

2027학년도 수능 대비 모의평가

1. 다음 빈칸에 들어갈 말로 가장 적절한 것을 고르시오. (3점)

Literature can be helpful in the language learning process because of the _____ it fosters in readers. Core language teaching materials must concentrate on how a language operates both as a rule-based system and as a sociosemantic system. Very often, the process of learning is essentially analytic, piecemeal, and, at the level of the personality, fairly superficial. Engaging imaginatively with literature enables learners to shift the focus of their attention beyond the more mechanical aspects of the foreign language system. When a novel, play or short story is explored over a period of time, the result is that the reader begins to 'inhabit' the text. He or she is drawn into the book. Pinpointing what individual words or phrases may mean becomes less important than pursuing the development of the story. The reader is eager to find out what happens as events unfold; he or she feels close to certain characters and shares their emotional responses. The language becomes 'transparent' — the fiction draws the whole person into its own world.

- ① linguistic insight
- ② artistic imagination
- ③ literary sensibility
- ④ alternative perspective
- ⑤ personal involvement

2. 다음 빈칸에 들어갈 말로 가장 적절한 것을 고르시오.

Creativity is commonly defined as the production of ideas that are both novel (original, new) and useful (appropriate, feasible). Ideas that are original but not useful are irrelevant, and ideas that are useful but not original are unremarkable. While this definition is widely used in research, an important aspect of creativity is often ignored: Generating creative ideas rarely is the final goal. Rather, to successfully solve problems or innovate requires one or a few good ideas that really work, and work better than previous approaches. This requires that people evaluate the products of their own or each other's imagination, and choose those ideas that seem promising enough to develop further, and abandon those that are unlikely to be successful. Thus, being creative _____. In fact, the ability to generate creative ideas is essentially useless if these ideas subsequently die a silent death.

- ① does not stop with idea generation
- ② rarely originates from practical ideas
- ③ is often regarded as a shortcut to innovation
- ④ frequently gives way to unanticipated success
- ⑤ brings out tension between novelty and relevancy

3. 주어진 글 다음에 이어질 글의 순서로 가장 적절한 것은? (3점)

Green products involve, in many cases, higher ingredient costs than those of mainstream products.

- (A) They'd rather put money and time into known, profitable, high-volume products that serve populous customer segments than into risky, less-profitable, low-volume products that may serve current noncustomers. Given that choice, these companies may choose to leave the green segment of the market to small niche competitors.
- (B) Even if the green product succeeds, it may cannibalize the company's higher-profit mainstream offerings. Given such downsides, companies serving mainstream consumers with successful mainstream products face what seems like an obvious investment decision.
- (C) Furthermore, the restrictive ingredient lists and design criteria that are typical of such products may make green products inferior to mainstream products on core performance dimensions (e.g., less effective cleansers). In turn, the higher costs and lower performance of some products attract only a small portion of the customer base, leading to lower economies of scale in procurement, manufacturing, and distribution.

*segment: 조각 **cannibalize: 잡아먹다 ***procurement: 조달

4. 주어진 글 다음에 이어질 글의 순서로 가장 적절한 것은?

The generally close connection between health and what animals want exists because wanting to obtain the right things and wanting to avoid the wrong ones are major ways in which animals keep themselves healthy.

- (A) They can take pre-emptive action so that the worst never happens. They start to want things that will be necessary for their health and survival not for now but for some time in the future.
- (B) Animals have evolved many different ways of maintaining their health and then regaining it again once it has been damaged, such as an ability to heal wounds when they are injured and an amazingly complex immune system for warding off infection.
- (C) Animals are equally good, however, at dealing with injury and disease before they even happen. They have evolved a complex set of mechanisms for anticipating and avoiding danger altogether.

| ③ (B) - (C) - (A) | ④ (C) - (A) - (B) |
| ⑤ (C) - (B) - (A) | |

5. 글의 흐름으로 보아, 주어진 문장이 들어가기에 가장 적절한 곳을 고르시오.

Sometimes these internal narratives we form not only shape our beliefs and opinions but also become deeply rooted in our identity.

While stories clearly dominate statistics from both memorability and persuasiveness perspectives, it's rarely a battle between facts and anecdotes — or even facts and other facts. The real clash is actually between stories: the predominant incumbent and a new challenger. (①) As storytelling creatures, we routinely form narratives to help us understand the world around us. (②) When we experience different events or encounter various facts, our minds seek to make sense of them by forming stories around them. (③) For example, if you have had some bad experiences with graduates from a particular university, you may create a negative narrative in your mind about people who went to that school. (④) Suddenly, you judge everyone from the university by what you've experienced on just a few unfortunate occasions. (⑤) For example, the narratives you have formed around gun control or climate change are most likely related with your political ideology — who you are as an individual.

6. 글의 흐름으로 보아, 주어진 문장이 들어가기에 가장 적절한 곳을 고르시오. (3점)

At the next step in the argument, however, the analogy breaks down.

Misprints in a book or in any written message usually have a negative impact on the content, sometimes (literally) fatally. (①) The displacement of a comma, for instance, may be a matter of life and death. (②) Similarly most mutations have harmful consequences for the organism in which they occur, meaning that they reduce its reproductive fitness. (③) Occasionally, however, a mutation may occur that increases the fitness of the organism, just as an accidental failure to reproduce the text of the first edition might provide more accurate or updated information. (④) A favorable mutation is going to be more heavily represented in the next generation, since the organism in which it occurred will have more offspring and mutations are transmitted to the offspring. (⑤) By contrast, there is no mechanism by which a book that accidentally corrects the mistakes of the first edition will tend to sell better.
