

2027학년도 수능 대비 모의평가

1. 다음 빈칸에 들어갈 말로 가장 적절한 것을 고르시오.

We understand that the segregation of our consciousness into present, past, and future is both a fiction and an oddly self-referential framework; your present was part of your mother's future, and your children's past will be in part your present. Nothing is generally wrong with structuring our consciousness of time in this conventional manner, and it often works well enough. In the case of climate change, however, the sharp division of time into past, present, and future has been desperately misleading and has, most importantly, hidden from view the extent of the responsibility of those of us alive now. The narrowing of our consciousness of time smooths the way to divorcing ourselves from responsibility for developments in the past and the future with which our lives are in fact deeply intertwined. In the climate case, it is not that _____. It is that the realities are obscured from view by the partitioning of time, and so questions of responsibility toward the past and future do not arise naturally.

- ① all our efforts prove to be effective and are thus encouraged
- ② sufficient scientific evidence has been provided to us
- ③ future concerns are more urgent than present needs
- ④ our ancestors maintained a different frame of time
- ⑤ we face the facts but then deny our responsibility

2. 다음 빈칸에 들어갈 말로 가장 적절한 것을 고르시오.

The entrance to a honeybee colony, often referred to as the dancefloor, is a market place for information about the state of the colony and the environment outside the hive. Studying interactions on the dancefloor provides us with a number of illustrative examples of how individuals changing their own behavior in response to local information _____. For example, upon returning to their hive honeybees that have collected water search out a receiver bee to unload their water to within the hive. If this search time is short then the returning bee is more likely to perform a waggle dance to recruit others to the water source. Conversely, if this search time is long then the bee is more likely to give up collecting water. Since receiver bees will only accept water if they require it, either for themselves or to pass on to other bees and brood, this unloading time is correlated with the colony's overall need of water. Thus the individual water forager's response to unloading time (up or down) regulates water collection in response to the colony's need.

- ① allow the colony to regulate its workforce
- ② search for water sources by measuring distance
- ③ decrease the colony's workload when necessary
- ④ divide tasks according to their respective talents
- ⑤ train workers to acquire basic communication patterns

3. 주어진 글 다음에 이어질 글의 순서로 가장 적절한 것은?

Negotiation can be defined as an attempt to explore and reconcile conflicting positions in order to reach an acceptable outcome.

- (A) Areas of difference can and do frequently remain, and will perhaps be the subject of future negotiations, or indeed remain irreconcilable. In those instances in which the parties have highly antagonistic or polarised relations, the process is likely to be dominated by the exposition, very often in public, of the areas of conflict.
- (B) In these and sometimes other forms of negotiation, negotiation serves functions other than reconciling conflicting interests. These will include delay, publicity, diverting attention or seeking intelligence about the other party and its negotiating position.
- (C) Whatever the nature of the outcome, which may actually favour one party more than another, the purpose of negotiation is the identification of areas of common interest and conflict. In this sense, depending on the intentions of the parties, the areas of common interest may be clarified, refined and given negotiated form and substance.

*reconcile: 화해시키다 **antagonistic: 적대적인 ***exposition: 설명

4. 주어진 글 다음에 이어질 글의 순서로 가장 적절한 것은? (3점)

Experts have identified a large number of measures that promote energy efficiency. Unfortunately many of them are not cost effective. This is a fundamental requirement for energy efficiency investment from an economic perspective.

- (A) But the direct cost reductions at the individual level... households can reduce the cost of electricity and gas bills, and improve their health and comfort, while companies can increase their competitiveness and their productivity. Finally, the market for energy efficiency could contribute to the economy through job and firms creation.
- (B) There are significant externalities to take into account and there are also macroeconomic effects. For instance, at the aggregate level, improving the level of national energy efficiency has positive effects on macroeconomic issues such as energy dependence, climate change, health, national competitiveness and reducing fuel poverty.
- (C) However, the calculation of such cost effectiveness is not easy. It is not simply a case of looking at private costs and comparing them to the reduction achieved.

5. 글의 흐름으로 보아, 주어진 문장이 들어가기에 가장 적절한 곳을 고르시오. (3점)

Unfortunately, at the scales, accuracy, and precision most useful to protected area management, the future not only promises to be unprecedented, but it also promises to be unpredictable.

To decide whether and how to intervene in ecosystems, protected area managers normally need a reasonably clear idea of what future ecosystems would be like if they did not intervene. (①) Management practices usually involve defining a more desirable future condition and implementing management actions designed to push or guide ecosystems toward that condition. (②) Managers need confidence in the likely outcomes of their interventions. (③) This traditional and inherently logical approach requires a high degree of predictive ability, and predictions must be developed at appropriate spatial and temporal scales, often localized and near-term. (④) To illustrate this, consider the uncertainties involved in predicting climatic changes, how ecosystems are likely to respond to climatic changes, and the likely efficacy of actions that might be taken to counter adverse effects of climatic changes. (⑤) Comparable uncertainties surround the nature and magnitude of future changes in other ecosystem stressors.

6. 글의 흐름으로 보아, 주어진 문장이 들어가기에 가장 적절한 곳을 고르시오.

