

2027학년도 수능 대비 모의평가

1. 다음 빈칸에 들어갈 말로 가장 적절한 것을 고르시오.

In the classic model of the Sumerian economy, the temple functioned as an administrative authority governing commodity production, collection, and redistribution. The discovery of administrative tablets from the temple complexes at Uruk suggests that token use and consequently writing evolved as a tool of centralized economic governance. Given the lack of archaeological evidence from Uruk-period domestic sites, it is not clear whether individuals also used the system for _____. For that matter, it is not clear how widespread literacy was at its beginnings. The use of identifiable symbols and pictograms on the early tablets is consistent with administrators needing a lexicon that was mutually intelligible by literate and nonliterate parties. As cuneiform script became more abstract, literacy must have become increasingly important to ensure one understood what he or she had agreed to.

- ① religious events
- ② personal agreements
- ③ communal responsibilities
- ④ historical records
- ⑤ power shifts

2. 다음 빈칸에 들어갈 말로 가장 적절한 것을 고르시오.

The human psychology and education communities (as well as some animal researchers!) have been against referring to "teaching" when describing social learning in animals, mainly because teaching implies a level of _____ on the part of the model that is difficult to measure in animals. Nonetheless, there has been a movement within the animal cognition community to say that animals can, in fact, teach one another. For example, skilled ants engage in a behavior called tandem running, in which they touch their bodies to the body of a novice ant as they lay down chemical trails, presumably to assist the newcomer with route learning. Killer whales also repeat the same seal hunting technique in front of their offspring, sometimes without even killing the seal, leading researchers to ask why they would repeatedly catch and release a seal if they were not planning to eat it. Considering the amount of energy they'd have to expend, there would need to be a good reason, and that reason might be teaching.

- ① comfort
- ② courage
- ③ frustration
- ④ inventiveness
- ⑤ intentionality

5. 글의 흐름으로 보아, 주어진 문장이 들어가기에 가장 적절한 곳을 고르시오. (3점)

The difference is that the action in the game world can only be explored through the virtual bodily space of the avatar.

A video game has its own model of reality, internal to itself and separate from the player's external reality, the player's bodily space and the avatar's bodily space. (①) The avatar's bodily space, the potential actions of the avatar in the game world, is the only way in which the reality of the external reality of the game world can be perceived. (②) As in the real world, perception requires action. (③) Players extend their perceptual field into the game, encompassing the available actions of the avatar. (④) The feedback loop of perception and action that enables you to navigate the world around you is now one step removed: instead of perceiving primarily through interaction of your own body with the external world, you're perceiving the game world through interaction of the avatar. (⑤) The entire perceptual system has been extended into the game world.

6. 글의 흐름으로 보아, 주어진 문장이 들어가기에 가장 적절한 곳을 고르시오.

There's a reason for that: traditionally, park designers attempted to create such a feeling by planting tall trees at park boundaries, building stone walls, and constructing other means of partition.

Parks take the shape demanded by the cultural concerns of their time. Once parks are in place, they are no inert stage —their purposes and meanings are made and remade by planners and by park users. Moments of park creation are particularly telling, however, for they reveal and actualize ideas about nature and its relationship to urban society. (①) Indeed, what distinguishes a park from the broader category of public space is the representation of nature that parks are meant to embody. (②) Public spaces include parks, concrete plazas, sidewalks, even indoor atriums. (③) Parks typically have trees, grass, and other plants as their central features. (④) When entering a city park, people often imagine a sharp separation from streets, cars, and buildings. (⑤) What's behind this idea is not only landscape architects' desire to design aesthetically suggestive park spaces, but a much longer history of Western thought that envisions cities and nature as antithetical spaces and oppositional forces.
