

2027학년도 수능 대비 모의평가

1. 밑줄 친 make oneself public to oneself가 다음 글에서 의미하는 바로 가장 적절한 것은?

Coming of age in the 18th and 19th centuries, the personal diary became a centerpiece in the construction of a modern subjectivity, at the heart of which is the application of reason and critique to the understanding of world and self, which allowed the creation of a new kind of knowledge. Diaries were central media through which enlightened and free subjects could be constructed. They provided a space where one could write daily about her whereabouts, feelings, and thoughts. Over time and with rereading, disparate entries, events, and happenstances could be rendered into insights and narratives about the self, and allowed for the formation of subjectivity. It is in that context that the idea of "the self as both made and explored with words" emerges. Diaries were personal and private; one would write for oneself, or, in Habermas's formulation, one would make oneself public to oneself. By making the self public in a private sphere, the self also became an object for self-inspection and self-critique.

- ① use writing as a means of reflecting on oneself
- ② build one's identity by reading others' diaries
- ③ exchange feedback in the process of writing
- ④ create an alternate ego to present to others
- ⑤ develop topics for writing about selfhood

2. 다음 글의 제목으로 가장 적절한 것은?

Although cognitive and neuropsychological approaches emphasize the losses with age that might impair social perception, motivational theories indicate that there may be some gains or qualitative changes. Charles and Carstensen review a considerable body of evidence indicating that, as people get older, they tend to prioritize close social relationships, focus more on achieving emotional well-being, and attend more to positive emotional information while ignoring negative information. These changing motivational goals in old age have implications for attention to and processing of social cues from the environment. Of particular importance in considering emotional changes in old age is the presence of a positivity bias: that is, a tendency to notice, attend to, and remember more positive compared to negative information. The role of life experience in social skills also indicates that older adults might show gains in some aspects of social perception.

3. 다음 글의 밑줄 친 부분 중, 어법상 틀린 것은?

The rise of voluntary simplicity in advanced (or late) stages of capitalism, and for the privileged members of these societies, is explainable by a psychological theory of Abraham Maslow. Maslow suggests ① that human needs are organized in a hierarchy. At the base ② are basic creature comforts, such as the need for food, shelter and clothing. Higher in the hierarchy is the need for love and esteem. The hierarchy is crowned with self-expression. Maslow theorized that people seek to satisfy lower needs before they turn to higher ones, although he does not deal with the question of the extent ③ to which lower needs have to be satiated before people move to deal with higher level needs. There are some who suggest that Maslow's theory ④ has disproven because people seek to satisfy their needs not in the sequence he stipulated or even all at once. This may well be the case, but the only issue relevant here is if people continue to heavily invest ⑤ themselves in the quest for creature comforts long after they are quite richly endowed in such goods.

4. 다음 글의 밑줄 친 부분 중, 문맥상 낱말의 쓰임이 적절하지 않은 것은?

Sport can trigger an emotional response in its consumers of the kind rarely brought forth by other products. Imagine bank customers buying memorabilia to show loyalty to their bank, or consumers ① identifying so strongly with their car insurance company that they get a tattoo with its logo. We know that some sport followers are so ② passionate about players, teams and the sport itself that their interest borders on obsession. This addiction provides the emotional glue that binds fans to teams, and maintains loyalty even in the face of on-field ③ failure. While most managers can only dream of having customers that are as passionate about their products as sport fans, the emotion triggered by sport can also have a negative impact. Sport's emotional intensity can mean that organisations have strong attachments to the past through nostalgia and club tradition. As a result, they may ④ increase efficiency, productivity and the need to respond quickly to changing market conditions. For example, a proposal to change club colours in order to project a more attractive image may be ⑤ defeated because it breaks a link with tradition.

5. 다음 빈칸에 들어갈 말로 가장 적절한 것을 고르시오. (3점)

Whatever their differences, scientists and artists begin with the same question: can you and I see the same thing the same way? If so, how? The scientific thinker looks for features of the thing that can be stripped of subjectivity — ideally, those aspects that can be quantified and whose values will thus never change from one observer to the next. In this way, he arrives at a reality independent of all observers. The artist, on the other hand, relies on the strength of her artistry to effect a marriage between her own subjectivity and that of her readers. To a scientific thinker, this must sound like magical thinking: you're saying you will imagine something so hard it'll pop into someone else's head exactly the way you envision it? The artist has sought the opposite of the scientist's observer-independent reality. She creates a reality dependent upon observers, indeed a reality in which in order for it to exist at all.

