

2027학년도 수능 대비 모의평가

1. 밑줄 친 부분이 다음 글에서 의미하는 바로 가장 적절한 것은? (3점)

Our view of the world is not given to us from the outside in a pure, objective form; it is shaped by our mental abilities, our shared cultural perspectives and our unique values and beliefs. This is not to say that there is no reality outside our minds or that the world is just an illusion. It is to say that our version of reality is precisely that: our version, not the version. There is no single, universal or authoritative version that makes sense, other than as a theoretical construct. We can see the world only as it appears to us, not "as it truly is," because there is no "as it truly is" without a perspective to give it form. Philosopher Thomas Nagel argued that there is no "view from nowhere," since we cannot see the world except from a particular perspective, and that perspective influences what we see. We can experience the world only through the human lenses that make it intelligible to us.

- ① perception of reality affected by subjective views
- ② valuable perspective most people have in mind
- ③ particular view adopted by very few people
- ④ critical insight that defeats our prejudices
- ⑤ unbiased and objective view of the world

2. 다음 글의 제목으로 가장 적절한 것은? (3점)

The selfie resonates not because it is new, but because it expresses, develops, expands, and intensifies the long history of the self-portrait. The self-portrait showed to others the status of the person depicted. In this sense, what we have come to call our own "image" — the interface of the way we think we look and the way others see us — is the first and fundamental object of global visual culture. The selfie depicts the drama of our own daily performance of ourselves in tension with our inner emotions that may or may not be expressed as we wish. At each stage of the self-portrait's expansion, more and more people have been able to depict themselves. Today's young, urban, networked majority has reworked the history of the self-portrait to make the selfie into the first visual signature of the new era.

- ① Are Selfies Just a Temporary Trend in Art History?
- ② Fantasy or Reality: Your Selfie Is Not the Real You
- ③ The Selfie: A Symbol of Self-oriented Global Culture
- ④ The End of Self-portraits: How Selfies Are Taking Over
- ⑤ Selfies, the Latest Innovation in Representing Ourselves

3. 다음 글의 밑줄 친 부분 중, 어법상 틀린 것은?

COVID-19 vaccinations continue to roll along in the United States with more than one-fifth of the population fully ① vaccinated, and millions more joining them every day. Some people are still hesitant to get the jab, but even that number is dwindling. That will help us reach herd immunity ② which enough people are immune to the disease so that it will no longer spread easily. If you've already received your shot, can you take the COVID-19 shackles off? Not yet. The door to the world is ajar for the first time in more than a year, but its not yet wide open. Individuals still need to be ③ cautious for their own sake, because the vaccines are not 100 percent effective. Immunity from vaccines ④ risers up gradually. Right after getting a shot, nothing changes. However, there are some steps you can take in the hours and days after the shot to help the vaccine come up to speed. It is advised to stay hydrated and ⑤ rest immediately after the shot. *jab: 주사 **shackle: 족쇄 ***ajar: 약간 열린

4. 다음 글의 밑줄 친 부분 중, 문맥상 낱말의 쓰임이 적절하지 않은 것은?

Why is the value of place so important? From a historical perspective, until the 1700s textile production was a hand process using the fibers available within a ①particular geographic region, for example, cotton, wool, silk, and flax. Trade among regions ②increased the availability of these fibers and associated textiles made from the fibers. The First Industrial Revolution and subsequent technological advancements in manufactured fibers ③added to the fact that fibers and textiles were no longer "place-bound." Fashion companies created and consumers could acquire textiles and products made from textiles with little or no connection to where, how, or by whom the products were made. This ④countered a disconnect between consumers and the products they use on a daily basis, a loss of understanding and appreciation in the skills and resources necessary to create these products, and an associated disregard for the human and natural resources necessary for the products' creation. Therefore, renewing a value on place ⑤reconnects the company and the consumer with the people, geography, and culture of a particular location.

5. 다음 빈칸에 들어갈 말로 가장 적절한 것을 고르시오.

Young contemporary artists who employ digital technologies in their practice rarely make reference to computers. For example, Wade Guyton, an abstractionist who uses a word processing program and inkjet printers, does not call himself a computer artist. Moreover, some critics, who admire his work, are little concerned about his extensive use of computers in the art-making process. This is a marked contrast from three decades ago when artists who utilized computers were labeled by critics often disapprovingly as computer artists. For the present generation of artists, the computer, or more appropriately, the laptop, is one in a collection of integrated, portable digital technologies that link their social and working life. With tablets and cell phones surpassing personal computers in Internet usage, and as slim digital devices resemble nothing like the room-sized mainframes and bulky desktop computers of previous decades, it now appears that the computer artist is finally _____.

- ① awake
- ② influential
- ③ distinct
- ④ troublesome
- ⑤ extinct

6. 다음 빈칸에 들어갈 말로 가장 적절한 것을 고르시오.

Emma Brindley has investigated the responses of European robins to the songs of neighbors and strangers. Despite the large and complex song repertoire of European robins, they were able to discriminate between the songs of neighbors and strangers. When they heard a tape recording of a stranger, they began to sing sooner, sang more songs, and overlapped their songs with the playback more often than they did on hearing a neighbor's song. As Brindley suggests, the overlapping of song may be an aggressive response. However, this difference in responding to neighbor versus stranger occurred only when the neighbor's song was played by a loudspeaker placed at the boundary between that neighbor's territory and the territory of the bird being tested. If the same neighbor's song was played at another boundary, one separating the territory of the test subject from another neighbor, it was treated as the call of a stranger. Not only does this result demonstrate that , but it also shows that the choice of songs used in playback experiments is highly important.

- ① variety and complexity characterize the robins' songs
- ② song volume affects the robins' aggressive behavior
- ③ the robins' poor territorial sense is a key to survival
- ④ the robins associate locality with familiar songs
- ⑤ the robins are less responsive to recorded songs
