

2027학년도 수능 대비 모의평가

1. 밑줄 친 부분이 다음 글에서 의미하는 바로 가장 적절한 것은?

(A) When invited by her mother to go shopping after lunch, Ellen hesitantly replied, "Sorry, Mom. I have an English essay assignment I need to finish." Her mother persisted, "Come on! Your father's birthday is just around the corner, and you wanted to buy his birthday present by yourself." Ellen suddenly realized that her father's birthday was just two days away. So (a) she altered her original plan to do the assignment in the library and decided to go to the shopping mall with her mother. (B) Ellen wanted to get a strawberry smoothie in the cafe, but it was sold out. So she bought a yogurt smoothie instead. The cafe was not very busy for a Saturday afternoon, and Ellen settled at a large table to work on her assignment. However, after a while, a group of students came in, and there weren't any large tables left. One of them came over to Ellen's table and politely asked, "Could (b) you possibly move to that smaller table?" Ellen replied, "It's okay. I was just leaving anyway." She hurriedly gathered her assignment leaving the shoe bag behind under the table. (C) Upon arrival at the shopping center, her mother inquired, "Ellen, have you decided what to buy for his birthday present?" She quickly replied, "(c) I would like to buy him a pair of soccer shoes." Ellen knew that her father had joined the morning soccer club recently and needed some new soccer shoes. She entered a shoe store and selected a pair of red soccer shoes. After buying the present, she told her mother, "Mom, now, I'm going to do my assignment in the cafe while you are shopping." (D) "It must be in the cafe," Ellen suddenly exclaimed when (d) she realized the gift for her father was missing upon returning home. She felt so disheartened, worrying it would be impossible to find it. "Why don't you call the cafe?" suggested her mother. When she phoned the cafe and asked about the shoe bag, the manager said that she would check and let her know. After a few minutes, she called back and told Ellen that (e) she had just discovered it. Ellen was so pleased that the birthday gift had been found.

- ① (a)
- ② (b)
- ③ (c)
- ④ (d)
- ⑤ (e)

2. 다음 글의 제목으로 가장 적절한 것은?

Hyper-mobility — the notion that more travel at faster speeds covering longer distances generates greater economic success — seems to be a distinguishing feature of urban areas, where more than half of the world's population currently reside. By 2005, approximately 7.5 billion trips were made each day in cities worldwide. In 2050, there may be three to four times as many passenger-kilometres travelled as in the year 2000, infrastructure and energy prices permitting. Freight movement could also rise more than threefold during the same period. Mobility flows have become a key dynamic of urbanization, with the associated infrastructure invariably constituting the backbone of urban form. Yet, despite the increasing level of urban mobility worldwide, access to places, activities and services has become increasingly difficult. Not only is it less convenient — in terms of time, cost and comfort — to access locations in cities, but the very process of moving around in cities generates a number of negative externalities. Accordingly, many of the world's cities face an unprecedented accessibility crisis, and are characterized by unsustainable mobility systems.

- ① Is Hyper-mobility Always Good for Cities?

- ③ A Long and Winding Road to Economic Success
- ④ Inevitable Regional Conflicts from Hyper-mobility
- ⑤ Infrastructure: An Essential Element of Hyper-mobility

3. 다음 글의 밑줄 친 부분 중, 어법상 틀린 것은?

There are questions we can ask about the origin of the universe, not all of ① them can be answered by science. Scientists can answer when and how the universe began, but cannot calculate the reason why it began, for example. That type of question must be explored through philosophy, religion, and other ways of thinking. The questions that scientists ② ask must be testable. Scientists have provided answers to testable questions that have helped us ③ calculate the age of the universe: like how distant are certain stars and how fast are they receding from us. Whether or not we can get a definitive answer, we can be confident in the process by which the explanations were developed, allowing us ④ to rely on the knowledge that is produced through the process of science. Someday we may find evidence to help us understand why the universe was created, but for the time being science will limit ⑤ itself to the last 13.7 or so billion years of phenomenon to investigate.

4. 다음 글의 밑줄 친 부분 중, 문맥상 낱말의 쓰임이 적절하지 않은 것은?

It has been suggested that "organic" methods, defined as those in which only natural products can be used as inputs, would be less damaging to the biosphere. Large-scale adoption of "organic" farming methods, however, would ① reduce yields and increase production costs for many major crops. Inorganic nitrogen supplies are ② essential for maintaining moderate to high levels of productivity for many of the non-leguminous crop species, because organic supplies of nitrogenous materials often are either limited or more expensive than inorganic nitrogen fertilizers. In addition, there are ③ benefits to the extensive use of either manure or legumes as "green manure" crops. In many cases, weed control can be very difficult or require much hand labor if chemicals cannot be used, and ④ fewer people are willing to do this work as societies become wealthier. Some methods used in "organic" farming, however, such as the sensible use of crop rotations and specific combinations of cropping and livestock enterprises, can make important ⑤ contributions to the sustainability of rural ecosystems.

5. 다음 빈칸에 들어갈 말로 가장 적절한 것을 고르시오.

One word is inextricably associated with geography: where. That is because geography starts from the premise that it matters where something takes place on Earth's surface. The key questions are not simply "where" questions, though; they are "why there" and "so what" questions. Getting to such questions means taking spatial arrangements, variations, and interconnections seriously. Engaging in even the simplest day-to-day activity requires some appreciation of spatial circumstances — where to find food and services, how to get to work places, and the like. Moving up in scale, without some awareness of _____, it is difficult to make reasoned business or policy judgments, make sense of events, or grasp some of the basic forces shaping life on the planet. Locating a new store or public service requires taking into consideration population distributions, the location of roads and utilities, socio-economic patterns, and more. Understanding why and where migration happens requires consideration of the political organization of territory, the spatial consequences of discrimination, socio-economic patterns, and the layout of the physical environment.

- ① why cross-cultural conflicts will increase
- ② how phenomena are arranged on Earth's surface
- ③ when the Earth's natural resources will be exhausted
- ④ which places on Earth are damaged by climate change
- ⑤ who has the authority to make decisions about territories

6. 다음 빈칸에 들어갈 말로 가장 적절한 것을 고르시오. (3점)

Enabling animals to is an almost universal function of learning. Most animals innately avoid objects they have not previously encountered. Unfamiliar objects may be dangerous; treating them with caution has survival value. If persisted in, however, such careful behavior could interfere with feeding and other necessary activities to the extent that the benefit of caution would be lost. A turtle that withdraws into its shell at every puff of wind or whenever a cloud casts a shadow would never win races, not even with a lazy rabbit. To overcome this problem, almost all animals habituate to safe stimuli that occur frequently. Confronted by a strange object, an inexperienced animal may freeze or attempt to hide, but if nothing unpleasant happens, sooner or later it will continue its activity. The possibility also exists that an unfamiliar object may be useful, so if it poses no immediate threat, a closer inspection may be worthwhile. 3점

*innately: 선천적으로

- ① weigh the benefits of treating familiar things with care
- ② plan escape routes after predicting possible attacks
- ③ overcome repeated feeding failures for survival
- ④ operate in the presence of harmless stimuli
- ⑤ monitor the surrounding area regularly
