

2027학년도 수능 대비 모의평가

1. 다음 빈칸에 들어갈 말로 가장 적절한 것을 고르시오.

There was nothing modern about the idea of men making women's clothes — we saw them doing it for centuries in the past. In the old days, however, the client was always primary and her tailor was an obscure craftsman, perhaps talented but perhaps not. She had her own ideas like any patron, there were no fashion plates, and the tailor was simply at her service, perhaps with helpful suggestions about what others were wearing. Beginning in the late nineteenth century, with the hugely successful rise of the artistic male couturier, it was the designer who became celebrated, and the client elevated by his inspired attention. In a climate of admiration for male artists and their female creations, the dress-designer first flourished as the same sort of creator. Instead of the old rule that dressmaking is a craft, _____ was invented that had not been there before.

- ① a profitable industry driving fast fashion
- ② a widespread respect for marketing skills
- ③ a public institution preserving traditional designs
- ④ a modern connection between dress-design and art
- ⑤ an efficient system for producing affordable clothing

2. 다음 빈칸에 들어갈 말로 가장 적절한 것을 고르시오.

Development can get very complicated and fanciful. A fugue by Johann Sebastian Bach illustrates how far this process could go, when a single melodic line, sometimes just a handful of notes, was all that the composer needed to create a brilliant work containing lots of intricate development within a coherent structure. Ludwig van Beethoven's famous Fifth Symphony provides an exceptional example of how much mileage a classical composer can get out of a few notes and a simple rhythmic tapping. The opening da-da-da-DUM that everyone has heard somewhere or another _____ throughout not only the opening movement, but the remaining three movements, like a kind of motto or a connective thread. Just as we don't always see the intricate brushwork that goes into the creation of a painting, we may not always notice how Beethoven keeps finding fresh uses for his motto or how he develops his material into a large, cohesive statement. But a lot of the enjoyment we get from that mighty symphony stems from the inventiveness behind it, the impressive development of musical ideas.

- ① makes the composer's musical ideas contradictory
- ② appears in an incredible variety of ways
- ③ provides extensive musical knowledge creatively
- ④ remains fairly calm within the structure
- ⑤ becomes deeply associated with one's own enjoyment

3. 주어진 글 다음에 이어질 글의 순서로 가장 적절한 것은?

Perhaps at some point you have seen some mathematical writing and not understood it.

- (A) The complicated notations that might spring to mind — all those strange dashes, squiggles and letters — are obvious signs, but a lot of those are really quite modern. Mathematics had been going on for a long time before the dashes and squiggles were invented.
- (B) You would not be the first; rest assured, even professional mathematicians sometimes have to rely on discussions with colleagues to properly understand problems they are looking at. But how do you recognise some writing is mathematical in the first place?
- (C) Put simply, there has to be something mathematical going on for us to say that it is mathematics. And if we are dealing with writing from a very distant past, in a language that is not familiar to us, from a time even before recorded language, that can be sometimes difficult to recognise.

Plants have evolved defenses almost as diverse as the number of genera. Some load their tissues with harsh compounds that either are unpleasant to insects or intoxicate them, encouraging the insects to go bother another plant or at least slowing down their eating.

- (A) The back-and-forth is not a matter of natural balance, but more like a drawn-out evolutionary conversation. New plant defenses unintentionally select for insects with ways to get around them, which in turn help bring about more resilient and resistant plant species. New variations, shading into entire new forms and adaptations, maintain the stalemate.
- (B) Plants can release chemical compounds that let their same-species neighbors know that an attack is likely coming, pushing those nearby plants to start building up defensive compounds in their tissues. Some of these cues even attract insect predators, a call for an assist that benefits both the plant and its bug-eating collaborators.
- (C) Structural defenses like thick coats of wax on leaves may prevent some insect species from damaging the plant tissues altogether. Nor are individual plants entirely on their own while under attack.

In particular, they define a group as two or more people who interact with, and exert mutual influences on, each other.

In everyday life, we tend to see any collection of people as a group. (①) However, social psychologists use this term more precisely. (②) It is this sense of mutual interaction or inter-dependence for a common purpose which distinguishes the members of a group from a mere aggregation of individuals. (③) For example, as Kenneth Hodge observed, a collection of people who happen to go for a swim after work on the same day each week does not, strictly speaking, constitute a group because these swimmers do not interact with each other in a structured manner. (④) By contrast, a squad of young competitive swimmers who train every morning before going to school is a group because they not only share a common objective (training for competition) but also interact with each other in formal ways (e.g., by warming up together beforehand). (⑤) It is this sense of people coming together to achieve a common objective that defines a "team".

In addition, you will probably infer that I am disapproving of Maddy, or saying that I think you should disapprove of her, or similar, given typical linguistic conventions and assuming I am sincere.

I have still not exactly pinpointed Maddy's character since wickedless takes many forms. (①) Imagine I tell you that Maddy is bad. Perhaps you infer from my intonation or the context in which we are talking that I mean morally bad. (②) However, you might not get a more detailed sense of the particular sorts of way in which Maddy is bad, her typical character traits, and the like, since people can be bad in many ways. (③) In contrast, if I say that Maddy is wicked, then you get more of a sense of her specific character. (④) The word 'wicked' is more specific than 'bad'. (⑤) But there is more detail nevertheless, perhaps a stronger connotation of the sort of person Maddy is.
