

2027학년도 수능 대비 모의평가

1. 밑줄 친 부분이 다음 글에서 의미하는 바로 가장 적절한 것은?

The single most important change you can make in your working habits is to switch to creative work first, reactive work second. This means blocking off a large chunk of time every day for creative work on your own priorities, with the phone and e-mail off. I used to be a frustrated writer. Making this switch turned me into a productive writer. Yet there wasn't a single day when I sat down to write an article, blog post, or book chapter without a string of people waiting for me to get back to them. It wasn't easy, and it still isn't, particularly when I get phone messages beginning "I sent you an e-mail two hours ago...!" By definition, this approach goes against the grain of others' expectations and the pressures they put on you. It takes willpower to switch off the world, even for an hour. It feels uncomfortable, and sometimes people get upset. But it's better to disappoint a few people over small things, than to abandon your dreams for an empty inbox. Otherwise, you're sacrificing your potential for the illusion of professionalism.

- ① following an innovative course of action
- ② attempting to satisfy other people's demands
- ③ completing challenging work without mistakes
- ④ removing social ties to maintain a mental balance
- ⑤ securing enough opportunities for social networking

2. 다음 글의 제목으로 가장 적절한 것은?

In technological design, an aspiration towards seamlessness aims to make the technological experience for humans blend seamlessly into our everyday lives. Essentially, this aspiration aims towards experiences where people are no longer (a) aware of the technology, the interface or the differences between human-technology and human-human interaction. Considering the metaphor of seams in clothing, we can say that we aspire to seamless aesthetics by stitching the seams closely, pressing them flat and making sure they are (b) hidden on the inside so that we wear clothing rather than pieces of fabric. When designers and engineers talk about technological seamlessness, they are often referring to ease of use and convenience. For example, in interface design, an aspiration towards seamlessness (c) ensures the experience for the user flows and is not stressful or irritating. Most of us would have had experiences of (d) poor interface designs or apps in workplaces that make things more complicated and irritating, and have longed for more seamless interfaces. Technological seamlessness can also include less visible screens in new technologies, or virtual reality technologies with a seamless technological design. The aim is to immerse the user experience such that the visual interaction might be described as inside the screen rather than a body interacting with a digital console or object as separate entities. Similarly, seamlessness in humanoid robotic design aims to make humanoids (e) distinguishable from a human body.

3. 다음 글의 밑줄 친 부분 중, 어법상 틀린 것은?

Partly in response to Freud's ideas, Jean Piaget suggested that children up to the age of about seven years remain locked within a self-centered view of the world ① which he called cognitive egocentrism. This can be seen as midway between Freudian infantile autism and the fully ② socialized awareness that adults possess. Despite being able to talk, infants fail to realize that other people may perceive and know different things from ③ themselves. This means that the child does not understand itself properly as a thinking being since it has not realized that its own thoughts, perceptions, knowledge and memories ④ being dependent on its own particular experience and perspective. Only when children realize that other people can have systematically different experiences and perspectives from their own, are they able to take a perspective on their own thoughts and, one might say, ⑤ know about their own minds. autism 자폐증

4. 다음 글의 밑줄 친 부분 중, 문맥상 낱말의 쓰임이 적절하지 않은 것은? (3점)

Everywhere we turn we hear about almighty "cyberspace"! The hype promises that we will leave our boring lives, put on goggles and body suits, and enter some metallic, three-dimensional, multimedia otherworld. When the Industrial Revolution arrived with its great innovation, the motor, we didn't leave our world to go to some ① remote motorspace! On the contrary, we brought the motors into our lives, as automobiles, refrigerators, drill presses, and pencil sharpeners. This ② absorption has been so complete that we refer to all these tools with names that declare their usage, not their "motorness." These innovations led to a major socioeconomic movement precisely because they entered and ③ affected profoundly our everyday lives. People have not changed fundamentally in thousands of years. Technology changes constantly. It's the one that must ④ adapt to us. That's exactly what will happen with information technology and its devices under human-centric computing. The longer we continue to believe that computers will take us to a magical new world, the longer we will ⑤ maintain their natural fusion with our lives, the hallmark of every major movement that aspires to be called a socioeconomic revolution.

5. 다음 빈칸에 들어갈 말로 가장 적절한 것을 고르시오.

Over the last decade the attention given to how children learn to read has foregrounded the nature of textuality, and of the different, interrelated ways in which readers of all ages make texts mean. 'Reading' now applies to a greater number of representational forms than at any time in the past: pictures, maps, screens, design graphics and photographs are all regarded as text. In addition to the innovations made possible in picture books by new printing processes, design features also predominate in other kinds, such as books of poetry and information texts. Thus, reading becomes a more complicated kind of interpretation than it was when children's attention was focused on the printed text, with sketches or pictures as an adjunct. Children now learn from a picture book that words and illustrations complement and enhance each other. Reading is not simply . Even in the easiest texts, what a sentence 'says' is often not what it means.

