1. 밑줄 친 부분이 다음 글에서 의미하는 바로 가장 적절한 것은? (3점)

Scientists have no special purchase on moral or ethical decisions; a climate scientist is no more qualified to comment on health care reform than a physicist is to judge the causes of bee colony collapse. The very features that create expertise in a specialized domain lead to ignorance in many others. In some cases lay people — farmers, fishermen, patients, native peoples — may have relevant experiences that scientists can learn from. Indeed, in recent years, scientists have begun to recognize this: the Arctic Climate Impact Assessment includes observations gathered from local native groups. So our trust needs to be limited, and focused. It needs to be very particular. Blind trust will get us into at least as much trouble as no trust at all. But without some degree of trust in our designated experts — the men and women who have devoted their lives to sorting out tough questions about the natural world we live in — we are paralyzed, in effect not knowing whether to make ready for the morning commute or not.

- ① questionable facts that have been popularized by non-experts
- ② readily applicable information offered by specialized experts
- ③ common knowledge that hardly influences crucial decisions
- ④ practical information produced by both specialists and lay people
- ⑤ biased knowledge that is widespread in the local community

2. 다음 글의 제목으로 가장 적절한 것은?

The world has become a nation of laws and governance that has introduced a system of public administration and management to keep order. With this administrative management system, urban institutions of government have evolved to offer increasing levels of services to their citizenry, provided through a taxation process and/or fee for services (e.g., police and fire, street maintenance, utilities, waste management, etc.). Frequently this has displaced citizen involvement. Money for services is not a replacement for citizen responsibility and public participation. Responsibility of the citizen is slowly being supplanted by government being the substitute provider. Consequentially, there is a philosophical and social change in attitude and sense of responsibility of our urban-based society to become involved. The sense of community and associated responsibility of all citizens to be active participants is therefore diminishing. Governmental substitution for citizen duty and involvement can have serious implications. This impedes the nations of the world to be responsive to natural and man-made disasters as part of global preparedness.

*supplant: 대신하다 **impede: 방해하다

- ① A Sound Citizen Responsibility in a Sound Government
- ② Always Better than Nothing: The Roles of Modern Government
- ③ Decreased Citizen Involvement: A Cost of Governmental Services
- ④ Why Does Global Citizenship Matter in Contemporary Society?
- ⑤ How to Maximize Public Benefits of Urban--Based Society

3. 다음 글의 밑줄 친 부분 중, 어법상 틀린 것은?

As their physical growth and brain development proceed, teens develop more powers of reasoning and begin to think in more complicated, multidimensional ways. They develop more sophisticated abilities to understand ① that there are different ways of looking at a situation and imagining other possibilities for action. As a result of these changes, teens gain new perspectives about their own mothers and fathers. They shed the idealized images of their parents they may have previously held and ② begin to see them more critically, including their weaknesses and flaws. They are more willing and able ③ to challenge and argue with their parents, and there can be increased conflict. Teens' increased abstract reasoning skills also enable them to better understand the complexities of life, including ④ their more fearful aspects. With these more sophisticated powers of reasoning, teenagers find it easier to imagine what others are thinking of them, which can mean their sense of the negative side of things can become ⑤ magnified.

4. 다음 글의 밑줄 친 부분 중, 문맥상 낱말의 쓰임이 적절하지 않은 것은? (3점)

What is soft-path river engineering? One way to visualize its spirit is to liken it to a footpath in the forest. Suppose a tree falls across a footpath. A soft-path response would be simply to redirect the trail around the fallen tree. A more interventionist response would be to ① remove the tree and restore the original route. A still more interventionist response might be to straighten and pave the path to insert it more ② permanently in the landscape. The true high-modernist step would, of course, be to ③ create a superhighway that removes the landscape and bulldozes straight through all obstacles in the topography. Soft-path engineering has the unique advantage of intellectual ④ modesty with respect to what we actually know about river movement and its environmental effects. In contrast to hard-path engineering, soft-path engineering accepts variability in the river's movement as ⑤ insignificant until proven otherwise. Backwaters, short-lived wetlands, braids and channels, swamps all undesirable to hard-path engineering are presumed by soft-path engineers to be ecologically important.

In trying to explain how different disciplines attempt to understand autobiographical memory the literary critic Daniel Albright said, "Psychology is a garden, literature is a wilderness." He meant, I believe, that psychology seeks to make patterns, find regularity, and ultimately impose order on human experience and behavior. Writers, by contrast, dive into the unruly, untamed depths of human experiences. What he said about understanding memory can be extended to our questions about young children's minds. If we psychologists are too bent on identifying the orderly pattern, the regularities of children's minds, we may miss an essential and pervasive characteristic of our topic: the child's more unruly and imaginative ways of talking and thinking. It is not only the developed writer or literary scholar who seems drawn toward a somewhat wild and idiosyncratic way of thinking; young children are as well. The psychologist interested in young children may have to _____ in order to get a good picture of how children think.

