There was nothing modern about the idea of men making women's clothes — we saw them doing it for centuries in the past. In the old days, however, the client was always primary and her tailor was an obscure craftsman, perhaps talented but perhaps not. She had her own ideas like any patron, there were no fashion plates, and the tailor was simply at her service, perhaps with helpful suggestions about what others were wearing. Beginning in the late nineteenth century, with the hugely successful rise of the artistic male couturier, it was the designer who became celebrated, and the client elevated by his inspired attention. In a climate of admiration for male artists and their female creations, the dress-designer first flourished as the same sort of creator. Instead of the old rule that dressmaking is a craft, _____ was invented that had not been there before.

- ① a profitable industry driving fast fashion
- ② a widespread respect for marketing skills
- ③ a public institution preserving traditional designs
- ④ a modern connection between dress-design and art
- ⑤ an efficient system for producing affordable clothing

Development can get very complicated and fanciful. A fugue by Johann Sebastian Bach illustrates how far this process could go, when a single melodic line, sometimes just a handful of notes, was all that the composer needed to create a brilliant work containing lots of intricate development within a coherent structure. Ludwig van Beethoven's famous Fifth Symphony provides an exceptional example of how much mileage a classical composer can get out of a few notes and a simple rhythmic tapping. The opening da-da-da-DUM that everyone has heard somewhere or another _____ throughout not only the opening movement, but the remaining three movements, like a kind of motto or a connective thread. Just as we don't always see the intricate brushwork that goes into the creation of a painting, we may not always notice how Beethoven keeps finding fresh uses for his motto or how he develops his material into a large, cohesive statement. But a lot of the enjoyment we get from that mighty symphony stems from the inventiveness behind it, the impressive development of musical ideas.

- ① makes the composer's musical ideas contradictory
- ② appears in an incredible variety of ways
- ③ provides extensive musical knowledge creatively
- ④ remains fairly calm within the structure
- ⑤ becomes deeply associated with one's own enjoyment

Perhaps at some point you have seen some mathematical writing and not understood it.

- (A) The complicated notations that might spring to mind — all those strange dashes, squiggles and letters — are obvious signs, but a lot of those are really quite modern. Mathematics had been going on for a long time before the dashes and squiggles were invented.
- (B) You would not be the first; rest assured, even professional mathematicians sometimes have to rely on discussions with colleagues to properly understand problems they are looking at. But how do you recognise some writing is mathematical in the first place?
- (C) Put simply, there has to be something mathematical going on for us to say that it is mathematics. And if we are dealing with writing from a very distant past, in a language that is not familiar to us, from a time even before recorded language, that can be sometimes difficult to recognise.

Plants have evolved defenses almost as diverse as the number of genera. Some load their tissues with harsh compounds that either are unpleasant to insects or intoxicate them, encouraging the insects to go bother another plant or at least slowing down their eating.

- (A) The back-and-forth is not a matter of natural balance, but more like a drawn-out evolutionary conversation. New plant defenses unintentionally select for insects with ways to get around them, which in turn help bring about more resilient and resistant plant species. New variations, shading into entire new forms and adaptations, maintain the stalemate.
- (B) Plants can release chemical compounds that let their same-species neighbors know that an attack is likely coming, pushing those nearby plants to start building up defensive compounds in their tissues. Some of these cues even attract insect predators, a call for an assist that benefits both the plant and its bug-eating collaborators.
- (C) Structural defenses like thick coats of wax on leaves may prevent some insect species from damaging the plant tissues altogether. Nor are individual plants entirely on their own while under attack.

In particular, they define a group as two or more people who interact with, and exert mutual influences on, each other.

In everyday life, we tend to see any collection of people as a group. (①) However, social psychologists use this term more precisely. (②) It is this sense of mutual interaction or inter-dependence for a common purpose which distinguishes the members of a group from a mere aggregation of individuals. (③) For example, as Kenneth Hodge observed, a collection of people who happen to go for a swim after work on the same day each week does not, strictly speaking, constitute a group because these swimmers do not interact with each other in a structured manner. (④) By contrast, a squad of young competitive swimmers who train every morning before going to school is a group because they not only share a common objective (training for competition) but also interact with each other in formal ways (e.g., by warming up together beforehand). (⑤) It is this sense of people coming together to achieve a common objective that defines a "team".

In addition, you will probably infer that I am disapproving of Maddy, or saying that I think you should disapprove of her, or similar, given typical linguistic conventions and assuming I am sincere.