A problem, however, is that supervisors often work in locations apart from their employees and therefore are not able to observe their subordinates' performance.

In most organizations, the employee's immediate supervisor evaluates the employee's performance. (①) This is because the supervisor is responsible for the employee's performance, providing supervision, handing out assignments, and developing the employee. (②) Should supervisors rate employees on performance dimensions they cannot observe? (③) To eliminate this dilemma, more and more organizations are implementing assessments referred to as 360-degree evaluations. (④) Employees are rated not only by their supervisors but by coworkers, clients or citizens, professionals in other agencies with whom they work, and subordinates. (⑤) The reason for this approach is that often coworkers and clients or citizens have a greater opportunity to observe an employee's performance and are in a better position to evaluate many performance dimensions.

정답 및 해설

1. [정답] ⑤

[해설]

필자는 시간을 과거, 현재, 미래로 엄격히 구분하는 인식이 기후 변화에 대한 우리의 책임을 보지 못하게 만든다고 주장한다. 문제의 본질은 시간 분할로 인해 현실이 가려져(realities are obscured) 책임의 문제가 자연스럽게 떠오르지 않는다는 것이다. 따라서 빈칸에는 '우리가 사실을 직시하고 나서 책임을 부정하는 것'이 아니라는 내용이 들어가야, 문제의 원인이 의도적인 부정이 아니라 구조적인 인식의 왜곡에 있다는 글의 핵심 논리와 부합한다.

2. [정답] ①

[해설]

이 글은 개별 꿀벌이 국지적 정보(물을 받아줄 벌을 찾는 데 걸리는 시간)에 반응하여 자신의 행동(춤을 추어 다른 벌을 모집하거나, 물 수집을 포기)을 바꾸는 사례를 보여준다. 이러한 개별적 행동의 총합이 결과적으로 군집 전체의 필요에 맞춰 물 수집량을 조절하는(regulates water collection) 효과를 낳는다. 즉, 개별 꿀벌들의 행동 변화가 '군집으로 하여금 노동력을 조절할 수 있게 한다(allow the colony to regulate its workforce)'는 것을 보여주는 예시이다.

3. [정답] ④

[해설]

주어진 글은 협상을 '수용 가능한 결과'에 도달하려는 시도로 정의합니다. (C)는 '결과의 성격이 어떻든(Whatever the nature of the outcome)'으로 이 내용을 이어받으며, 협상의 목적이 공통 관심사와 갈등 분야를 확인하는 것임을 설명합니다. (C)의 후반부에서 '공통의 관심 분야'를 언급한 후, (A)는 '차이의 영역(Areas of difference)'이 남을 수 있다고 대조하며 내용을 전개하고, 적대적 관계에서의 협상을 언급합니다. (B)는 '이러한 형태의 협상(In these... forms of negotiation)'으로 (A)의 적대적 협상을 지칭하며, 이해관계 조율 외에 협상의 다른 기능(지연, 홍보 등)을 설명하는 흐름으로 이어지는 것이 가장 자연스럽습니다. 따라서 정답은 (C)-(A)-(B)입니다.

4. [정답] ⑤

[해설]

제시문은 에너지 효율성 투자의 기본 요건으로 '비용 효율성(cost effective)'을 언급합니다. (C)는 'However'를 통해 이러한 비용 효율성 계산이 단순하지 않다고 문제를 제기합니다. (B)는 (C)에 대한 구체적인 설명으로, 비용 효율성 계산 시 고려해야 할 '외부 효과(externalities)'와 '거시 경제적 효과(macroeconomic effects)'를 제시합니다. (A)는 개인 및 시장 수준에서의 또 다른 경제적 이점(경쟁력 향상, 일자리 창출 등)을 추가로 설명하며 논의를 확장합니다. 따라서 문제 제기(C) -> 구체적 설명(B) -> 추가 정보(A)의 흐름인 (C)-(B)-(A)가 가장 자연스럽습니다.

5. [정답] ④

[해설]

The sentence before slot ④ establishes the need for 'a high degree of predictive ability' at 'appropriate spatial and temporal scales' for traditional ecosystem management. The inserted sentence begins with 'Unfortunately' and directly counters this by stating that at these very scales, the future is 'unpredictable.' The sentence after slot ④ begins with 'To illustrate this,' which logically refers to the unpredictability just introduced in the inserted sentence.

6. [정답] ②

[해설]

주어진 문장은 'however'를 통해 앞 내용과 대조되며, 관리자가 직원의 성과를 관찰할 수 없는 '문제 (problem)'를 제기한다. ① 다음 문장은 관리자가 평가하는 이유를 설명하므로 흐름이 자연스럽다. 하지만 ② 다음에 나오는 'Should supervisors rate employees on performance dimensions they cannot observe?' (관리자가 관찰할 수 없는 성과 차원에 대해 평가해야 하는가?)라는 질문은, '관찰할 수 없는 문제'가 먼저 제시되어야만 나올 수 있다. 따라서 주어진 문장은 이 질문 바로 앞인 ②에 들어가는 것이 가장 적절하다.
