Literature can be helpful in the language learning process because of the _____ it fosters in readers. Core language teaching materials must concentrate on how a language operates both as a rule-based system and as a sociosemantic system. Very often, the process of learning is essentially analytic, piecemeal, and, at the level of the personality, fairly superficial. Engaging imaginatively with literature enables learners to shift the focus of their attention beyond the more mechanical aspects of the foreign language system. When a novel, play or short story is explored over a period of time, the result is that the reader begins to 'inhabit' the text. He or she is drawn into the book. Pinpointing what individual words or phrases may mean becomes less important than pursuing the development of the story. The reader is eager to find out what happens as events unfold; he or she feels close to certain characters and shares their emotional responses. The language becomes 'transparent' — the fiction draws the whole person into its own world.

- ① linguistic insight
- ② artistic imagination
- ③ literary sensibility
- ④ alternative perspective
- ⑤ personal involvement

Creativity is commonly defined as the production of ideas that are both novel (original, new) and useful (appropriate, feasible). Ideas that are original but not useful are irrelevant, and ideas that are useful but not original are unremarkable. While this definition is widely used in research, an important aspect of creativity is often ignored: Generating creative ideas rarely is the final goal. Rather, to successfully solve problems or innovate requires one or a few good ideas that really work, and work better than previous approaches. This requires that people evaluate the products of their own or each other's imagination, and choose those ideas that seem promising enough to develop further, and abandon those that are unlikely to be successful. Thus, being creative _____. In fact, the ability to generate creative ideas is essentially useless if these ideas subsequently die a silent death.

- ① does not stop with idea generation
- ② rarely originates from practical ideas
- ③ is often regarded as a shortcut to innovation
- ④ frequently gives way to unanticipated success
- ⑤ brings out tension between novelty and relevancy

Green products involve, in many cases, higher ingredient costs than those of mainstream products.

- (A) They'd rather put money and time into known, profitable, high-volume products that serve populous customer segments than into risky, less-profitable, low-volume products that may serve current noncustomers. Given that choice, these companies may choose to leave the green segment of the market to small niche competitors.
- (B) Even if the green product succeeds, it may cannibalize the company's higher-profit mainstream offerings. Given such downsides, companies serving mainstream consumers with successful mainstream products face what seems like an obvious investment decision.
- (C) Furthermore, the restrictive ingredient lists and design criteria that are typical of such products may make green products inferior to mainstream products on core performance dimensions (e.g., less effective cleansers). In turn, the higher costs and lower performance of some products attract only a small portion of the customer base, leading to lower economies of scale in procurement, manufacturing, and distribution.

The generally close connection between health and what animals want exists because wanting to obtain the right things and wanting to avoid the wrong ones are major ways in which animals keep themselves healthy.

- (A) They can take pre-emptive action so that the worst never happens. They start to want things that will be necessary for their health and survival not for now but for some time in the future.
- (B) Animals have evolved many different ways of maintaining their health and then regaining it again once it has been damaged, such as an ability to heal wounds when they are injured and an amazingly complex immune system for warding off infection.
- (C) Animals are equally good, however, at dealing with injury and disease before they even happen. They have evolved a complex set of mechanisms for anticipating and avoiding danger altogether.

Sometimes these internal narratives we form not only shape our beliefs and opinions but also become deeply rooted in our identity.

While stories clearly dominate statistics from both memorability and persuasiveness perspectives, it's rarely a battle between facts and anecdotes — or even facts and other facts. The real clash is actually between stories: the predominant incumbent and a new challenger. (①) As storytelling creatures, we routinely form narratives to help us understand the world around us. (②) When we experience different events or encounter various facts, our minds seek to make sense of them by forming stories around them. (③) For example, if you have had some bad experiences with graduates from a particular university, you may create a negative narrative in your mind about people who went to that school. (④) Suddenly, you judge everyone from the university by what you've experienced on just a few unfortunate occasions. (⑤) For example, the narratives you have formed around gun control or climate change are most likely related with your political ideology — who you are as an individual.

At the next step in the argument, however, the analogy breaks down.