- ① human beings must participate
- ② objectivity should be maintained
- ③ science and art need to harmonize
- ④ readers remain distanced from the arts
- ⑤ she is disengaged from her own subjectivity

6. 다음 빈칸에 들어갈 말로 가장 적절한 것을 고르시오.

In trying to explain how different disciplines attempt to understand autobiographical memory the literary critic Daniel Albright said, "Psychology is a garden, literature is a wilderness." He meant, I believe, that psychology seeks to make patterns, find regularity, and ultimately impose order on human experience and behavior. Writers, by contrast, dive into the unruly, untamed depths of human experiences. What he said about understanding memory can be extended to our questions about young children's minds. If we psychologists are too bent on identifying the orderly pattern, the regularities of children's minds, we may miss an essential and pervasive characteristic of our topic: the child's more unruly and imaginative ways of talking and thinking. It is not only the developed writer or literary scholar who seems drawn toward a somewhat wild and idiosyncratic way of thinking; young children are as well. The psychologist interested in young children may have to _____ in order to get a good picture of how children think.

- ① venture a little more often into the wilderness
- ② help them recall their most precious memories
- ③ better understand the challenges of parental duty
- ④ disregard the key characteristics of children's fiction
- ⑤ standardize the paths of their psychological development

정답 및 해설

1. [정답] ①

[해설]

밑줄 친 'make oneself public to oneself'는 사적인 공간인 일기(private sphere)에 자신에 대해 씬으로써, 자기 자신을 공개적인 대상처럼 객관화하여 성찰하고 비판하는 과정을 의미한다. 지문에서 일기 쓰기를 통해 자아가 '자기 점검과 자기 비판의 대상(an object for self-inspection and self-critique)'이 된다고 설명하므로, 글쓰기를 자신을 성찰하는 수단으로 사용한다는 의미가 가장 적절하다.

2. [정답] ①

[해설]

이 글은 노년기의 사회적 인식 능력에 대해 인지적 손실뿐만 아니라 동기 이론에 따른 'gains or qualitative changes'(이점이나 질적 변화)도 있음을 강조한다. 특히 'positivity bias'(긍정성 편향)와 같은 긍정적인 측면을 부각시키므로, 노년기의 사회적 인식이 꼭 나쁜 소식만은 아니라는 제목이 글의 전체 내용을 잘 포괄한다.

3. [정답] ④

[해설]

④번에서 disprove는 '~이 틀렸음을 입증하다'라는 타동사이다. 주어인 'Maslow's theory'는 입증하는 주체가 아니라 입증되는 대상이므로 수동태가 되어야 한다. 따라서 has disproven이 아니라 has been disproven이 되어야 한다. ① that은 suggest의 목적어 역할을 하는 명사절 접속사이다. ② are는 'At the base'라는 장소 부사구가 문두로 나와 주어(basic creature comforts)와 동사가 도치된 구문이다. ③ to which는 the extent를 선행사로 하는 '전치사+관계대명사' 구조이다. ⑤ themselves는 동사 invest의 주체인 people과 목적어가 동일하므로 사용된 재귀대명사이다.

4. [정답] ④

[해설]

스포츠 조직이 향수나 클럽 전통과 같은 과거에 강한 애착을 가지면, 변화하는 시장 상황에 신속하게 대응해야 할 필요성이나 효율성, 생산성을 '증가(increase)'시키는 것이 아니라 '무시(ignore)'하거나 '저항(resist)'하게 된다. 따라서 문맥상 'increase'는 적절하지 않다.

5. [정답] ①

[해설]

과학자는 관찰자로부터 독립적인(observer-independent) 현실을 추구하는 반면, 예술가는 자신의 주관성과 독자(관찰자)의 주관성을 결합시켜 '관찰자에게 의존하는(dependent upon observers)' 현실을 창조합니다. 따라서 예술가가 창조하는 현실은 그것이 존재하기 위해서 관찰자, 즉 '인간이 참여해야만 하는(human beings must participate)' 현실입니다.

6. [정답] ①

[해설]

심리학은 'garden(정원)'처럼 질서와 패턴을 찾으려 하고, 문학은 'wilderness(황무지)'처럼 제멋대로인 인간 경험의 깊이를 탐구한다고 비유한다. 필자는 심리학자들이 아이들의 마음을 제대로 이해하려면, 질서정연한 패턴에만 집착할 것이 아니라 아이들의 'unruly and imaginative ways(제멋대로이고 상상력이 풍부한 방식)', 즉 'wilderness'의 측면을 보아야 한다고 주장한다. 따라서 심리학자는 '황무지로 조금 더 자주 과감히 들어가야 한다(venture a little more often into the wilderness)'는 결론에 이르게 된다.