I have still not exactly pinpointed Maddy's character since wickedless takes many forms. (①) Imagine I tell you that Maddy is bad. Perhaps you infer from my intonation or the context in which we are talking that I mean morally bad. (②) However, you might not get a more detailed sense of the particular sorts of way in which Maddy is bad, her typical character traits, and the like, since people can be bad in many ways. (③) In contrast, if I say that Maddy is wicked, then you get more of a sense of her specific character. (④) The word 'wicked' is more specific than 'bad'. (⑤) But there is more detail nevertheless, perhaps a stronger connotation of the sort of person Maddy is.

과거에는 여성복을 만드는 재단사가 무명의 장인이었으나, 19세기 후반부터 남성 'couturier(디자이너)'가 예술가로서 명성을 얻게 되었다고 설명한다. 디자이너가 'celebrated(유명해지고)', 'the same sort of creator(같은 종류의 창작자)'로 변성하게 되었다. 이는 '의상 제작은 기술(craft)이다'라는 과거의 규칙 대신에, '의상 디자인과 예술의 현대적 연결(a modern connection between dress-design and art)'이라는 새로운 개념이 만들어졌음을 의미한다.

이 글은 바흐와 베토벤의 예를 들어, 작곡가들이 단순한 음악적 아이디어를 복잡하고 화려하게 발전시키는 방식을 설명한다. 베토벤 5번 교향곡의 '다-다-다-덤' 모티프가 1악장뿐만 아니라 나머지 3개 악장 전체에 걸쳐 나타난다고 언급한다. 이어지는 문장에서 베토벤이 '자신의 모티프에 대한 새로운 사용법을 계속 찾아내는(keeps finding fresh uses for his motto)' 방식과 '자신의 재료를 발전시키는(develops his material)' 방식을 언급하고 있으므로, 이 모티프가 '믿을 수 없을 정도로 다양한 방식으로 나타난다'고 하는 것이 가장 적절하다.

주어진 글은 수학적 글을 보고 이해하지 못했을 수 있다는 내용이다. (B)는 'You would not be the first'라며 주어진 글의 내용에 공감하고, '애초에 어떤 글이 수학적인지 어떻게 알아보는가?'라는 근본적인 질문을 던지며 화제를 전환한다. (A)는 (B)의 질문에 대한 답으로, 복잡한 기호들이 명백한 표시이지만 이는 현대적인 것이라고 말하며, 기호가 전부는 아님을 암시한다. (C)는 (A)의 내용을 이어받아, 수학적 글을 알아보는 근본적인 것은 '수학적인 무언가가 진행되고 있는가'이며, 고대의 글에서는 이를 알아보기 어렵다고 설명한다. 따라서 (B)-(A)-(C) 순서가 자연스럽다.

도입문에서 화학물질을 이용한 방어를 언급한 후, (C)에서 구조적 방어(왁스층)를 소개하고 '식물이 혼자가 아니다'라는 문장으로 (B)의 화학적 신호 전달 내용과 연결된다. (B)에서 언급한 곤충 포식자를 부르는 신호는 (A)의 진화적 상호작용(끊임없는 공진화)으로 이어져 전체 논리가 완성된다. 따라서 순서는 (C)-(B)-(A)이다.

5. [정답] ②

주어진 문장은 집단을 '서로 상호작용하고 상호 영향을 미치는 두 명 이상의 사람'이라고 정의한다. ①번 앞 문장은 일상생활에서 집단이라는 용어를 폭넓게 쓴다고 말하고, ①번 뒷 문장은 사회 심리학자들이 이 용어를 더 '정확하게(precisely)' 사용한다고 말한다. 따라서 그 '정확한 정의'가 ②번 자리에 들어가는 것이 가장 자연스럽다. ②번 뒷 문장의 'It is this sense of mutual interaction or inter-dependence(바로 이러한 상호작용 또는 상호의존의 감각이...)'에서 'this sense'가 바로 주어진 문장의 정의를 가리키므로, ②번이 정답임을 확신할 수 있다.

6. [정답] ②

제시문은 'In addition(게다가)'으로 시작하므로, 앞서 어떤 내용이 언급된 후 추가적인 정보가 나올 위치에 들어가야 합니다. 본문에서 (①) 다음 문장은 'Maddy is bad'라는 말에서 '도덕적으로 나쁘다'는 의미를 추론할 수 있다고 말합니다. 이것이 첫 번째 추론입니다. 제시문은 '내가 Maddy를 못마땅해한다'는 두 번째 추론을 추가하고 있습니다. 따라서 첫 번째 추론 바로 뒤인 (②)의 자리에 들어가야 논리적 흐름이 자연스럽습니다.
