

2027학년도 수능 대비 모의평가

1. 다음 빈칸에 들어갈 말로 가장 적절한 것을 고르시오.

Ever since the early Enlightenment, preservation and conservation have been closely related. Taken as near synonyms, their meaning is to maintain an object or system insofar as possible in its present state, to protect it from change, usually for contemplation, research, display, and perhaps for use. Conservationists who distinguish their activities from preservation emphasize conservation's restorative aspects — restoring a historical musical instrument, for example, or a painting, or a dinosaur, or an ecosystem. Conservationists acknowledge change but try to manage it in order to prolong a(n) _____ state. Preservationists (who may nonetheless call themselves conservationists) think of themselves more as protectors. They sometimes criticize conservationists for setting an additional priority on yield or harvest or use, rather than interfering as minimally as possible in order to preserve the original object or system, as they would do. Preservationists would, for example, prefer to keep a historical musical instrument "as found" in a deteriorated state, for study, rather than to restore or repair it for display or use.

- ① desired
- ② unstable
- ③ isolated
- ④ natural
- ⑤ delicate

2. 다음 빈칸에 들어갈 말로 가장 적절한 것을 고르시오.

The basic guidelines for good style are not mysterious; in fact, you use them every day in conversation. In conversation and in writing, we all rely heavily on cooperation to make sense of exchanges, and a polished practical style makes cooperation easier. Writers develop such a style by acknowledging that readers expect the same things that listeners expect in conversation: clarity, relevance, and proportion. If you listen to someone who is not clear, who cannot stay on the topic, or who offers too much or too little information, you will quickly lose interest in the conversation. Writers, too, need to be clear, stay on the topic, and give information appropriately. In fact, this attention to audience and appropriateness may be even more important in writing than in conversation because writing does not permit the nonverbal communication and immediate feedback that are part of conversation. As writers, we have to _____; in effect, we have to imagine both halves of a virtual conversation.

- ① recognize the limitations of writing and conversation
- ② envision the reader's preference for stylistic writing
- ③ picture the reader's desire for more knowledge
- ④ develop collaborative writing with readers
- ⑤ anticipate the absent reader's response

3. 주어진 글 다음에 이어질 글의 순서로 가장 적절한 것은?

Philosophy allows us to ask much broader questions than many other scientific disciplines. It is capable of looking at the bigger picture and providing important insights into the relationships between different areas of knowledge.

- (A) This means that while philosophy can provide valuable insights into theoretical concepts and broader ethical questions, it needs to be supplemented by empirical findings and experiments to reach a more comprehensive understanding.
- (B) Philosophers tend to ask questions rather than provide definitive answers, and their contributions often consist of challenging established assumptions and proposing new research approaches. However, for a more comprehensive understanding of the nature of consciousness, close collaboration between philosophy and neuroscience is required.
- (C) Philosophy is particularly important for the interdisciplinary efforts of cognitive science, where it helps to bridge gaps between different disciplines and pioneer new ways for research. Unlike scientific methods, philosophizing is a non-empirical approach that attempts to validate concepts through logical thinking and argumentation.

4. 주어진 글 다음에 이어질 글의 순서로 가장 적절한 것은?

If we take an evolutionary look at our beginnings, we see a life in which high levels of physical activity were required for survival.

- (A) There are fewer manual jobs, we do not need to travel on foot, we do not need to hunt and harvest for our food, and many domestic chores have been mechanized. While these changes have created many benefits for our longevity and quality of life, they have also created many problems.
- (B) Lack of sufficient physical activity has now been linked to at least 17 unhealthy conditions, almost all of which are chronic diseases or considered risk factors for chronic diseases. Adrienne Hardman has summarized this serious situation for public health: "Physical inactivity is a waste of human potential for health and well-being."
- (C) Even one century ago, most people needed to be physically active to work, to travel, and to take care of homes and families. Our modern world has engineered such activity out of our lives.

5. 글의 흐름으로 보아, 주어진 문장이 들어가기에 가장 적절한 곳을 고르시오.

It was not until relatively recent times that scientists came to understand the relationships between the structural elements of materials and their properties.

The earliest humans had access to only a very limited number of materials, those that occur naturally: stone, wood, clay, skins, and so on. (①) With time, they discovered techniques for producing materials that had properties superior to those of the natural ones; these new materials included pottery and various metals. (②) Furthermore, it was discovered that the properties of a material could be altered by heat treatments and by the addition of other substances. (③) At this point, materials utilization was totally a selection process that involved deciding from a given, rather limited set of materials, the one best suited for an application based on its characteristics. (④) This knowledge, acquired over approximately the past 100 years, has empowered them to fashion, to a large degree, the characteristics of materials. (⑤) Thus, tens of thousands of different materials have evolved with rather specialized characteristics that meet the needs of our modern and complex society, including metals, plastics, glasses, and fibers.

6. 글의 흐름으로 보아, 주어진 문장이 들어가기에 가장 적절한 곳을 고르시오. (3점)

To minimize vortex shedding, skyscraper designers do everything in their powers to confuse the wind.

