

2027학년도 수능 대비 모의평가

1. 밑줄 친 부분이 다음 글에서 의미하는 바로 가장 적절한 것은?

Gold plating in the project means needlessly enhancing the expected results, namely, adding characteristics that are costly, not required, and that have low added value with respect to the targets in other words, giving more with no real justification other than to demonstrate one's own talent. Gold plating is especially interesting for project team members, as it is typical of projects with a marked professional component in other words, projects that involve specialists with proven experience and extensive professional autonomy. In these environments specialists often see the project as an opportunity to test and enrich their skill sets. There is therefore a strong temptation, in all good faith, to engage in gold plating, namely, to achieve more or higher-quality work that gratifies the professional but does not add value to the client's requests, and at the same time removes valuable resources from the project. As the saying goes, "The best is the enemy of the good."

- ① Pursuing perfection at work causes conflicts among team members.
- ② Raising work quality only to prove oneself is not desirable.
- ③ Inviting overqualified specialists to a project leads to bad ends.
- ④ Responding to the changing needs of clients is unnecessary.
- ⑤ Acquiring a range of skills for a project does not ensure success.

2. 다음 글의 제목으로 가장 적절한 것은?

Although cognitive and neuropsychological approaches emphasize the losses with age that might impair social perception, motivational theories indicate that there may be some gains or qualitative changes. Charles and Carstensen review a considerable body of evidence indicating that, as people get older, they tend to prioritize close social relationships, focus more on achieving emotional well-being, and attend more to positive emotional information while ignoring negative information. These changing motivational goals in old age have implications for attention to and processing of social cues from the environment. Of particular importance in considering emotional changes in old age is the presence of a positivity bias: that is, a tendency to notice, attend to, and remember more positive compared to negative information. The role of life experience in social skills also indicates that older adults might show gains in some aspects of social perception.

3. 다음 글의 밑줄 친 부분 중, 어법상 틀린 것은?

Childrens antennae are constantly tuned to the way their parents, particularly their mothers, talk about causes of emotionally loaded events. It is no accident that Why? is one of the first and most repeated questions that young children ask. Getting explanations for the world around them, particularly the social world, been the prime intellectual task of growing up. Once the parents get impatient and stop answering the never-ending why questions, children get their answers in other ways. Mostly they listen closely when you spontaneously explain why things happen – which you do, on average, about once a minute during speech. Your children hang on every word of the explanations you give, particularly when something goes wrong. Not only do they listen for the particulars of what you say, but they listen keenly to its formal properties: whether the cause you cite is permanent or temporary, specific or general, your fault or someone elses.

- ① emotionally
- ② that
- ③ been
- ④ which
- ⑤ do they listen

4. 다음 글의 밑줄 친 부분 중, 문맥상 낱말의 쓰임이 적절하지 않은 것은?

Internalization depends on supports for autonomy. Contexts that use controlling strategies such as salient rewards and punishments or evaluative, selfesteem-hooking pressures are ①least likely to lead people to value activities as their own. This is not to say that controls don't ②work to produce behavior – decades of operant psychology prove that they can. It is rather that the more salient the external control over a person's behavior, the more the person is likely to be merely externally regulated or introjected in his or her actions. Consequently, the person does not ③develop a value or investment in the behaviors, but instead remains dependent on external controls. Thus, parents who reward, force, or cajole their child to do homework are more likely to have a child who does so only when rewarded, cajoled, or forced. The salience of external controls ④drives the acquisition of self-responsibility. Alternatively, parents who supply reasons, show an emotional understanding of difficulties overcoming problems, and use a ⑤minimum of external incentives are more likely to cultivate a sense of willingness and value for work in their child.

5. 다음 빈칸에 들어갈 말로 가장 적절한 것을 고르시오.

Manufacturers design their innovation processes around the way they think the process works. The vast majority of manufacturers still think that product development and service development are always done by manufacturers, and that their job is always to find a need and fill it rather than to sometimes find and commercialize an innovation that _____. Accordingly, manufacturers have set up market-research departments to explore the needs of users in the target market, product-development groups to think up suitable products to address those needs, and so forth. The needs and prototype solutions of lead users – if encountered at all – are typically rejected as outliers of no interest. Indeed, when lead users' innovations do enter a firm's product line – and they have been shown to be the actual source of many major innovations for many firms – they typically arrive with a lag and by an unusual and unsystematic route.

