

2027학년도 수능 대비 모의평가

1. 다음 빈칸에 들어갈 말로 가장 적절한 것을 고르시오.

Over the last decade the attention given to how children learn to read has foregrounded the nature of textuality, and of the different, interrelated ways in which readers of all ages make texts mean. 'Reading' now applies to a greater number of representational forms than at any time in the past: pictures, maps, screens, design graphics and photographs are all regarded as text. In addition to the innovations made possible in picture books by new printing processes, design features also predominate in other kinds, such as books of poetry and information texts. Thus, reading becomes a more complicated kind of interpretation than it was when children's attention was focused on the printed text, with sketches or pictures as an adjunct. Children now learn from a picture book that words and illustrations complement and enhance each other. Reading is not simply . Even in the easiest texts, what a sentence 'says' is often not what it means.

- ① knowledge acquisition
- ② word recognition
- ③ imaginative play
- ④ subjective interpretation
- ⑤ image mapping

2. 다음 빈칸에 들어갈 말로 가장 적절한 것을 고르시오. (3점)

Although empathy is widely praised by scholars and public figures, not everyone is an empathy booster. Critics of empathy argue that empathy will not save us from interpersonal and intergroup conflict. In fact, they argue, empathy makes such conflicts worse. These critics maintain that empathy can be exhausting and lead to burnout, insensitivity to suffering, or worse. They argue that we tend to empathize strongly with our in-group and resist empathizing with out-groups, and even enjoy the suffering of out-groups in competitive or threatening contexts. Thus, the prescription for more empathy _____. Empathy, they argue, can further entrench conflict and force us into an us vs. them mentality. Finally, even when we try to empathize with others who are dissimilar from us or in unfamiliar contexts, sometimes we are unable to accurately empathize with their experiences, causing further misunderstandings and frustration. Critics of empathy argue that we should give up on empathy and employ other tools in pursuit of social harmony, e.g., rational compassion or moral emotions like fear, anger, and shame.

- ① underestimates the invisible conflicts possible within a group
- ② is triggered by the need for solutions to emotional conflicts
- ③ is often counterproductive in cases of conflict
- ④ functions as a facilitator in the resolution of social disharmony
- ⑤ raises questions about negative attitudes toward social disharmony

3. 주어진 글 다음에 이어질 글의 순서로 가장 적절한 것은?

A fascinating species of water flea exhibits a kind of flexibility that evolutionary biologists call adaptive plasticity.

- (A) That's a clever trick, because producing spines and a helmet is costly, in terms of energy, and conserving energy is essential for an organism's ability to survive and reproduce. The water flea only expends the energy needed to produce spines and a helmet when it needs to.
- (B) If the baby water flea is developing into an adult in water that includes the chemical signatures of creatures that prey on water fleas, it develops a helmet and spines to defend itself against predators. If the water around it doesn't include the chemical signatures of predators, the water flea doesn't develop these protective devices.
- (C) So it may well be that this plasticity is an adaptation: a trait that came to exist in a species because it contributed to reproductive fitness. There are many cases, across many species, of adaptive plasticity. Plasticity is conducive to fitness if there is sufficient variation in the environment.

*spine: 가시 돌기 **conductive: 도움되는

| ⑤ (C) - (B) - (A) | |

4. 주어진 글 다음에 이어질 글의 순서로 가장 적절한 것은?

In the fifth century B.C.E., the Greek philosopher Protagoras pronounced, "Man is the measure of all things." In other words, we feel entitled to ask the world, "What good are you?"

- (A) Abilities said to "make us human" — empathy, communication, grief, toolmaking, and so on — all exist to varying degrees among other minds sharing the world with us. Animals with backbones (fishes, amphibians, reptiles, birds, and mammals) all share the same basic skeleton, organs, nervous systems, hormones, and behaviors.
- (B) We assume that we are the world's standard, that all things should be compared to us. Such an assumption makes us overlook a lot.
- (C) Just as different models of automobiles each have an engine, drive train, four wheels, doors, and seats, we differ mainly in terms of our outside contours and a few internal tweaks. But like naive car buyers, most people see only animals' varied exteriors.

*contour: 윤곽, 외형 **tweak: 조정, 개조

| ⑤ (C) - (B) - (A) | |

5. 글의 흐름으로 보아, 주어진 문장이 들어가기에 가장 적절한 곳을 고르시오.

Also, it has become difficult for companies to develop new pesticides, even those that can have major beneficial effects and few negative effects.

Simply maintaining yields at current levels often requires new cultivars and management methods, since pests and diseases continue to evolve, and aspects of the chemical, physical, and social environment can change over several decades. (①) In the 1960s, many people considered pesticides to be mainly beneficial to mankind. (②) Developing new, broadly effective, and persistent pesticides often was considered to be the best way to control pests on crop plants. (③) Since that time, it has become apparent that broadly effective pesticides can have harmful effects on beneficial insects, which can negate their effects in controlling pests, and that persistent pesticides can damage non-target organisms in the ecosystem, such as birds and people. (④) Very high costs are involved in following all of the procedures needed to gain government approval for new pesticides. (⑤) Consequently, more consideration is being given to other ways to manage pests, such as incorporating greater resistance to pests into cultivars by breeding and using other biological control methods.

6. 글의 흐름으로 보아, 주어진 문장이 들어가기에 가장 적절한 곳을 고르시오.

