

2027학년도 수능 대비 모의평가

1. 다음 글의 목적으로 가장 적절한 것은?

Dear Friends, Season's greetings. As some of you already know, we are opening our annual food drive. This is how you participate. You can bring your items for donation to our booths. Our donation booths are located in the lobbies of our campus libraries. Just drop off the items there during usual library hours, from December 1st to 23rd. The donated food should be non-perishable like canned meats and canned fruits. Packaged goods such as jam and peanut butter are also good. We will distribute the food to our neighbors on Christmas Eve. We truly appreciate your help. Many blessings, Joanna at Campus Food Bank

- ① 음식 기부에 참여하는 방법을 안내하려고
- ② 음식 메뉴 개발에 관해 조언을 구하려고
- ③ 도서관 이용 시간 변경을 공지하려고
- ④ 음식물 낭비의 심각성을 알려 주려고
- ⑤ 크리스마스 행사 일정을 문의하려고

2. 다음 글의 주제로 가장 적절한 것은? (3점)

Human beings do not enter the world as competent moral agents. Nor does everyone leave the world in that state. But somewhere in between, most people acquire a bit of decency that qualifies them for membership in the community of moral agents. Genes, development, and learning all contribute to the process of becoming a decent human being. The interaction between nature and nurture is, however, highly complex, and developmental biologists are only just beginning to grasp just how complex it is. Without the context provided by cells, organisms, social groups, and culture, DNA is inert. Anyone who says that people are "genetically programmed" to be moral has an oversimplified view of how genes work. Genes and environment interact in ways that make it nonsensical to think that the process of moral development in children, or any other developmental process, can be discussed in terms of nature versus nurture. Developmental biologists now know that it is really both, or nature through nurture. A complete scientific explanation of moral evolution and development in the human species is a very long way off.

- ① evolution of human morality from a cultural perspective
- ② difficulties in studying the evolutionary process of genes
- ③ increasing necessity of educating children as moral agents
- ④ nature versus nurture controversies in developmental biology
- ⑤ complicated gene-environment interplay in moral development

3. 다음 글의 제목으로 가장 적절한 것은? (3점)

A common error in current Darwinian thinking is the assumption that "selfish genes" are the prime mover in evolution. In strict Darwinism the prime mover is environmental threat. In the absence of threat, natural selection tends to resist change. It is un-biological to "explain" behavioural change as resulting from genetic change or the ex vacuo emergence of domain-specific brain modules. Evolutionary psychologists surely know why brains evolved: as Cosmides and Tooby point out, brains are found only in animals that move. Brains are behavioural organs, and behavioural adaptation, being immediate and non-random, is vastly more efficient than genetic adaptation. So, in animals with brains, behavioural change is the usual first response to environmental threat. If the change is successful, genetic adaptation to the new behaviour will follow more gradually. Animals do not evolve carnivore teeth and then decide it might be a good idea to eat meat.

4. 다음 글의 밑줄 친 부분 중, 어법상 틀린 것은?

Recognizing ethical issues is the most important step in understanding business ethics. An ethical issue is an identifiable problem, situation, or opportunity that requires a person to choose from among several actions that may ①be evaluated as right or wrong, ethical or unethical. ②Learn how to choose from alternatives and make a decision requires not only good personal values, but also knowledge competence in the business area of concern. Employees also need to know when to rely on their organizations' policies and codes of ethics or ③have discussions with co-workers or managers on appropriate conduct. Ethical decision making is not always easy because there are always gray areas ④that create dilemmas, no matter how decisions are made. For instance, should an employee report on a co-worker engaging in time theft? Should a salesperson leave out facts about a product's poor safety record in his presentation to a customer? Such questions require the decision maker to evaluate the ethics of his or her choice and decide ⑤whether to ask for guidance.

5. 다음 글의 내용을 한 문장으로 요약하고자 한다. 빈칸 (A), (B)에 들어갈 말로 가장 적절한 것은?

Human speech differs from the cries of other species in many ways. One very important distinction is that all other animals use one call for one message as the general principle of communication. This means that the number of possible messages is very restricted. If a new message is to be included in the system, a new sound has to be introduced, too. After the first few tens of sounds it becomes difficult to invent new distinctive sounds, and also to remember them for the next time they are needed. Human speech builds on the principle of combining a restricted number of sounds into an unlimited number of messages. In a typical human language there are something like thirty or forty distinctive speech sounds. These sounds can be combined into chains to form a literally unlimited number of words. Even a small child, who can communicate by only one word at a time, uses a system for communication that is infinitely superior to any system utilized by any other animal.

In animal cries, each call (A) a different message, which limits the number of possible messages, whereas human language creates an unlimited number of messages using a (B) set of distinctive sounds.

In animal cries, each call ____ (A) ____ a different message, which limits the number of possible messages, whereas human language creates an unlimited number of messages using a ____ (B) ____ set of distinctive sounds.

- | (A) | (B) | (A) | (B) |
|--------------|---------------|--------------|-----------------|
| ① represents | finite | ② symbolizes | universal |
| ③ distorts | fixed | ④ expresses | novel |
| ⑤ records | complex | | |

정답 및 해설

1. [정답] ①

[해설]

글의 중반부에 'This is how you participate.'라는 문장을 통해 음식 기부(food drive) 참여 방법을 구체적으로 안내하고 있습니다. 기부 물품, 장소, 기간 등을 상세히 설명하고 있으므로 글의 목적은 음식 기부 참여 방법 안내입니다.

2. [정답] ⑤

[해설]

이 글은 인간의 도덕성 발달 과정을 다룬다. 필자는 유전자(nature)와 학습/환경(nurture)이 모두 기여하지만, 그 상호작용(interaction)이 'highly complex'하다고 강조한다. 유전자가 도덕성을 결정한다는 견해는 'oversimplified view'라고 비판하며, 도덕 발달을 'nature versus nurture'의 이분법으로 논하는 것은 'nonsensical'하다고 말한다. 핵심은 'Genes and environment interact', 즉 유전자와 환경이 상호 작용한다는 것이다. 따라서 도덕성 발달에 있어 복잡한 유전자-환경의 상호작용을 설명하는 ⑤번이 글의 주제로 가장 적절하다.

3. [정답] ①

[해설]

이 글은 진화의 주된 동력이 유전자가 아닌 환경 위협에 대한 '행동의 변화'라고 주장합니다. 행동 변화가 먼저 일어나고(first response) 유전적 적응이 나중에(follow more gradually) 뒤따른다고 설명하므로, '행동과 유전자 중 무엇이 먼저 적응하는가?'라는 질문이 글의 핵심 내용을 가장 잘 담고 있는 제목입니다.

4. [정답] ②

[해설]

②번이 포함된 문장은 '... requires not only good personal values, but also ...' 구조로, 'requires'가 동사이다. 이 동사의 주어가 필요한데, 동사 원형인 'Learn'은 주어가 될 수 없다. '대안들 중에서 선택하고 결정을 내리는 법을 배우는 것'이라는 의미의 주어가 되려면 동명사 'Learning'이나 to부정사 'To learn'이 와야 한다. 따라서 'Learn'을 'Learning'으로 고쳐야 한다.

5. [정답] ①

[해설]

The passage contrasts animal communication (one sound = one message, hence limited messages) with human language (a limited number of sounds combined to make unlimited messages). For (A), 'represents' accurately describes the one-to-one relationship between an animal call and its message. For (B), the passage states humans use a 'restricted number of sounds,' which is synonymous with a 'finite' set.