- ① lead users tended to overlook
- ② lead users have already developed
- ③ lead users encountered in the market
- ④ other firms frequently put into use
- ⑤ both users and firms have valued

6. 다음 빈칸에 들어갈 말로 가장 적절한 것을 고르시오.

The early grain trade firms were active in both surplus-producing and food deficit regions, and these firms made it their business to know the state of supply and demand in both. Because this information was the key to their _____, these firms worked in relative secrecy, frequently built on family ties, trust, and loyalty. In addition, these firms were able to benefit from the rise of commodity exchanges and commodities futures markets that emerged in the mid-1800s. Agricultural markets are naturally unstable, due to changes in harvest size that result from variable weather patterns and other factors. Locking-in prices by buying and selling grain for future delivery helped these firms to minimize such risks. It made sense for the grain trading companies to manage their risks within a single firm that was operating in more than one country, rather than operating as independent national companies trading with each other. Their access to information in multiple markets enabled them to easily cover the risks associated with agricultural commodity trade.

- ① profitability
- ② unification
- ③ innovation
- ④ reputation
- ⑤ morality

정답 및 해설

1. [정답] ②

[해설]

지문에서 'gold plating'은 자신의 재능을 과시하기 위해 불필요하고 비용이 많이 들며 부가가치가 낮은 특성을 추가하는 행위로 정의된다. 이는 전문가를 만족시킬 뿐 고객의 요구에 가치를 더하지 않는다고 설명한다. 'The best is the enemy of the good'(최고는 좋음의 적)라는 말은 이러한 맥락에서, 완벽(the best)을 추구하다가 단순히 좋은(good) 결과를 망치는 상황, 즉 자기 만족을 위해 불필요하게 품질을 높이는 것은 바람직하지 않다는 의미로 사용되었다.

2. [정답] ①

[해설]

이 글은 노년기의 사회적 인식 능력에 대해 인지적 손실뿐만 아니라 동기 이론에 따른 'gains or qualitative changes'(이점이나 질적 변화)도 있음을 강조한다. 특히 'positivity bias'(긍정성 편향)와 같은 긍정적인 측면을 부각시키므로, 노년기의 사회적 인식이 꼭 나쁜 소식만은 아니라는 제목이 글의 전체 내용을 잘 포괄한다.

3. [정답] ③

[해설]

③번은 문장의 정동사가 필요한 자리이다. 주어는 동명사구 'Getting explanations for the world around them'이므로, 이에 맞는 단수 동사가 와야 한다. 과거분사 been만으로는 동사가 될 수 없으므로, 현재완료를 나타내는 has been 또는 is가 와야 한다. ① emotionally는 형용사 loaded를 수식하는 부사이다. ② that은 선행사 questions를 수식하는 목적격 관계대명사이다. ④ which는 앞 문장(you spontaneously explain why things happen) 전체를 선행사로 받는 계속적 용법의 관계대명사이다. ⑤ do they listen은 부정어구 'Not only'가 문두에 와서 주어와 동사가 도치된 형태이다.

4. [정답] ④

[해설]

글의 전체적인 내용은 외적 통제(external controls)가 강할수록 행동의 내재화나 자율성이 저해된다는 것이다. 따라서 외적 통제의 두드러짐(The salience of external controls)이 자기 책임감의 획득을 '촉진한다(drives)'는 ④번은 문맥에 맞지 않다. 오히려 '방해한다(hinders)' 또는 '막는다(prevents)'와 같은 반대 의미의 단어가 와야 한다.

5. [정답] ②

[해설]

제조업체들은 스스로 필요를 찾아 제품을 개발해야 한다고 생각하지만, 실제로는 많은 주요 혁신이 '선도 사용자(lead users)'로부터 나온다는 내용이다. 제조업체들은 '선도 사용자의 혁신'을 종종 무시하지만, 사실은 이를 찾아내고 상업화해야 한다는 것이 글의 숨은 주장이다. 따라서 빈칸에는 제조업체들이 간과하는 혁신, 즉 '선도 사용자들이 이미 개발한' 혁신을 찾아 상업화해야 한다는 내용이 들어가야 문맥이 자연스럽다.

6. [정답] ①

[해설]

초기 곡물 무역 회사들은 공급과 수요에 대한 정보를 아는 것을 사업으로 삼았다. 이 정보가 왜 중요했는지를 추론하는 문제이다. 정보를 통해 위험을 최소화하고(minimize such risks), 여러 시장에 접근하여 이익을 얻는 사업 구조를 설명하고 있으므로, 이 정보는 회사의 '수익성(profitability)'의 핵심이었음을 알 수 있다.