- ① knowledge acquisition
- ② word recognition
- ③ imaginative play
- ④ subjective interpretation
- ⑤ image mapping

6. 다음 빈칸에 들어갈 말로 가장 적절한 것을 고르시오.

We are famously living in the era of the attention economy, where the largest and most profitable businesses in the world are those that consume my attention. The advertising industry is literally dedicated to capturing the conscious hours of my life and selling them to someone else. It might seem magical that so many exciting and useful software systems are available to use for free, but it is now conventional wisdom that if you can't see who is paying for something that appears to be free, then _____. Our creative engagement with other people is mediated by AI-based recommendation systems that are designed to trap our attention through the process that Nick Seaver calls captology, keeping us attending to work sold by one company rather than another, replacing the freedom of personal exploration with algorithm-generated playlists or even algorithm-generated art.

- ① all of your attention has already been spent
- ② the real product being sold is you
- ③ your privacy is being violated
- ④ the public may be sponsoring you
- ⑤ you owe the benefits to your friend AI

정답 및 해설

1. [정답] ②

[해설]

필자는 창의적인 일을 먼저 하고, 다른 사람의 요구에 반응하는 일(reactive work)은 나중에 하라고 조언한다. 'an empty inbox'는 모든 이메일에 답장하여 받은 편지함을 비우는 행위, 즉 다른 사람들의 요구에 즉각적으로 반응하는 것을 상징한다. 필자는 자신의 꿈(창의적인 일)을 'an empty inbox'를 위해 포기하지 말라고 했으므로, 이는 '다른 사람들의 요구를 만족시키려는 시도'를 의미한다.

2. [정답] ①

[해설]

이 글의 핵심어는 'seamlessness(이음매 없음)'로, 기술이 사용자의 일상에 완벽하게 녹아들어 기술 자체를 인식하지 못하게 만드는 디자인 목표를 설명한다. 이는 곧 기술이 더 이상 기술처럼 느껴지지 않는 상태를 지향하는 것이므로, '융화되기: 기술이 기술처럼 느껴지지 않을 때(Blending In: When Tech Stops Feeling Like Tech)'가 글 전체의 주제를 가장 잘 나타내는 제목이다.

3. [정답] ④

[해설]

④번은 realized that절 안의 동사가 필요한 자리이다. that절의 주어는 'its own thoughts, perceptions, knowledge and memories'이며, 동사가 없으므로 준동사 being이 아니라 정동사 are가 와야 한다. ① which는 목적격 관계대명사로 선행사 a self-centered view of the world를 수식한다. (call A B 구문에서 A가 선행사로 빠져나감) ② socialized는 awareness를 수식하는 과거분사 형용사이다. ③ themselves는 주어 infants와 비교 대상인 '다른 사람들'과 구분되는 '자기 자신'을 의미하며 문맥상 적절하다. ⑤ know는 are able to take와 병렬로 연결된 동사원형이다.

4. [정답] ⑤

[해설]

필자는 기술이 우리 삶에 자연스럽게 융합되어야 진정한 사회경제적 혁명을 이끌 수 있다고 주장한다. 마지막 문장은 '컴퓨터가 우리를 마법 같은 신세계로 데려갈 것이라고 계속 믿는다면, 우리 삶의 자연스러운 융합을 더 오래 유지할 것이다'라는 의미가 된다. 이는 논리적 모순이다. 컴퓨터가 별개의 세계로 우리를 데려간다고 믿는 것은 우리 삶의 융합을 '지연시키거나(delay)' '방해하는(hinder)' 것이므로, '유지하다(maintain)'는 어휘는 문맥상 적절하지 않다.

5. [정답] ②

[해설]

이 글은 현대의 '읽기'가 단순히 인쇄된 글자를 해독하는 행위를 넘어, 그림, 사진, 디자인 등 다양한 시각적 요소를 포함하는 복합적인 '해석(interpretation)' 활동으로 확장되었음을 설명합니다. 글과 삽화가 서로를 보완하고 향상시킨다는 점, 문장이 말하는 바가 곧 의미하는 바가 아니라는 점을 통해, 읽기가 과거의 단순한 개념을 넘어섰음을 보여줍니다. 따라서 읽기는 단순히 '단어를 인식하는(word recognition)' 행위가 아니라는 결론이 가장 자연스럽습니다.

6. [정답] ②

[해설]

지문은 '주의력 경제(attention economy)'에 대해 설명하며, 기업들이 우리의 주의력을 사로잡아 다른 이에게 판매한다고 말한다. 빈칸은 '무료로 보이는 것에 대해 누가 돈을 내는지 알 수 없다면'이라는 조건절에 이어지는 내용이다. 이는 '실제 팔리는 상품은 바로 당신이다(the real product being sold is you)'라는, 무료 온라인 서비스의 비즈니스 모델을 지적하는 관용적인 지혜와 일맥상통한다.
