

## 2027학년도 수능 대비 모의평가

### 1. 다음 빈칸에 들어갈 말로 가장 적절한 것을 고르시오.

We know that animals have evolved a variety of patterns to manipulate the perceptions of their predators to afford themselves a modicum of safety. Greater Bower birds utilize \_\_\_\_\_ in the mating domain. Males construct a bower; its function is to provide an arena in which males display to females standing in an avenue that leads up to the bower. The males decorate the avenue with a variety of objects, such as stones and shells. But they do not do so in a chaotic manner. The larger objects are placed closer to the bower and the smaller objects farther away. This creates a forced perspective the opposite of the Cinderella Castle; the bower appears smaller than it actually is. Endler and his colleagues suggested that the male courting in the bower now appears larger and thus more attractive to the female. Data on male mating success collected in the wild supports their hypothesis.

- ① genetic variations
- ② perceptual biases
- ③ vocal attractiveness
- ④ decorating skills
- ⑤ locational advantages

It is important to recognise the interdependence between individual, culturally formed actions and the state of cultural integration. People work within the forms provided by the cultural patterns that they have internalised, however contradictory these may be. Ideas are worked out as logical implications or consequences of other accepted ideas, and it is in this way that cultural innovations and discoveries are possible. New ideas are discovered through logical reasoning, but such discoveries are inherent in and integral to the conceptual system and are made possible only because of the acceptance of its premises. For example, the discoveries of new prime numbers are 'real' consequences of the particular number system employed. Thus, cultural ideas show 'advances' and 'developments' because they . The cumulative work of many individuals produces a corpus of knowledge within which certain 'discoveries' become possible or more likely. Such discoveries are 'ripe' and could not have occurred earlier and are also likely to be made simultaneously by numbers of individuals. 3점

\*corpus: 집적( ) \*\*simultaneously: 동시에

- ① are outgrowths of previous ideas
- ② stem from abstract reasoning ability
- ③ form the basis of cultural universalism
- ④ emerge between people of the same age
- ⑤ promote individuals' innovative thinking

The fossil record provides evidence of evolution. The story the fossils tell is one of change. Creatures existed in the past that are no longer with us. Sequential changes are found in many fossils showing the change of certain features over time from a common ancestor, as in the case of the horse.

- (A) If multicelled organisms were indeed found to have evolved before single-celled organisms, then the theory of evolution would be rejected. A good scientific theory always allows for the possibility of rejection. The fact that we have not found such a case in countless examinations of the fossil record strengthens the case for evolutionary theory.
- (B) The fossil record supports this prediction —multicelled organisms are found in layers of earth millions of years after the first appearance of single-celled organisms. Note that the possibility always remains that the opposite could be found.
- (C) Apart from demonstrating that evolution did occur, the fossil record also provides tests of the predictions made from evolutionary theory. For example, the theory predicts that single-celled organisms evolved before multicelled organisms.

There are a number of human resource management practices that are necessary to support organizational learning.

- (A) Their role should be to assist, consult, and advise teams on how best to approach learning. They must be able to develop new mechanisms for cross-training peers — team members — and new systems for capturing and sharing information. To do this, human resource development professionals must be able to think systematically and understand how to promote learning within groups and across the organization.
- (B) For example, performance evaluation and reward systems that reinforce long-term performance and the development and sharing of new skills and knowledge are particularly important. In addition, the human resource development function may be dramatically changed to keep the emphasis on continuous learning.
- (C) In a learning organization, every employee must take the responsibility for acquiring and transferring knowledge. Formal training programs, developed in advance and delivered according to a preset schedule, are insufficient to address shifting training needs and encourage timely information sharing. Rather, human resource development professionals must become learning facilitators. 3점

Continuous emissions measurement can be costly, particularly where there are many separate sources of emissions, and for many pollution problems this may be a major disincentive to direct taxation of emissions.

Environmental taxes based directly on measured emissions can, in principle, be very precisely targeted to the policy's environmental objectives. ( ① ) If a firm pollutes more, it pays additional tax directly in proportion to the rise in emissions. ( ② ) The polluter thus has an incentive to reduce emissions in any manner that is less costly per unit of abatement than the tax on each unit of residual emissions. ( ③ ) The great attraction of basing the tax directly on measured emissions is that the actions the polluter can take to reduce tax liability are actions that also reduce emissions. ( ④ ) Nevertheless, the technologies available for monitoring the concentrations and flows of particular substances in waste discharges have been developing rapidly. ( ⑤ ) In the future, it may be possible to think of taxing measured emissions in a wider range of applications.

주어진 문장 Continuous emissions measurement can be costly, particularly where there are many separate sources of emissions, and for many pollution problems this may be a major disincentive to direct taxation of emissions.

6. 글의 흐름으로 보아, 주어진 문장이 들어가기에 가장 적절한 곳을 고르시오. (3점)

On top of the hurdles introduced in accessing his or her money, if a suspected fraud is detected, the account holder has to deal with the phone call asking if he or she made the suspicious transactions.

Each new wave of technology is intended to enhance user convenience, as well as improve security, but sometimes these do not necessarily go hand-in-hand. For example, the transition from magnetic stripe to embedded chip slightly slowed down transactions, sometimes frustrating customers in a hurry. ( ① ) Make a service too burdensome, and the potential customer will go elsewhere. ( ② ) This obstacle applies at several levels. ( ③ ) Passwords, double-key identification, and biometrics such as fingerprint-, iris-, and voice recognition are all ways of keeping the account details hidden from potential fraudsters, of keeping your data dark. ( ④ ) But they all inevitably add a burden to the use of the account. ( ⑤ ) This is all useful at some level — indeed, it can be reassuring knowing that your bank is keeping alert to protect you — but it becomes tiresome if too many such calls are received.