Misprints in a book or in any written message usually have a negative impact on the content, sometimes (literally) fatally. (①) The displacement of a comma, for instance, may be a matter of life and death. (②) Similarly most mutations have harmful consequences for the organism in which they occur, meaning that they reduce its reproductive fitness. (③) Occasionally, however, a mutation may occur that increases the fitness of the organism, just as an accidental failure to reproduce the text of the first edition might provide more accurate or updated information. (④) A favorable mutation is going to be more heavily represented in the next generation, since the organism in which it occurred will have more offspring and mutations are transmitted to the offspring. (⑤) By contrast, there is no mechanism by which a book that accidentally corrects the mistakes of the first edition will tend to sell better.

지문은 문학 작품을 읽을 때 독자가 텍스트의 세계로 '이끌려 들어가고(drawn into the book)', 텍스트를 '내면화하며(inhabit)', 등장인물과 감정적으로 교감하는(shares their emotional responses) 경험을 한다고 설명한다. 이는 독자가 작품에 깊이 관여하고 몰입하는 것을 의미하므로, 문학이 독자에게 조성하는 '개인적인 관여/몰입(personal involvement)'이 언어 학습에 도움이 됨을 알 수 있다.

2. [정답] ①

필자는 창의성이 단순히 새로운 아이디어를 생성하는 것('Generating creative ideas')이 최종 목표가 아니라고 말한다. 오히려 생성된 아이디어를 평가하고, 선택하고, 발전시키는 과정이 필요하다고 강조한다. 따라서 창의적이라는 것은 '아이디어 생성에서 멈추지 않는다'는 결론이 가장 타당하다.

주어진 문장은 친환경 제품의 '높은 원가'라는 단점을 제시한다. (C)는 'Furthermore'로 연결하며 '낮은 성능'이라는 또 다른 단점을 추가하고, 이로 인해 고객층이 좁아진다고 설명한다. (B)는 'such downsides'로 (C)에서 언급된 단점들을 받아, 설사 성공하더라도 주력 상품 시장을 잠식(cannibalize)할 수 있다는 추가적인 위험을 제시하며, 이 때문에 기업들이 명백한 투자 결정에 직면한다고 말한다. (A)는 (B)에서 언급된 'investment decision'이 무엇인지 구체적으로 설명하며, 기업들이 위험한 친환경 제품 대신 기존의 수익성 높은 제품에 투자하는 것을 선호한다고 결론짓는다. 따라서 (C)-(B)-(A)의 순서가 가장 자연스럽다.

4. [정답] ③

The initial statement introduces the link between desire and health. (B) first elaborates on reactive health mechanisms (healing, immune system). (C) uses 'however' to pivot from reactive to proactive mechanisms ('before they even happen'). (A) then provides a specific explanation of this 'pre-emptive action' mentioned in (C), detailing how animals anticipate future needs.

주어진 문장은 우리가 만드는 내적 서사가 우리의 신념과 의견을 형성할 뿐만 아니라 '정체성(identity)'에 깊이 뿌리내리게 된다는 내용이다. 글의 전반부는 서사가 신념과 의견을 만드는 과정을 특정 대학 졸업생에 대한 부정적 서사 형성의 예시를 통해 설명한다. ⑤번 뒤의 문장은 총기 규제나 기후 변화에 대한 서사가 개인의 정치적 이념, 즉 '개인으로서의 당신이 누구인가(who you are as an individual)'와 관련이 있다고 설명한다. 이는 '정체성'의 구체적인 예시이므로, 주어진 문장은 일반적 진술로서 ⑤번 위치에 들어가 예시 문장을 이끌어주는 것이 가장 자연스럽다.

이 글은 책의 오타자(misprint)와 생물의 돌연변이(mutation) 사이의 유비(analogy)를 설명합니다. ③번 문장까지는 둘 다 해로울 수도, 이로울 수도 있다는 점에서 유비가 성립합니다. ④번 다음 문장은 '이로운 돌연변이'가 다음 세대로 전달되어 확산되는 과정을 설명합니다. 이것이 유비의 '다음 단계(next step)'의 한쪽 측면입니다. ⑤번 다음 문장은 '대조적으로(By contrast)'를 사용해, '오류가 수정된 책'은 그렇게 확산되는 메커니즘이 없다고 설명하며 유비가 깨지는 지점을 보여줍니다. 따라서 유비가 깨진다고 선언하는 주어진 문장은 이 두 대조적인 설명 사이에 위치하는 것이 가장 논리적입니다. 즉, 이로운 돌연변이의 운명을 설명한 후, '그러나 다음 단계에서 유비는 깨진다'고 말하고, 이어서 책의 경우를 대조적으로 설명하는 흐름이 자연스럽습니다.
