

2027학년도 수능 대비 모의평가

1. (A), (B), (C)의 각 네모 안에서 어법에 맞는 표현으로 가장 적절한 것은?

Three extremely important inventions came out of Mesopotamia: the wheel, the plow, and the sailboat. The wheel and the plow were possible (A) because / because of the availability of animal labor. Wheeled carts pulled by horses could transport more goods to market more quickly. Animals that pulled plows to turn the earth over for planting (B) was / were far more efficient than humans. The sail made it possible to trade with countries that could be reached only by sea. All three inventions made the cities of Mesopotamia powerful trading centers with as (C) much / many as 30,000 people each.

- ① because was much
- ② because were many
- ③ because of were many
- ④ because of were much
- ⑤ because of was much

2. 다음 글의 밑줄 친 부분 중, 어법상 틀린 것은?

Plastic is extremely slow to degrade and tends to float, ① which allows it to travel in ocean currents for thousands of miles. Most plastics break down into smaller and smaller pieces when exposed to ultraviolet (UV) light, ② forming microplastics. These microplastics are very difficult to measure once they are small enough to pass through the nets typically used to collect ③ themselves. Their impacts on the marine environment and food webs are still poorly understood. These tiny particles are known to be eaten by various animals and to get into the food chain. Because most of the plastic particles in the ocean ④ are so small, there is no practical way to clean up the ocean. One would have to filter enormous amounts of water to collect a ⑤ relatively small amount of plastic.

Although it is obvious that part of our assessment of food is its visual appearance, it is perhaps surprising ① how visual input can override taste and smell. People find it very ② difficult to correctly identify fruit-flavoured drinks if the colour is wrong, for instance an orange drink that is coloured green. Perhaps even more striking ③ is the experience of wine tasters. One study of Bordeaux University students of wine and wine making revealed that they chose tasting notes appropriate for red wines, such as 'prune and chocolate', when they ④ gave white wine coloured with a red dye. Experienced New Zealand wine experts were similarly tricked into thinking ⑤ that the white wine Chardonnay was in fact a red wine, when it had been coloured with a red dye.
