Flicking the collaboration light switch is something that leaders are uniquely positioned to do, because several obstacles stand in the way of people voluntarily working alone. For one thing, the fear of being left out of the loop can keep them glued to their enterprise social media. Individuals don't want to be —or appear to be —isolated. For another, knowing what their teammates are doing provides a sense of comfort and security, because people can adjust their own behavior to be in harmony with the group. It's risky to go off on their own to try something new that will probably not be successful right from the start. But even though it feels reassuring for individuals to be hyperconnected, it's better for the organization if they periodically go off and think for themselves and generate diverse —if not quite mature —ideas. Thus, it becomes the leader's job to create conditions that are good for the whole by enforcing intermittent interaction even when people wouldn't choose it for themselves, without making it seem like a punishment.

*intermittent: 간헐적인

- ① breaking physical barriers and group norms that prohibit cooperation
- ② having people stop working together and start working individually
- ③ encouraging people to devote more time to online collaboration
- ④ shaping environments where higher productivity is required
- ⑤ requiring workers to focus their attention on group projects

The world has become a nation of laws and governance that has introduced a system of public administration and management to keep order. With this administrative management system, urban institutions of government have evolved to offer increasing levels of services to their citizenry, provided through a taxation process and/or fee for services (e.g., police and fire, street maintenance, utilities, waste management, etc.). Frequently this has displaced citizen involvement. Money for services is not a replacement for citizen responsibility and public participation. Responsibility of the citizen is slowly being supplanted by government being the substitute provider. Consequentially, there is a philosophical and social change in attitude and sense of responsibility of our urban-based society to become involved. The sense of community and associated responsibility of all citizens to be active participants is therefore diminishing. Governmental substitution for citizen duty and involvement can have serious implications. This impedes the nations of the world to be responsive to natural and man-made disasters as part of global preparedness.

Many genetic and biological mechanisms control hunger and satiety, ensuring that people will eat enough ① to meet their energy needs. Throughout most of human history, getting enough food was the primary challenge. The human body developed to function in an environment ② which food was scarce and high levels of physical activity were mandatory for survival. This situation resulted in the development of various physiological mechanisms that encourage the body to deposit energy (i.e., fat) and ③ defend against energy loss. Today's environment, however, is one in which food is widely available, inexpensive, and often high in energy density, while minimal physical activity is required for daily living. Researchers have proposed that the "modern environment has taken body weight control from an instinctual (unconscious) process to ④ one that requires substantial cognitive effort. In the current environment, people who are not devoting substantial conscious effort to managing body weight ⑤ are probably gaining weight." This means that nutrition education has an important role.

In technological design, an aspiration towards seamlessness aims to make the technological experience for humans blend seamlessly into our everyday lives. Essentially, this aspiration aims towards experiences where people are no longer (a) ① aware of the technology, the interface or the differences between human-technology and human-human interaction. Considering the metaphor of seams in clothing, we can say that we aspire to seamless aesthetics by stitching the seams closely, pressing them flat and making sure they are (b) ② hidden on the inside so that we wear clothing rather than pieces of fabric. When designers and engineers talk about technological seamlessness, they are often referring to ease of use and convenience. For example, in interface design, an aspiration towards seamlessness (c) ③ ensures the experience for the user flows and is not stressful or irritating. Most of us would have had experiences of (d) ④ poor interface designs or apps in workplaces that make things more complicated and irritating, and have longed for more seamless interfaces. Technological seamlessness can also include less visible screens in new technologies, or virtual reality technologies with a seamless technological design. The aim is to immerse the user experience such that the visual interaction might be described as inside the screen rather than a body interacting with a digital console or object as separate entities. Similarly, seamlessness in humanoid robotic design aims to make humanoids (e) ⑤ distinguishable from a human body.

① (a)

② (b)

③ (c)

④ (d)

⑤ (e)

That people need other people is hardly news, but for Rousseau this dependence extended far beyond companionship or even love, into the very process of becoming human. Rousseau believed that people are not born but made, every individual a bundle of potentials whose realization requires the active involvement of other people. Self-development is a social process. Self-sufficiency is an impossible fantasy. Much of the time Rousseau wished passionately that it were not: Robinson Crusoe was a favorite book, and he yearned to be free from the pains and uncertainties of social life. But his writings document with extraordinary clarity . "Our sweetest existence is relative and collective, and our true self is not entirely within us." And it is kindness — which Rousseau analyzed under the rubric of *pitié* , which translates as "pity" but is much closer to "sympathy" as Hume and Smith defined it — that is the key to this collective existence.