When the team painted fireflies' light organs dark, a new set of bats took twice as long to learn to avoid them.

Fireflies don't just light up their behinds to attract mates, they also glow to tell bats not to eat them. This twist in the tale of the trait that gives fireflies their name was discovered by Jesse Barber and his colleagues. The glow's warning role benefits both fireflies and bats, because these insects taste disgusting to the mammals. (①) When swallowed, chemicals released by fireflies cause bats to throw them back up. (②) The team placed eight bats in a dark room with three or four fireflies plus three times as many tasty insects, including beetles and moths, for four days. (③) During the first night, all the bats captured at least one firefly. (④) But by the fourth night, most bats had learned to avoid fireflies and catch all the other prey instead. (⑤) It had long been thought that firefly bioluminescence mainly acted as a mating signal, but the new finding explains why firefly larvae also glow despite being immature for mating.

정답 및 해설

1. [정답] ②

[해설]

이 글은 현대의 '읽기'가 단순히 인쇄된 글자를 해독하는 행위를 넘어, 그림, 사진, 디자인 등 다양한 시각적 요소를 포함하는 복합적인 '해석(interpretation)' 활동으로 확장되었음을 설명합니다. 글과 삽화가 서로를 보완하고 향상시킨다는 점, 문장이 말하는 바가 곧 의미하는 바가 아니라는 점을 통해, 읽기가 과거의 단순한 개념을 넘어섰음을 보여줍니다. 따라서 읽기는 단순히 '단어를 인식하는(word recognition)' 행위가 아니라는 결론이 가장 자연스럽습니다.

2. [정답] ③

[해설]

이 글은 공감(empathy)이 갈등을 해결하기보다 오히려 악화시킬 수 있다는 비판적 견해를 소개한다. 공감은 내집단에 편향되고, 갈등을 심화시키며, '우리 대 그들'이라는 사고방식을 강요할 수 있다고 주장한다. 따라서 '더 많은 공감을 하라'는 처방(prescription for more empathy)은 갈등 상황에서 종종 '역효과를 낳는다(is often counterproductive)'는 결론에 이를 수 있다.

3. [정답] ②

[해설]

주어진 문장에서 물벼룩의 '적응적 가소성(adaptive plasticity)'을 소개한다. (B)는 이 가소성이 무엇인지 구체적으로 설명한다(포식자가 있으면 방어 기제를 만들고, 없으면 만들지 않음). (A)는 'That's a clever trick'으로 (B)의 내용을 받아, 그것이 에너지를 보존하는 효율적인 전략임을 부연 설명한다. (C)는 'So'로 시작하여 앞선 내용을 종합하며, 이러한 가소성이 생존에 기여하는 '적응' 형질임을 결론 내리고 일반화한다. 따라서 '개념 소개 → 구체적 설명 → 부연 설명 → 결론 및 일반화'의 흐름인 (B)-(A)-(C)가 가장 자연스럽다.

4. [정답] ②

[해설]

주어진 글은 '인간이 만물의 척도'라는 인간 중심적 사고방식을 소개한다. (B)는 'Such an assumption(그러한 가정)'이라는 표현으로 이 사고방식을 직접 받아, 우리가 세상의 기준이라고 가정하며 많은 것을 간과하게 만든다고 설명한다. (A)는 우리가 간과하는 것의 구체적인 예시로, 동물들도 인간과 유사한 능력과 신체 구조를 공유한다는 점을 제시한다. (C)는 자동차 비유를 통해 (A)에서 설명한 '내부 구조는 비슷하고 외부만 다른' 점을 부연 설명하며 글을 마무리한다. 따라서 (B)-(A)-(C) 순서가 가장 자연스럽다.

5. [정답] ④

[해설]

주어진 문장은 '또한, 기업들이 새로운 살충제를 개발하는 것이 어려워졌다'는 내용이다. '또한(Also)'은 앞선 내용에 추가적인 정보를 더할 때 사용된다. ③번 문장에서는 광범위한 살충제의 해로운 효과에 대해 언급했다. 주어진 문장은 이러한 문제에 더하여 '개발의 어려움'이라는 또 다른 문제를 제시한다. 그리고 ④번 다음 문장에서는 '새로운 살충제에 대한 정부 승인을 얻는 데 필요한 절차를 따르는 데 매우 높은 비용이 수반된다'고 하여 주어진 문장에서 언급한 '개발이 어려운' 이유를 구체적으로 설명하고 있다. 따라서 주어진 문장은 ④번에 들어가는 것이 가장 자연스럽다.

6. [정답] ⑤

[해설]

주어진 문장은 '반딧불이의 발광 기관을 어둡게 칠했을 때, 박쥐들이 그것들을 피하는 법을 배우는 데 두 배나 더 오래 걸렸다'는 내용으로, 빛이 경고 신호의 핵심임을 증명하는 통제 실험의 결과입니다. 본문 ④) 다음 문장은 박쥐들이 빛나는 반딧불이를 피하는 것을 배웠다는 주 실험의 결과를 보여줍니다. 이 주장의 결정적인 증거로서 통제 실험 결과를 제시하는 것이 가장 논리적이므로, ⑤)의 위치가 가장 적절합니다. 이 증거를 통해 '새로운 발견(the new finding)'에 대한 설명으로 자연스럽게 이어질 수 있습니다.
