Education, at its best, teaches more than just knowledge. It teaches critical thinking: the ability to stop and think before acting, to avoid succumbing to emotional pressures. This is not thought control. It is the very reverse: mental liberation. Even the most advanced intellectual will be imperfect at this skill. But even imperfect possession of it _____ of being 'stimulus-driven', constantly reacting to the immediate environment, the brightest colours or loudest sounds. Being driven by heuristic responses, living by instinct and emotion all the time, is a very easy way to live, in many ways: thought is effortful, especially for the inexperienced. But emotions are also exhausting, and short-term reactions may not, in the long term, be the most beneficial for health and survival. Just as we reach for burgers for the sake of convenience, storing up the arterial fat which may one day kill us, so our reliance on feelings can do us great harm.

- ① intensifies people's danger
- ② enhances our understanding
- ③ frees a person from the burden
- ④ allows us to accept the inevitability
- ⑤ requires one to have the experience

In labor-sharing groups, people contribute labor to other people on a regular basis (for seasonal agricultural work such as harvesting) or on an irregular basis (in the event of a crisis such as the need to rebuild a barn damaged by fire). Labor sharing groups are part of what has been called a "moral economy" since no one keeps formal records on how much any family puts in or takes out. Instead, accounting is . The group has a sense of moral community based on years of trust and sharing. In a certain community of North America, labor sharing is a major economic factor of social cohesion. When a family needs a new barn or faces repair work that requires group labor, a barn-raising party is called. Many families show up to help. Adult men provide manual labor, and adult women provide food for the event. Later, when another family needs help, they call on the same people.

- ① legally established
- ② regularly reported
- ③ socially regulated
- ④ manually calculated
- ⑤ carefully documented

Studies of people struggling with major health problems show that the majority of respondents report they derived benefits from their adversity. Stressful events sometimes force people to develop new skills, reevaluate priorities, learn new insights, and acquire new strengths.

- (A) High levels of adversity predicted poor mental health, as expected, but people who had faced intermediate levels of adversity were healthier than those who experienced little adversity, suggesting that moderate amounts of stress can foster resilience. A follow-up study found a similar link between the amount of lifetime adversity and subjects' responses to laboratory stressors.
- (B) Intermediate levels of adversity were predictive of the greatest resilience. Thus, having to deal with a moderate amount of stress may build resilience in the face of future stress.
- (C) In other words, the adaptation process initiated by stress can lead to personal changes for the better. One study that measured participants' exposure to thirty-seven major negative events found a curvilinear relationship between lifetime adversity and mental health.

The fruit ripening process brings about the softening of cell walls, sweetening and the production of chemicals that give colour and flavour. The process is induced by the production of a plant hormone called ethylene.

- (A) If ripening could be slowed down by interfering with ethylene production or with the processes that respond to ethylene, fruit could be left on the plant until it was ripe and full of flavour but would still be in good condition when it arrived at the supermarket shelf.
- (B) In some countries they are then sprayed with ethylene before sale to the consumer to induce ripening. However, fruit picked before it is ripe has less flavour than fruit picked ripe from the plant. Biotechnologists therefore saw an opportunity in delaying the ripening and softening process in fruit.
- (C) The problem for growers and retailers is that ripening is followed sometimes quite rapidly by deterioration and decay and the product becomes worthless. Tomatoes and other fruits are, therefore, usually picked and transported when they are unripe. 3점

As long as the irrealism of the silent black and white film predominated, one could not take filmic fantasies for representations of reality.

Cinema is valuable not for its ability to make visible the hidden outlines of our reality, but for its ability to reveal what reality itself veils — the dimension of fantasy. (㉠) This is why, to a person, the first great theorists of film decried the introduction of sound and other technical innovations (such as color) that pushed film in the direction of realism. (㉡) Since cinema was an entirely fantasmatic art, these innovations were completely unnecessary. (㉢) And what's worse, they could do nothing but turn filmmakers and audiences away from the fantasmatic dimension of cinema, potentially transforming film into a mere delivery device for representations of reality. (㉣) But sound and color threatened to create just such an illusion, thereby destroying the very essence of film art. (㉤) As Rudolf Arnheim puts it, "The creative power of the artist can only come into play where reality and the medium of representation do not coincide."

This is particularly true since one aspect of sleep is decreased responsiveness to the environment.

The role that sleep plays in evolution is still under study. (㉠) One possibility is that it is an advantageous adaptive state of decreased metabolism for an animal when there are no more pressing activities. (㉡) This seems true for deeper states of inactivity such as hibernation during the winter when there are few food supplies, and a high metabolic cost to maintaining adequate temperature. (㉢) It may be true in daily situations as well, for instance for a prey species to avoid predators after dark. (㉣) On the other hand, the apparent universality of sleep, and the observation that mammals such as cetaceans have developed such highly complex mechanisms to preserve sleep on at least one side of the brain at a time, suggests that sleep additionally provides some vital service(s) for the organism. (㉤) If sleep is universal even when this potential price must be paid, the implication may be that it has important functions that cannot be obtained just by quiet, wakeful resting.

