

2027학년도 수능 대비 모의평가

1. 밑줄 친 부분이 다음 글에서 의미하는 바로 가장 적절한 것은?

The single most important change you can make in your working habits is to switch to creative work first, reactive work second. This means blocking off a large chunk of time every day for creative work on your own priorities, with the phone and e-mail off. I used to be a frustrated writer. Making this switch turned me into a productive writer. Yet there wasn't a single day when I sat down to write an article, blog post, or book chapter without a string of people waiting for me to get back to them. It wasn't easy, and it still isn't, particularly when I get phone messages beginning "I sent you an e-mail two hours ago...!" By definition, this approach goes against the grain of others' expectations and the pressures they put on you. It takes willpower to switch off the world, even for an hour. It feels uncomfortable, and sometimes people get upset. But it's better to disappoint a few people over small things, than to abandon your dreams for an empty inbox. Otherwise, you're sacrificing your potential for the illusion of professionalism.

- ① following an innovative course of action
- ② attempting to satisfy other people's demands
- ③ completing challenging work without mistakes
- ④ removing social ties to maintain a mental balance
- ⑤ securing enough opportunities for social networking

2. 다음 글의 제목으로 가장 적절한 것은?

Monasteries were the engine rooms of the Middle Ages. At the height of their activities and influence, monasteries provided intellectual leadership for the institutions of Church and civil governments, innovation in religious thought and practice, medical provision, education, visual culture and agricultural development. They did all this while apparently observing self-imposed isolation from the wider community. For monasteries were intended to function as places set apart from the world, in which monks devoted their lives to a permanent rhythm of religious observance, prayer and study. Religious prayer and praise lay at the heart of monasticism. Both those following this life and those outside believed that monastic lives were led for the benefit of wider society, and that the sacrifices made by monks in separating themselves from 'normal' human contact functioned as penances on behalf of the community as well as for their own deliverance. Monks were regarded as leading parallel lives that had the power to save themselves and others.

- ① How to Gain Religious and Social Benefits from Monastery Life

3. 다음 글의 밑줄 친 부분 중, 어법상 틀린 것은?

As their physical growth and brain development proceed, teens develop more powers of reasoning and begin to think in more complicated, multidimensional ways. They develop more sophisticated abilities to understand ① that there are different ways of looking at a situation and imagining other possibilities for action. As a result of these changes, teens gain new perspectives about their own mothers and fathers. They shed the idealized images of their parents they may have previously held and ② begin to see them more critically, including their weaknesses and flaws. They are more willing and able ③ to challenge and argue with their parents, and there can be increased conflict. Teens' increased abstract reasoning skills also enable them to better understand the complexities of life, including ④ their more fearful aspects. With these more sophisticated powers of reasoning, teenagers find it easier to imagine what others are thinking of them, which can mean their sense of the negative side of things can become ⑤ magnified.

4. 다음 글의 밑줄 친 부분 중, 문맥상 낱말의 쓰임이 적절하지 않은 것은?

In recent years urban transport professionals globally have largely acquiesced to the view that automobile demand in cities needs to be managed rather than accommodated. Rising incomes inevitably lead to increases in motorization. Even without the imperative of climate change, the physical constraints of densely inhabited cities and the corresponding demands of accessibility, mobility, safety, air pollution, and urban livability all ① limit the option of expanding road networks purely to accommodate this rising demand. As a result, as cities develop and their residents become more prosperous, ② persuading people to choose not to use cars becomes an increasingly key focus of city managers and planners. Improving the quality of ③ alternative options, such as walking, cycling, and public transport, is a central element of this strategy. However, the most direct approach to ④ accommodating automobile demand is making motorized travel more expensive or restricting it with administrative rules. The contribution of motorized travel to climate change ⑤ reinforces this imperative.

5. 다음 빈칸에 들어갈 말로 가장 적절한 것을 고르시오. (3점)

City quality is so crucial for optional activities that the extent of staying activities can often be used as a measuring stick for the quality of the city as well as of its space. Many pedestrians in a city are not necessarily an indication of good city quality — many people walking around can often be a sign of insufficient transit options or long distances between the various functions in the city. Conversely, it can be claimed that a city in which many people are not walking often indicates good city quality. In a city like Rome, it is the large number of people standing or sitting in squares rather than walking that is conspicuous. And it's not due to necessity but rather that . It is hard to keep moving in city space with so many temptations to stay. In contrast are many new quarters and complexes that many people walk through but rarely stop or stay in.

- ① the city quality is so inviting
- ② public spaces are already occupied
- ③ public transportation is not available
- ④ major tourist spots are within walking distance
- ⑤ the city's administrative buildings are concentrated

6. 다음 빈칸에 들어갈 말로 가장 적절한 것을 고르시오.

In labor-sharing groups, people contribute labor to other people on a regular basis (for seasonal agricultural work such as harvesting) or on an irregular basis (in the event of a crisis such as the need to rebuild a barn damaged by fire). Labor sharing groups are part of what has been called a "moral economy" since no one keeps formal records on how much any family puts in or takes out. Instead, accounting is . The group has a sense of moral community based on years of trust and sharing. In a certain community of North America, labor sharing is a major economic factor of social cohesion. When a family needs a new barn or faces repair work that requires group labor, a barn-raising party is called. Many families show up to help. Adult men provide manual labor, and adult women provide food for the event. Later, when another family needs help, they call on the same people.

- ① legally established
- ② regularly reported
- ③ socially regulated
- ④ manually calculated
- ⑤ carefully documented