- ① the necessity of philosophical study to understand human nature
- ② the development of self-sufficiency through literary works
- ③ the shaping of the individual by his emotional attachments
- ④ the making of the self-reliant man through his struggles
- ⑤ the difficulty of trusting other people wholeheartedly

Many people create and share pictures and videos on the Internet. The difficulty is finding what you want. Typically, people want to search using words (rather than, say, example sketches). Because most pictures don't come with words attached, it is natural to try and build tagging systems that tag images with relevant words. The underlying machinery is straightforward — we apply image classification and object detection methods and tag the image with the output words. But tags aren't _____. It matters who is doing what, and tags don't capture this. For example, tagging a picture of a cat in the street with the object categories "cat", "street", "trash can" and "fish bones" leaves out the information that the cat is pulling the fish bones out of an open trash can on the street.

- ① a set of words that allow users to identify an individual object
- ② a comprehensive description of what is happening in an image
- ③ a reliable resource for categorizing information by pictures
- ④ a primary means of organizing a sequential order of words
- ⑤ a useful filter for sorting similar but not identical images

글은 사람들이 고립되는 것에 대한 두려움 때문에 자발적으로 혼자 일하는 것을 피한다고 설명한다. 그러나 조직을 위해서는 'periodically go off and think for themselves(주기적으로 떨어져 스스로 생각하는 것)'가 더 좋다고 말한다. 따라서 리더의 역할은 '간헐적인 상호작용'을 강제하는 것, 즉 협업의 스위치를 (일시적으로) 꺼서 사람들이 개인적으로 일하고 생각하도록 만드는 것이다. 'Flicking the collaboration light switch'는 협업을 멈추고 개인 작업을 시작하게 하는 것을 의미한다.

이 글은 정부가 세금을 통해 시민들에게 다양한 서비스를 제공하면서, 시민들의 참여(citizen involvement)와 책임(citizen responsibility)이 줄어드는 부정적인 현상을 지적한다. 'this has displaced citizen involvement', 'responsibility of the citizen is slowly being supplanted', 'responsibility ... is therefore diminishing' 등의 표현이 반복적으로 나타난다. 따라서 정부 서비스 제공의 대가(cost)로 시민 참여가 감소했다는 내용의 제목이 가장 적절하다.

3. [정답] ②

②번은 관계사 자리로, 뒤따르는 절 'food was scarce'가 주어(food), 동사(was), 주격보어(scarce)로 구성된 완전한 문장이므로 관계대명사 which를 쓸 수 없다. 따라서 완전한 절을 이끄는 관계부사 where 또는 'in which'로 고쳐야 한다. ① 'to meet'은 목적을 나타내는 to부정사의 부사적 용법이다. ③ 'defend'는 'encourage the body to deposit ~ and (to) defend ~'의 병렬구조로, to가 생략된 원형부정사 형태가 맞다. ④ 'one'은 앞서 언급된 'a process'를 받는 부정대명사이다. ⑤ 'are'는 주격관계대명사 who의 선행사인 'people'에 수를 일치시킨 복수동사로 올바르다.

글의 맥락상 'seamlessness'는 경계를 허물고 자연스럽게 융화되는 것을 의미한다. 인간형 로봇 디자인에서의 'seamlessness'는 로봇을 인간과 구별하기 어렵게, 즉 인간의 몸과 '구별할 수 없게(indistinguishable)' 만드는 것을 목표로 해야 한다. 따라서 인간의 몸과 '구별할 수 있는(distinguishable)'으로 만드는 것을 목표로 한다는 (e)는 문맥상 반대되는 의미이므로 적절하지 않다.

The passage focuses on Rousseau's idea that the self is formed through social interaction and connection with others ('requires the active involvement of other people,' 'Our sweetest existence is relative and collective'). The text highlights 'piti' (sympathy) as the key to this collective existence. This points to the formative power of our connections and feelings towards others, which is best expressed as 'the shaping of the individual by his emotional attachments.'

단순히 이미지에 있는 객체('고양이', '거리' 등)를 나열하는 태그(tag) 방식의 한계를 지적하고 있다. 예를 통해, 태그는 '누가 무엇을 하고 있는지'와 같은 상황이나 관계(고양이가 쓰레기통에서 생선 뼈를 꺼내는 행위)를 포착하지 못한다고 설명한다. 따라서 태그는 '이미지에서 일어나고 있는 일에 대한 포괄적인 설명(a comprehensive description of what is happening in an image)'이 아니라는 결론에 이를 수 있다.