교육이 가르치는 비판적 사고는 '정신적 해방(mental liberation)'이며, 이는 '자극 주도적인(stimulus-driven)' 상태, 즉 즉각적인 환경에 계속 반응하는 것과는 정반대라고 설명한다. 따라서 비판적 사고 능력을 불완전하게라도 소유하는 것은, '자극 주도적'이 되어야 하는 '부담으로부터 개인을 자유롭게 한다(frees a person from the burden)'는 내용이 들어가는 것이 가장 논리적이다.

2. [정답] ③

노동 공유 집단에서는 누가 얼마나 기여했는지 공식적인 기록(formal records)을 남기지 않고, 대신 수년간의 신뢰와 공유에 기반한 '도덕 공동체 의식(sense of moral community)'으로 운영됩니다. 이는 법적 강제나 공식 기록이 아닌, 공동체의 상호 신뢰와 암묵적 규범, 즉 '사회적으로 규제되는(socially regulated)' 방식으로 회계가 이루어짐을 의미합니다.

3. [정답] ④

주어진 글은 역경(adversity)이 긍정적 변화를 가져올 수 있다고 말합니다. (C)는 'In other words'로 주어진 글의 내용을 재진술하며, 역경과 정신 건강 사이의 '곡선 관계(curvilinear relationship)'를 발견한 연구를 소개합니다. (A)는 (C)에서 언급된 '곡선 관계'를 구체적으로 설명합니다(높은 수준/중간 수준/적은 수준의 역경). (B)는 (A)의 내용을 'Thus'로 요약하며, 중간 수준의 역경이 회복력을 예측한다는 결론을 내립니다. 따라서 C-A-B 순서가 자연스럽습니다.

4. [정답] ⑤

주어진 글은 에틸렌이 과일 숙성을 유발한다고 설명합니다. (C)는 이로 인해 재배자와 소매업자에게 발생하는 문제(숙성 후 부패)를 제기하며, 그 해결책으로 과일을 덜 익었을 때 수확한다고 말합니다. (B)는 (C)에서 언급된 미숙 과일에 에틸렌을 뿌리는 후처리 과정을 설명하고, 'However'를 통해 이 방식의 문제점(맛 저하)을 지적합니다. (A)는 (B)에서 제기된 맛 저하 문제를 해결하기 위해, 에틸렌 생산을 방해하여 숙성을 늦추는 생명공학적 가능성을 제시합니다. 따라서 문제 제기(C) → 현재의 불완전한 해결책(B) → 새로운 해결책 모색(A)의 흐름인 C-B-A가 가장 적절합니다.

주어진 문장은 '무성 흑백 영화의 비현실주의(irrealism)가 지배적인 한, 사람들은 영화적 환상을 현실의 재현으로 받아들일 수 없었다'는 내용이다. (④) 앞 문장은 소리, 색채와 같은 기술 혁신이 영화를 현실의 재현을 위한 전달 장치로 변질시킬 수 있다는 우려를 나타낸다. (④) 뒤 문장은 'But sound and color threatened to create just such an illusion'이라며, 소리와 색채가 '바로 그러한 환상'을 만들 위험이 있다고 말한다. 여기서 '그러한 환상'은 '영화를 현실의 재현으로 착각하게 만드는 환상'을 의미한다. 주어진 문장은 소리/색채 이전에는 그런 착각이 없었다는 배경을 제공하므로, (④)에 들어가 '이전에는 비현실적이어서 착각할 일이 없었지만, 소리와 색채가 바로 그런 착각을 불러일으킬 위험이 있다'는 논리적 흐름을 완성한다.

6. [정답] ⑤

주어진 문장은 '이것은 특히 사실이다'로 시작하며, 수면의 한 측면이 환경에 대한 반응성 감소(잠재적 위험)임을 설명한다. ⑤ 앞 문장은 수면이 매우 중요하고 필수적인 서비스를 제공함을 시사한다. ⑤ 다음 문장은 '이러한 잠재적 대가(this potential price)'를 치르면서까지 수면이 보편적이라면, 중요한 기능이 있을 것이라고 말한다. 여기서 'this potential price'가 가리키는 내용이 바로 주어진 문장의 'decreased responsiveness to the environment'이다. 따라서 주어진 문장은 'this potential price'라는 어구가 나오기 직전인 ⑤에 위치해야 문맥이 자연스럽게 연결된다.