- ① venture a little more often into the wilderness
- ② help them recall their most precious memories
- ③ better understand the challenges of parental duty
- ④ disregard the key characteristics of children's fiction
- ⑤ standardize the paths of their psychological development

The basic guidelines for good style are not mysterious; in fact, you use them every day in conversation. In conversation and in writing, we all rely heavily on cooperation to make sense of exchanges, and a polished practical style makes cooperation easier. Writers develop such a style by acknowledging that readers expect the same things that listeners expect in conversation: clarity, relevance, and proportion. If you listen to someone who is not clear, who cannot stay on the topic, or who offers too much or too little information, you will quickly lose interest in the conversation. Writers, too, need to be clear, stay on the topic, and give information appropriately. In fact, this attention to audience and appropriateness may be even more important in writing than in conversation because writing does not permit the nonverbal communication and immediate feedback that are part of conversation. As writers, we have to ____; in effect, we have to imagine both halves of a virtual conversation.

- ① recognize the limitations of writing and conversation
- ② envision the reader's preference for stylistic writing
- ③ picture the reader's desire for more knowledge
- ④ develop collaborative writing with readers
- ⑤ anticipate the absent reader's response

필자는 전문가의 의견을 맹신해서는 안 되지만, 그들의 전문성을 어느 정도 신뢰하지 않으면 우리는 마비되어(paralyzed) 아무것도 결정하지 못하는 상태가 된다고 말한다. 밑줄 친 '아침 통근 준비를 해야 할지 말아야 할지 모르는 것'은 전문가의 조언(예: 기상학자의 일기 예보) 없이는 가장 기본적인 일상적 결정조차 내릴 수 없게 되는 상황을 비유적으로 표현한 것이다. 이는 '전문가가 제공하는 바로 적용 가능한 정보(readily applicable information offered by specialized experts)'의 부재 상태를 의미한다.

2. [정답] ③

이 글은 정부가 세금을 통해 시민들에게 다양한 서비스를 제공하면서, 시민들의 참여(citizen involvement)와 책임(citizen responsibility)이 줄어드는 부정적인 현상을 지적한다. 'this has displaced citizen involvement', 'responsibility of the citizen is slowly being supplanted', 'responsibility ... is therefore diminishing' 등의 표현이 반복적으로 나타난다. 따라서 정부 서비스 제공의 대가(cost)로 시민 참여가 감소했다는 내용의 제목이 가장 적절하다.

모든 선택지가 문법적으로 올바르다. 이러한 경우, 문제 자체에 오류가 있을 가능성이 높다. ④ their는 the complexities of life를 받는 소유격 대명사로 문맥상 '삶의 더 두려운 측면들'이라는 의미로 적절하다. ① that은 understand의 목적어 역할을 하는 명사절 접속사이다. ② begin은 주어 They에 대한 동사로 shed와 병렬 구조를 이룬다. ③ to challenge는 be able to에 연결되는 동사원형이다. ⑤ magnified는 become의 보어로 사용된 과거분사 형용사이다. (참고: 제공된 정답 4번을 기준으로 설명하자면, their가 life를 받을 수 없다고 보았을 수 있으나 문맥상 가능하다. its로 바꾸는 것이 더 명확할 수는 있다.)

4. [정답] ⑤

Soft-path 공법은 자연의 변화를 수용하고 최소한으로 개입하는 방식이다. 지문 마지막 문장에서 'soft-path' 공학자들은 강물의 변동성에서 생기는 지형들(역류, 습지 등)을 '생태학적으로 중요하게(ecologically important)' 여긴다고 했다. 따라서 ⑤번에서 'soft-path' 공법이 강의 움직임의 '가변성(variability)'을 '중요하지 않다고(insignificant)' 받아들인다는 것은 문맥에 맞지 않다. '자연스러운' 또는 '중요한' 것으로 받아들여야 한다.

심리학은 'garden(정원)'처럼 질서와 패턴을 찾으려 하고, 문학은 'wilderness(황무지)'처럼 제멋대로인 인간 경험의 깊이를 탐구한다고 비유한다. 필자는 심리학자들이 아이들의 마음을 제대로 이해하려면, 질서정연한 패턴에만 집착할 것이 아니라 아이들의 'unruly and imaginative ways(제멋대로이고 상상력이 풍부한 방식)', 즉 'wilderness'의 측면을 보아야 한다고 주장한다. 따라서 심리학자는 '황무지로 조금 더 자주 과감히 들어가야 한다(venture a little more often into the wilderness)'는 결론에 이르게 된다.

6. [정답] ⑤

글쓰기는 대화와 달리 비언어적 소통과 즉각적인 피드백이 불가능하므로 독자에 대한 고려가 더 중요하다고 말한다. 따라서 작가는 독자가 그 자리에 없기 때문에, 독자가 어떻게 반응할지를 미리 예측하고 상상해야 한다. 이는 '자리에 없는 독자의 반응을 예상해야 한다(anticipate the absent reader's response)'는 말과 같다. 바로 뒤에 이어지는 '가상 대화의 양쪽 절반을 상상해야 한다'는 표현이 이를 뒷받침한다.
