example, lions can pick up and lift small objects with one paw), and they still talk with an appropriate facial expression. A general strategy that is used to make the animal characters more emotionally appealing, both to children and adults, ⑤ are to give them enlarged and deformed childlike features.

*deform: 변형하다 **paw: (동물의) 발

3. 다음 글의 밑줄 친 부분 중, 어법상 틀린 것은? (3점)

Though he probably was not the first to do it, Dutch eyeglass maker Hans Lippershey gets credit for putting two lenses on either end of a tube in 1608 and ① creating a "spyglass." Even then, it was not Lippershey but his children who discovered ② that the double lenses made a nearby weathervane look bigger. These early instruments were not ③ much more than toys because their lenses were not very strong. The first person to turn a spyglass toward the sky was an Italian mathematician and professor named Galileo Galilei. Galileo, who heard about the Dutch spyglass and began making his own, ④ realizing right away how useful the device could be to armies and sailors. As he made better and better spyglasses, which were later named telescopes, Galileo decided ⑤ to point one at the Moon.

*weathervane: 풍향계

정답 및 해설

1. [정답] ③

[해설]

③번의 선행사는 사람(the only artist)이므로, 관계대명사 which가 아니라 who나 that을 사용해야 합니다.

2. [정답] ⑤

[해설]

⑤번의 주어는 'A general strategy'입니다. 주어의 핵심은 단수인 strategy이므로, 동사는 are가 아닌 is가 되어야 합니다. 주어와 동사 사이에 관계대명사절이 삽입되어 있습니다.

3. [정답] ④

[해설]

④번은 문장의 본동사가 필요한 자리입니다. 주어는 Galileo이고, 콤마(,)와 콤마(,) 사이는 삽입된 관계대명사절입니다. 따라서 realizing은 동사 역할을 할 수 없으며, 과거 시제 동사인 realized로 고쳐야 합니다.