To minimize building costs and maximize revenues, skyscrapers generally take the shape of squares or rectangles. These are not particularly aerodynamic shapes, and this results in a wind phenomenon called "vortex shedding." As wind meets a rectangular skyscraper it pushes on the flat face of the building before flowing around its sides, where eventually it separates from the face of the structure. (①) The difference in pressures on the front and back faces of the building gives rise to vortices, or spinning currents of wind, that flow downstream from the building. (②) The vortices pull and push the building in a direction perpendicular to the wind at frequencies that can become dangerously self-sustaining. (③) Orienting the building so that the longer face of the structure is parallel with prevailing winds can help. (④) Chopping or rounding off corners of a building can likewise make it more aerodynamic. (⑤) Roughing up the corners of the building through the careful placement of balconies or stepped corners can help by disturbing or delaying the formation of strong vortices.

정답 및 해설

1. [정답]

[해설]

보존론자(conservationist)는 대상을 원하는 상태로 유지하기 위해 변화를 관리한다는 내용이다. 앞부분에서 preservation과 conservation의 의미가 '현재 상태를 유지하는 것'이라고 했으므로, 그들이 지속시키고자 하는 상태는 그들이 '바라는(desired)' 상태라고 볼 수 있다.

2. [정답] ⑤

[해설]

글쓰기는 대화와 달리 비언어적 소통과 즉각적인 피드백이 불가능하므로 독자에 대한 고려가 더 중요하다고 말한다. 따라서 작가는 독자가 그 자리에 없기 때문에, 독자가 어떻게 반응할지를 미리 예측하고 상상해야 한다. 이는 '자리에 없는 독자의 반응을 예상해야 한다(anticipate the absent reader's response)'는 말과 같다. 바로 뒤에 이어지는 '가상 대화의 양쪽 절반을 상상해야 한다'는 표현이 이를 뒷받침한다.

3. [정답] ④

[해설]

주어진 글은 철학이 더 넓은 질문을 던지고 지식 분야 간의 관계에 대한 통찰을 제공한다고 말한다. (C)는 이를 구체화하여 철학이 인지 과학 같은 학제 간 연구에서 중요하며, '비경험적(non-empirical) 접근'이라는 특징을 설명한다. (A)는 'This means that'을 통해 (C)에서 언급된 '비경험적' 특징 때문에 철학이 경험적 연구 결과에 의해 보완될 필요가 있음을 논리적으로 연결한다. (B)는 철학자들이 주로 질문을 던지는 역할을 하지만, 포괄적인 이해를 위해서는 철학과 신경과학(경험 과학의 예) 간의 긴밀한 협력이 필요하다고 결론 내리며 (A)의 내용을 구체화하고 마무리한다. 따라서 (C)-(A)-(B) 순서가 가장 적절하다.

4. [정답] ④

[해설]

제시문은 과거 생존을 위해 높은 신체 활동이 필요했음을 언급한다. (C)는 '불과 1세기 전'으로 시간대를 좁혀 과거와 현재를 연결하며, 현대 사회가 신체 활동을 없앴다고 설명한다. (A)는 (C)의 내용에 대한 구체적인 예시(수작업 감소 등)를 들고, '이러한 변화들(these changes)'이라는 지시어로 (C)의 내용을 받는다. (B)는 (C)와 (A)에서 설명한 '충분한 신체 활동 부족(Lack of sufficient physical activity)'이 건강에 미치는 부정적인 결과를 요약하며 글을 마무리한다. 따라서 (C)-(A)-(B)가 가장 논리적인 순서이다.

5. [정답] ④

[해설]

주어진 문장은 '비교적 최근에 와서야' 과학자들이 재료의 구조와 특성 간의 관계를 이해하게 되었다는 내용으로, 과학적 이해의 전환점을 나타낸다. (④) 앞 문장까지는 재료 활용이 주어진 것들 중 '선택하는 과정(a selection process)'이었다고 과거의 방식을 설명한다. (④) 뒤 문장은 'This knowledge'로 시작하는데, 이 지식은 바로 주어진 문장에서 언급된 '재료의 구조와 특성 간의 관계에 대한 이해'를 가리킨다. 이 지식을 통해 재료의 특성을 '만들어 낼(fashion)' 수 있게 되었다는 내용은 과거의 '선택' 방식과 명확한 대조를 이루므로, 주어진 문장은 (④)에 들어가는 것이 가장 적절하다.

6. [정답]

[해설]

주어진 문장은 '와류 형성을 최소화하기 위해 설계자들이 바람을 혼란스럽게 만든다'는 내용으로, 이는 뒤이어 나오는 구체적 해결책들(건물 방향 조정, 모서리 처리 등)을 소개하는 전환 문장이다. ③ 앞에서는 위험한 자기 유지적 진동 문제를 설명하고, ③ 뒤에서는 해결책(Orienting the building...)이 시작되므로 ③에 삽입되어야 한다.
